For some, recycling is a big business; for others a moralised way of engaging with the world. But, for many, this is a dangerous way of earning a living. With scrap now being the largest export category from the US to China, the sheer scale of this global trade has not yet been clearly identified or analysed. Combining fine-grained ethnographic analysis with overviews of international material flows, *Economies of Recycling* radically changes the way we understand global and local economies as well as the new social relations and identities created by recycling processes. Following global material chains, this groundbreaking book reveals astonishing connections between persons, households, cities and global regions as objects are reworked, taken to pieces and traded. With case studies from Africa, Latin America, South Asia, China, the former Soviet Union, North America and Europe, this timely collection debunks common linear understandings of production, exchange and consumption and argues for a complete re-evaluation of North-South economic relationships.

Sophiatown was the 'Chicago of South Africa', a vibrant community that produced not only gangsters and shebeen queens but leading journalists, writers, musicians and politicians, and gave urban African culture its rhythm and style. This play, based on the life history of Sophiatown, opened at the Market Theatre in Johannesburg in February 1986 to great acclaim. The play won the AA Life Vita Award for Playwright of the Year 1985/86. This new edition of the play includes an introduction which sets the work in its historical context.

Teaching and Digital Technologies: Big Issues and Critical Questions helps both pre-service and in-service teachers to critically question and evaluate the reasons for using digital technology in the classroom. Unlike other resources that show how to use specific technologies – and quickly become outdated, this text empowers the reader to understand why they should (or should not) use digital technologies, when it is appropriate (or not), and the implications arising from these decisions. The text directly engages with policy, the Australian Curriculum, pedagogy, learning and wider issues of equity, access, generational stereotypes and professional learning. The contributors to the book are notable figures from across a broad range of Australian universities, giving the text a unique relevance to Australian education while retaining its universal appeal. Teaching and Digital Technologies is an essential contemporary resource for early childhood, primary and secondary pre-service and in-service teachers in both local and international education environments.

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Where do I begin to write my thesis or dissertation? Which sections should such a text have? How do I get my thoughts onto paper? How do I combine all my results in one coherent whole? What is an academic writing style? How do I reference?Scientific Writing Skills gives answers to these questions. It is the result of many courses in scientific writing skills to postgraduate students based on real writing problems and text examples from diverse disciplines. It is a practical yet scientifically sound guide that helps the student tackle scientific writing.It is also available in Afrikaans as Wetenskaplike skryfvaardighede.

C++ is a powerful, highly flexible, and adaptable programming language that allows software engineers to organize and process information quickly and effectively. But this high-level language is relatively difficult to master, even if you already know the C programming language.The new second edition of "Practical C++ Programming is a complete introduction to the C++ language for programmers who are learning C++. Reflecting the latest changes to the C++ standard, this new edition takes a useful down-to-earth approach, placing a strong emphasis on how to design clean, elegant code.In short, to-the-point chapters, all aspects of programming are covered including style, software engineering, programming design, object-oriented design, and debugging.It also covers common mistakes and how to find (and avoid) them. End of chapter exercises help you ensure you've mastered the material. Steve Oualline's clear, easy-going writing style and hands-on approach to learning make "Practical C++ Programming a nearly painless way to master this complex but powerful programming language.
