Human resource information systems (HRIS) has become a crucial area of attention for management professionals. A major challenge in teaching the course is its cross-disciplinary nature. HR students find it difficult to grasp the IT//IS side of the subject and vice versa. To overcome the technical nature of most of the books in the market Human Resource Information Systems has a balanced approach in dealing with HR and IT//IS issues by drawing from experts in both areas. Rather than depending on expensive commercial software products to demonstrate the applications of HRIS, this book uses case studies at the end of most chapters to facilitate discussions and link them to managerial and technical problems in HRIS.

The international best seller Human Resource Champions helped set the HR agenda for the 1990s and enabled HR professionals to become strategic partners in their organizations. But earning a seat at the executive table was only the beginning. Today's HR leaders must also bring substantial value to that table. Drawing on their 16-year study of over 29,000 HR professionals and line managers, leading HR experts Dave Ulrich and Wayne Brockbank propose The HR Value Proposition. The authors argue that HR value creation requires a deep understanding of external business realities and how key stakeholders both inside and outside the company define value. Ulrich and Brockbank provide practical tools and worksheets for leveraging this knowledge to create HR practices, build organizational capabilities, design HR strategy, and marshal resources that create value for customers, investors, executives, and employees. Written by the field's premier trailblazers, this book charts the path HR professionals must take to help lead their organizations into the future. Ulrich is a professor at the University of Michigan School of Business and the author of 12 books and more than 100 articles on the subject of human resources.
