It was the original forever war, which went on interminably, fuelled by religious fanaticism, personal ambition, fear of hegemony, and communal suspicion. It dragged in all the neighbouring powers. It was punctuated by repeated failed ceasefires. It inflicted suffering beyond belief and generated waves of refugees. No, this is not Syria today, but the Thirty Years' War (1618-48), which turned Germany and much of central Europe into a disaster zone. The Thirty Years' War is often cited as a parallel in discussions of the Middle East. The Peace of Westphalia, which ended the conflict in 1648, has featured strongly in such discussions, usually with the observation that recent events in some parts of the region have seen the collapse of ideas of state sovereignty--ideas that supposedly originated with the 1648 settlement. Axworthy, Milton and Simms argue that the Westphalian treaties, far from enshrining state sovereignty, in fact reconfigured and strengthened a structure for legal resolution of disputes, and provided for intervention by outside guarantor powers to uphold the peace settlement. This book argues that the history of Westphalia may hold the key to resolving the new long wars in the Middle East today.

Keith McCord recounts the history of automotive onboard diagnostic systems and creation of the rudimentary OBD I systems and the development as well as the evolution of OBD II. Currently, OBD-II (OnBoard Diagnostic II) is the standard of the industry, and this book provides a thorough explanation of this system. It details its main features, capabilities, and characteristics. It shows how to access the port connector on the car, the serial data protocols, and what the serial data means. To understand the diagnostic codes, the numbering system is defined and the table of common DTCs is shown. But most importantly, McCord provides a thorough process for trouble shooting problems, tracing a problem to its root, explaining why DTCs may not lead to the source of the underlying problem, and ultimately resolving the problem.
