This book by Lionel Robbins first appeared in 1932 as an outstanding English-language statement of the Misesian view of economic method, namely that economics is a social science and must advance its propositions by means of deductive reasoning and not through the methods used in the natural sciences. The case is argued here with patience and attention to scholarly details. The unfortunate second edition of this book, which is more available today, introduces confusions by departing from Austrian microeconomic theory. Thus does the Mises Institute celebrate the 75th anniversary of the first edition with this reprint. "Reading Robbins," writes Samuel Bostaph of the University of Dallas, "is an excellent way of contrasting his explanation of the basic nature of economics with that of the Austrian School, as found in the work of Mises as an extension of Carl Mengers's foundations. Such a reading wonderfully clarifies one's understanding of the basic conception of economics as a science of human action, rather than one of mere 'economizing.' "

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare, Albanian writer.

In Pannonia and Upper Moesia, first published 1974, András Mócsy surveys the Middle Danube Provinces from the latest pre-Roman Iron Age up to the beginning of the Great Migrations. His primary concern is to develop a general synthesis of the archaeological and historical researches in the Danube Basin, which lead to a more detailed knowledge of the Roman culture of the area. The economic and social development, town and country life, culture and religion in the Provinces are all investigated, and the local background of the so-called Illyrian Predominance during the third century crisis of the Roman Empire is explained, as is the eventual breakdown of Danubian Romanisation. This volume will appeal to students and teachers of archaeology alike, as well as to those

interested in the Roman Empire – not only the history of Rome itself, but also of the far-flung areas which together comprised the Empire's frontier for centuries. A few words about Dostoevsky himself may help the English reader to understand his work. Dostoevsky was the son of a doctor. His parents were very hard-working and deeply religious people, but so poor that they lived with their five children in only two rooms. The father and mother spent their evenings in reading aloud to their children, generally from books of a serious character. Though always sickly and delicate Dostoevsky came out third in the final examination of the Petersburg school of Engineering. There he had already begun his first work, "Poor Folk." This story was published by the poet Nekrassov in his review and was received with acclamations. The shy, unknown youth found himself instantly something of a celebrity. A brilliant and successful career seemed to open before him, but those hopes were soon dashed. In 1849 he was arrested.

The importance of naming and categorizing nature has its roots in the biblical Genesis, as does the problematic view of man's domination over it. Farber (history, Oregon State U.) traces the scientific study of the natural world from its 18th century beginnings with Swedish botanist Linnaeus and his French rival Buffon, through Darwin's synthesis, to the modern theory of evolution (1900-50), and concerns over biodiversity by the "naturalist as generalist" exemplified by Wilson. A few years from now, the world won't be such a different place. After all, the flying cars we were promised when we were kids never materialized. And that egalitarian society science fiction showed us? It's still a distant fantasy as the rich get richer and everybody else just struggles to get by. That, especially, doesn't show any sign of changing any time soon. So, a few years from now, the world will be a pretty familiar place: Rich people living in gated communities at one end of the spectrum; poor people living in slums at the other end. And cops standing between them. Cops busting their asses to make the world a safer place, even though they realize it's an endless struggle. Without ever stopping to think that maybe, just maybe, by keeping the status quo, they are the reason it's an endless struggle. That kind of thinking is definitely way above the pay grade of one average detective who is handed just an average murder case with a macabre twist. So he does what he always does: plugs along the only way he knows how, putting the pieces together one-by-one, knowing it will eventually lead him to the murderer. But the pieces just don't fit with the picture of the world he grew up with. Yes, a few years from now, the world won't be such a different place. So don't expect any goddamn flying cars.

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. *The Siege* tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling, *The Siege* is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

Offers an introduction to modern economics principles.

"By examining the major economic sectors of our society, including infrastructure (green housing), consumer goods (green clothing), food (the rise of organic), and energy (including solar power and the popularity of the hybrid car), [this book] explains that, though greener alternatives are important, we cannot simply buy our way to sustainability. Rather, if it is the volume of our consumption that matters, can we as a society dependent on constantly consuming ever be content with buying less?" --Cover, p.[4].

The tender plant of Albanian literature grew in a rocky soil. It was late to evolve and its development, indeed its very existence, was threatened in many periods. "Albanian Literature: A Short History" tells the story of the survival and growth of Albanian creative writing beginning with the earliest thirteenth century texts of Theodor of Shkodra, tracing the development of the modern literature of Buzuku, Budi and Bogdani, the incorporation of the Muslim influences of Frakulla and Kycyku and continuing with the works of Cajupi and Kadare during the reign of King Zog and the Hoxha administration. A unique book that illuminates an under-researched subject, "Albanian Literature" is an essential reference guide for all those interested in Balkan cultures, in comparative literature and in European cultural history in general.

This volume offers a new insight into the development of a great historian, as well as giving an exciting and immensely readable new approach to late Republican and early Imperial Roman history. Drafted in 1934-35, but laid aside in favour of 'The Roman Revolution' (1939), 'The Provincial at Rome' was to have been Ronald Syme's first book. It is a brilliantly written study of the enlargement of the Roman elite in the early empire, an analysis, in thirteen chapters, of the Emperor Claudius' enrolment of 'Gallic chieftains' into the Senate in AD 48. The edition also includes five unpublished papers dealing with Rome's conquest of the Balkans, a region Syme knew intimately.
