The Shadow of Death Susan J English, 2014-08 Tom English's surgeon delivered the official report to his wife Susan, "We're sorry to tell you, but the odds are against him. He has less than a 5 percent chance of surviving." On July 14, the feast day of Blessed Kateri Tekakwitha, Susan took Tom to the emergency room, where he was eventually diagnosed with necrotizing fasciitis, a life-threatening, "flesh-eating" bacterial infection. At that point, Tom was so septic that all of his vital

organs were shutting down and he was now relying on life support. In the hours and days that followed, friends and strangers stormed the heavens with prayers pleading for healing and grace while the hospital staff worked tirelessly to keep Tom alive. This true story recounts how powerful, persistent prayers and intensive medical intervention brought one man through the valley of the shadow of death. This personal narrative is a compilation of the web postings made during Tom's illness and includes his dreams while in a coma.

Surviving the "flesh-eating Bacteria" Jacqueline A. Roemmele, Donna Batdorff, 2000 Two survivors of this 'flesh-eating' bacterium explain this horrific tissue-destroying disease. Known to the medical community as necrotizing fasciitis (NF), this infection, commonly caused by Strep A bacteria, is often fatal. Until now, there has been no useful information available to the general public. This is the first comprehensive book geared to survivors of the disease, their families, and anyone wishing to learn more about it.

Further, it breaks with past misconceptions and myths, and explains in detail the modern approach. The aim is to help clinicians perform the differential diagnosis of vulvar conditions and implement the new recommended treatments. The core chapters of the book are arranged in accordance with lesion presentation: red lesions, white lesions, patches and plaques, papules and nodules, erosions and ulcers, blisters, etc. For each lesion, the multidisciplinary management is fully explained, including clarifications of the role of gynecologists, dermatologists, physical therapists, pain specialists, sex therapists, and others. Clinical case presentations and numerous illustrations of treatment procedures are included, supplemented by informative online videos. A separate chapter is devoted to vulvar pain, which is increasingly becoming recognized as a growing problem. Here, again the past approaches are

replaced with new paradigms. All of the authors are acknowledged experts in the field and the editor is a past president of the ISSVD. The book will be of value for all vulvar specialists and a wide range of other clinicians.

Moreover, it elaborates those diseases in which superantigens are actively involved. The cases provide expert discussion with tips and tricks, personal experience with management of each of the cases, and a follow-up description of the outcome of the cases to provide the reader with closure. To supplement each case study, all 67 chapters include a pattern recognition component that identifies the key diagnostic features of the disease discussed. The chapters conclude with a summary of the diagnostic and treatment details of each condition.
