Our revision resources are the smart choice for those revising for Edexcel Functional Skills Level 2 in ICT

Exam Board: AQA Level: KS3 Subject: Science First Teaching: September 2016 First Exam: June 2017 Inspire students to progress with this fresh and contemporary take on Science, brought to life through clear explanations and real-world examples that are tailored to the new AQA Entry Level Certificate in Science specification requirements. - Provides you with a very different sort of textbook to help engage students who are disillusioned or struggling with their science study; full of relevant contexts, exciting photographs and a sense of fun. - Offers activities that will demonstrate students' understanding in a variety of ways, from factual recall and enquiry skills, to group discussion and creative/artistic tasks. - Created to support students with lower literacy levels. - Provides comprehensive support for non-specialist or less-confident teachers when used in conjunction with the online Teaching & Learning resources. - Offers flexibility to use with either Entry Level students or as a support resources for Foundation-tier GCSE Combined Science candidates.

This revision guide delivers hassle-free exam preparation, covering one topic per page and closely matching the AQA specification.

"Published by OpenStax College, Calculus is designed for the typical two- or three-semester general calculus course, incorporating innovative features to enhance student learning. The book guides students through the core concepts of calculus and helps them understand how those concepts apply to their lives and the world around them. Due to the comprehensive nature of the material, we are offering the book in three volumes for flexibility and efficiency. Volume 1 covers functions, limits, derivatives, and integration."--BC Campus website.

Our revision resources are the smart choice for those revising for Edexcel Functional Skills in Mathematics

Confronting Climate Uncertainty in Water Resources Planning and Project Design describes an approach to facing two fundamental and unavoidable issues brought about by climate change uncertainty in water resources planning and project design. The first is a risk assessment problem. The second relates to risk management. This book provides background on the risks relevant in water systems planning, the different approaches to scenario definition in water system planning, and an introduction to the decision-scaling methodology upon which the decision tree is based. The decision tree is described as a scientifically defensible, repeatable, direct and clear method for demonstrating the robustness of a project to climate change. While applicable to all water resources projects, it allocates effort to projects in a way that is consistent with their potential sensitivity to climate risk. The process was designed to be hierarchical, with different stages or phases of analysis triggered based on the findings of the previous phase. An application example is provided followed by a descriptions of some of the tools available for decision making under uncertainty and methods available for climate risk management. The tool was designed for the World Bank but can be applicable in other scenarios where similar challenges arise.

Exam paper covered: Edexcel GCSE (9-1) Psychology First teaching: September 2017 First exams: Summer 2019 Specifically designed to support you with the Edexcel GCSE (9-1) Psychology course and assessments. Provides contemporary and engaging examples that students can relate to such as 'why we forget things' and what can affect our memory'. This book addresses the questions why citizenship education is an important subject for students in further and adult education and why we need democratic colleges to support

the study of citizenship education. It investigates the historical roots of further and adult education and identifies how the adoption of citizenship education in the post-compulsory sector can enrich vocational studies in further education and programmes in adult education. It is argued that democratic colleges are vital to ensure that citizenship education informs the decision-making process throughout educational institutions (and as a means of establishing fair and equal representation for important stakeholders). The author has worked in both sectors for over a decade, and uses this experience to offer a blend of educational practice and philosophical investigation. The result is a work that appeals to both teachers in further and adult education as well as academics and students interested in philosophy of education.?

Packed with sources and graphics to bring maths into the real world, this book contains comprehensive coverage of the current specification with a real focus on both process skills and practice.

'AQA Functional English' provides an exact match for the Functional Skills English specification, so you can prepare students fully for their Level 2 assessments.

This is the Committee's scrutiny of the draft Apprenticeships Bill which was published on 16 July 2008. While putting much of the current arrangements for apprenticeships onto a statutory basis, the draft Bill provides greater flexibility to allow employers to design and bring forward for approval their own apprenticeship frameworks. The extent of this flexibility was not clear as a key document, the specification of apprenticeship standards, which will determine the core components of frameworks was not published with the draft Bill. Nor did the Government set out in detail how the National Apprenticeship Service would be resourced or organised, or how the legislation would apply in Wales. These as key omissions impeded the scrutiny process. With this in mind it was concluded that in general the legislation is justified because it has the potential to strengthen the structure for apprenticeships in England. However there was a major concern of volume at the expense of quality. The Government must ensure that the draft Bill is re-written to promote, monitor and report on the quality of apprenticeships. Without provisions underpinning quality, the legislation risks the devaluation of apprenticeships, and employers, parents and young people as well as adults will cease to see apprenticeships as a progressive route through to a future career.

This is the first edition of a textbook written for a community college introductory course in spreadsheets utilizing Microsoft Excel; second edition available:

<https://openoregon.pressbooks.pub/beginningexcel19/>. While the figures shown utilize Excel 2016, the textbook was written to be applicable to other versions of Excel as well.

The book introduces new users to the basics of spreadsheets and is appropriate for students in any major who have not used Excel before.
