When Spanish photographer Cristina Garcia Rodero went to study art in Italy, in 1973, she fully understood the importance of home. Yet her time abroad formented a deeper interest in was happening in her own country and, as a result, at the age of 23, Garcia Rodero returned to Spain and started a project that she hoped would capture the essence of the myriad Spanish traditions, religious practices and rites that were already fading away. What started as a five-year project ended up lasting 15 years and came to be the book *España Oculta*(Hidden Spain) published in 1989. At 39 years old, Garcia Rodero had managed to compile a kind of anthropological encyclopedia of her country. The work also captured a key moment in Spain's history – with Spanish dictator Franco dying in 1975, and the country commencing a period of transition – something that would come to have a huge effect on the way the nation's cultural traditions and rites were experienced and performed from then on.

Twenty-five years after her passing, Audrey Hepburn remains the most beloved of all Hollywood stars, known as much for her role as UNICEF ambassador as for films like *Roman Holiday* and *Breakfast at Tiffany's*. Several biographies have chronicled her stardom, but none has covered her intense experiences through five years of Nazi occupation in the Netherlands. According to her son, Luca Dotti, "The war made my mother who she was." Audrey Hepburn's war included participation in the Dutch Resistance, working as a doctor's assistant during the "Bridge Too Far" battle of Arnhem, the brutal execution of her uncle, and the ordeal of the Hunger Winter of 1944. She also had to contend with the fact that her father was a Nazi agent and her mother was pro-Nazi for the first two years of the occupation. But the war years also brought triumphs as Audrey became Arnhem's most famous young ballerina. Audrey's own reminiscences, new interviews with people who knew her in the war, wartime diaries, and research in classified Dutch archives shed light on the riveting, untold story of Audrey Hepburn under fire in World War II. Also included is a section of color and black-and-white photos. Many of these images are from Audrey's personal collection and are published here for the first time.

From Ken Burns's documentaries to historical dramas such as *Roots*, from A&E's *Biography* series to CNN, television has become the primary source for historical information for tens of millions of Americans today. Why has television become

such a respected authority? What falsehoods enter our collective memory as truths? How is one to know what is real and what is imagined -- or ignored -- by producers, directors, or writers? Gary Edgerton and Peter Rollins have collected a group of essays that answer these and many other questions. The contributors examine the full spectrum of historical genres, but also institutions such as the History Channel and production histories of such series as *The Jack Benny Show*, which ran for fifteen years. The authors explore the tensions between popular history and professional history, and the tendency of some academics to declare the past "off limits" to nonscholars. Several of them point to the tendency for television histories to embed current concerns and priorities within the past, as in such popular shows as *Quantum Leap* and *Dr. Quinn, Medicine Woman*. The result is an insightful portrayal of the power television possesses to influence our culture.

Some negotiations are easy. Others are more difficult. And then there are situations that seem completely hopeless. Conflict is escalating, people are getting aggressive, and no one is willing to back down. And to top it off, you have little power or other resources to work with. Harvard professor and negotiation adviser Deepak Malhotra shows how to defuse even the most potentially explosive situations and to find success when things seem impossible. Malhotra identifies three broad approaches for breaking deadlocks and resolving conflicts, and draws out scores of actionable lessons using behind-the-scenes stories of fascinating real-life negotiations, including drafting of the US Constitution, resolving the Cuban Missile Crisis, ending bitter disputes in the NFL and NHL, and beating the odds in complex business situations. But he also shows how these same principles and tactics can be applied in everyday life, whether you are making corporate deals, negotiating job offers, resolving business disputes, tackling obstacles in personal relationships, or even negotiating with children. As Malhotra reminds us, regardless of the context or which issues are on the table, negotiation is always, fundamentally, about human interaction. No matter how high the stakes or how protracted the dispute, the object of negotiation is to engage with other human beings in a way that leads to better understandings and agreements. The principles and strategies in this book will help you do this more effectively in every situation.

A Washington Post Notable Book With a new chapter on eugenicist Madison Grant's *The Passing of the Great Race* In this brilliant and original exploration of some of the formative influences in Adolf Hitler's life, Timothy Ryback examines the books that shaped the man and his thinking. Hitler was better known for burning books than collecting them but, as Ryback vividly shows us, books were Hitler's constant companions throughout his life. They accompanied him from his years as a frontline corporal during the First World War to his final days before his suicide in Berlin. With remarkable attention to detail, Ryback examines the surviving volumes from Hitler's private book collection, revealing the ideas and obsessions that occupied Hitler in his most private hours and the consequences

they had for our world. A feat of scholarly detective work, and a captivating biographical portrait, Hitler's Private Library is one of the most intimate and chilling works on Hitler yet written.

Return of a femme fatale. Beautiful, homicidal Julie has one lethal solution for every problem. And now Nolan and his sometime sidekick Jon have gotten on Julie's "problem" list. Now six of Max Allan Collins's early Nolan novels are back in print, with new Introductions by the author.

The Handbook of Religion and Health has become the seminal research text on religion, spirituality, and health, outlining a rational argument for the connection between religion and health. The Second Edition completely revises and updates the first edition. Its authors are physicians: a psychiatrist and geriatrician, a primary care physician, and a professor of nursing and specialist in mental health nursing. The Second Edition surveys the historical connections between religion and health and grapples with the distinction between the terms "religion" and "spirituality" in research and clinical practice. It reviews research on religion and mental health, as well as extensive research literature on the mind-body relationship, and develops a model to explain how religious involvement may impact physical health through the mind-body mechanisms. It also explores the direct relationships between religion and physical health, covering such topics as immune and endocrine function, heart disease, hypertension and stroke, neurological disorders, cancer, and infectious diseases; and examines the consequences of illness including chronic pain, disability, and quality of life. Finally, the Handbook reviews research methods and addresses applications to clinical practice. Theological perspectives are interwoven throughout the chapters. The Handbook is the most insightful and authoritative resource available to anyone who wants to understand the relationship between religion and health.

A New York Times bestseller The original graphic novel adapted into the film Blue Is the Warmest Color, winner of the Palme d'Or at the 2013 Cannes Film Festival In this tender, bittersweet, full-color graphic novel, a young woman named Clementine discovers herself and the elusive magic of love when she meets a confident blue-haired girl named Emma: a lesbian love story for the ages that bristles with the energy of youth and rebellion and the eternal light of desire. First published in France by Glénat, the book has won several awards, including the Audience Prize at the Angoulême International Comics Festival, Europe's largest. The live-action, French-language film version of the book, entitled Blue Is the Warmest Color, won the Palme d'Or at the Cannes Film Festival in May 2013. Directed by director Abdellatif Kechiche and starring Lea Seydoux and Adele Exarchopoulos, the film generated both wide praise and controversy. It will be released in the US through Sundance Selects/IFC Films. Julie Maroh is an author and illustrator originally from northern France. "Julie Maroh, who was just 19 when she started the comic, manages to convey the excitement, terror, and obsession of young love—and to show how wildly teenagers swing from one extreme emotion to the next ... Ultimately, Blue Is the Warmest Color is a sad story about loss and heartbreak, but while Emma and Clementine's love lasts, it's exhilarating and sustaining." —Slate.com "A beautiful, moving graphic novel." —Wall Street Journal "Blue Is the Warmest Color captures the entire life of a relationship in affecting and honest style." —Comics Worth Reading "Delicate linework conveys wordless longing in this graphic novel about a lesbian relationship." —New York Times Book Review (Editor's Choice) "A tragic yet beautifully wrought graphic novel." —Salon.com "Love is a beautiful punishment in Maroh's paean to confusion, passion, and discovery ... An elegantly impassioned love story." —Publishers Weekly (STARRED REVIEW) "A lovely and wholehearted coming-out story ... the illustrations are infused with genuine, raw feeling. Wide-eyed Clementine wears every emotion on her sleeve, and teens will understand her journey perfectly." —Kirkus Reviews "The electric emotions of falling in love and the difficult process of self-acceptance will resonate with all readers ... Maroh's use of color is deliberate enough to be eye-catching in a world of grey tones, with Emma's bright blue hair capturing Clementine's imagination, but is used sparingly enough that it supports and blends naturally with the story." —Library Journal (STARRED REVIEW) "It's not just the French who have a better handle on sexy material than Americans -- Canadians do, too ... Who's publishing it? Not an American publishing house but by Arsenal Pulp Press, a Canadian independent." —Los Angeles Times Pulitzer Prize winner and New York Times bestseller: A "lush, tipsy, all-night mambo of a novel about Cuban musicians in strange places like New York City" (People). Brothers Nestor and Cesar Camillo arrive from Cuba in 1949 with dreams of becoming famous mambo musicians. This memorable novel traces the arc of the two brothers' lives—one charismatic and macho, the other soulful and sensitive—from Havana to New York, from East Coast clubs and dance halls to the heights of musical fame. The basis for a popular film, The Mambo Kings Play Songs of Love "tells of the triumphs and tragedies that befall two men blessed with gigantic appetites and profoundly melancholic hearts. . . . Hijuelos has depicted a world as enchanting as that in Garcia Marquez's Love in the Time of Cholera" (Publishers Weekly). "Rich and provocative . . . a moving portrait of a man, his family, a community and a time." —Michiko Kakutani, The New York Times

LEARN THE TRUE STORY OF ONE OF THE FBI PROFILERS WHO COINED THE PHRASE "SERIAL KILLER" Face-to-face with some of America's most terrifying killers, FBI veteran Robert K. Ressler learned how to identify the unknown monsters who walk among us -- and put them behind bars. In *Whoever Fights Monsters*, Ressler—the inspiration for the character Agent Bill Tench in David Fincher's hit TV show *Mindhunter*—shows how he was able to track down some of the country's most brutal murderers. Ressler, the FBI Agent and ex-Army CID colonel who advised Thomas Harris on *The Silence of the Lambs*, used the evidence at a crime scene to put together a psychological profile of the killers. From the victims they choose to the way they kill to the often grotesque souvenirs they take with them—Ressler unlocks the identities of these vicious killers. And with his discovery that serial killers share certain violent behaviors, Ressler goes behind prison walls to hear bizarre first-hand stories from countless convicted murderers, including Ted Bundy, John Wayne Gacy; Edmund Kemper; and Son of Sam. Getting inside the mind of a killer to understand how and why he kills is one of the FBI's most effective ways of helping police bring in killers who are still at large. Join Ressler as he takes you on the hunt for the world's most dangerous psychopaths in this terrifying journey you will not forget.

Christ versus Arizona turns on the events in 1881 that surrounded the shootout at the OK Corral, where Wyatt Earp, Doc Holliday, and Virgil and Morgan Earp fought the Clantons and the McLaurys. Set against a backdrop of an Arizona influenced by the Mexican Revolution and the westward expansion of the United States, the story is a bravura performance by the 1989 Nobel Prize-winning author. A monologue by the nave, unreliable, and uneducated Wendell L. Espana, the book weaves together hundreds of characters and a torrent of interconnected anecdotes, some true, some fabricated. Wendell's story is a document of the vast array of ills that welcomed the dawning of the twentieth century, ills that continue to shape our world in the new

millennium. "Cela prefers the weird, the apparently meaningless and the amorphous. The world of his novels has been likened to that of Hieronymus Bosch and Brueghel; he sees man as a prisoner in a forbidding universe where chaos and imperfection always defeat the idealist." Paul West "Cela is a restless spirit. In him is united a marked fondness for experiment with a provocative attitude. At the same time he can be included in an old Spanish tradition of hilarious grotesqueness which is often the other side of despair. Compassion for man's hopeless suffering is there, but tightly controlled." 1989 Nobel prize for Literature Press Release "One of the most gifted and powerful writers in contemporary Europe." The study of native language influence in Second Language Acquisition has undergone significant changes over the past few decades. This book, which includes 12 chapters by distinguished researchers in the field of second language acquisition, traces the conceptual history of language transfer from its early role within a Contrastive Analysis framework to its current position within Universal Grammar. The introduction presents a continuum of thought starting from the late 70s, a time in which major rethinking in the field regarding the concept of language transfer was beginning to take place, and continuing through the present day in which language transfer is integrated within current concepts and theoretical models. The afterword unites the issues discussed and allows the reader to place these issues in the context of future research. For the present book, the 1983 edition has been thoroughly revised, and some papers have been replaced and added.

This study synthesizes current information from the various fields of cognitive science in support of a new and exciting theory of mind. Most psychologists study horizontal processes like memory and information flow; Fodor postulates a vertical and modular psychological organization underlying biologically coherent behaviors. This view of mental architecture is consistent with the historical tradition of faculty psychology while integrating a computational approach to mental processes. One of the most notable aspects of Fodor's work is that it articulates features not only of speculative cognitive architectures but also of current research in artificial intelligence.

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the care of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but

enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Expressionism and Film, originally published in German in 1926, is not only a classic of film history, but also an important work from the early phase of modern media history. Written with analytical brilliance and historical vision by a well-known contemporary of the expressionist movement, it captures Expressionism at the time of its impending conclusion—as an intersection of world view, resoluteness of form, and medial transition. Though one of the most frequently-cited works of Weimar culture, Kurtz's groundbreaking work, which is on a par with Siegfried Kracauer's From Caligari to Hitler and Lotte Eisner's The Haunted Screen, has never been published in English. Its relevance and historical contexts are analyzed in a concise afterword by the Swiss scholars Christian Kiening and Ulrich Johannes Beil.

Connecting Europe, Asia, and Africa, the Mediterranean Sea has been for millennia the place where religions, economies, and political systems met, clashed, influenced and absorbed one another. In this brilliant and expansive book, David Abulafia offers a fresh perspective by focusing on the sea itself: its practical importance for transport and sustenance; its dynamic role in the rise and fall of empires; and the remarkable cast of characters-sailors, merchants, migrants, pirates, pilgrims-who have crossed and re-crossed it. Ranging from prehistory to the 21st century, The Great Sea is above all a history of human interaction. Interweaving major political and naval developments with the ebb and flow of trade, Abulafia explores how commercial competition in the Mediterranean created both rivalries and partnerships, with merchants acting as intermediaries between cultures, trading goods that were as exotic on one side of the

sea as they were commonplace on the other. He stresses the remarkable ability of Mediterranean cultures to uphold the civilizing ideal of *convivencia*, "living together." Now available in paperback, *The Great Sea* is the definitive account of perhaps the most vibrant theater of human interaction in history.

In *Redeemers*, acclaimed historian Enrique Krauze presents the major ideas that have formed the modern Latin American political mind during the late nineteenth and twentieth centuries—and looks closely at how these ideas were expressed in the lives of influential revolutionaries, thinkers, poets, and novelists. Here are the Cuban José Martí; the Argentines Che Guevara and Evita Perón; political thinkers like Mexico's José Vasconcelos; and the writers José Enrique Rodó, Mario Vargas Llosa, Octavio Paz, and Gabriel García Márquez. *Redeemers* also highlights Mexico's Samuel Ruiz and Subcomandante Marcos, as well as Venezuela's president Hugo Chávez, and their influence on contemporary Latin America. In his brilliant, deeply researched history, Enrique Krauze uses the range of these extraordinary lives to illuminate the struggle that has defined Latin American history: an ever-precarious balance between the ideal of democracy and the temptation of political messianism.

Otherness in Hispanic Culture Cambridge Scholars Publishing

This book addresses contemporary discourses on a wide variety of topics related to the ideological and epistemological changes of the 19th, 20th and 21st centuries, and the ways in which they have shaped the Spanish language and cultural manifestations in both Spain and Hispanic America. The majority of the chapters are concerned with 'otherness' in its various dimensions; the alien Other – foreign, immigrant, ethnically different, disempowered, female or minor – as well as the Other of different sexual orientation and/or ideology. Following Octavio Paz, otherness is expressed as the attempt to find the lost object of desire, the frustrating endeavour of the androgynous Plato wishing to embrace the other half of Zeus, who in his wrath, tore off from him. Otherness compels human beings to search for the complement from which they were severed. Thus a male joins a female, his other half, the only half that not only fills him but which allows him to return to the unity and reconciliation which is restored in its own perfection, formerly altered by divine will. As a result of this transformation, one can annul the distance that keeps us away from that which, not being our own, turns into a source of anguish. The clashing diversity of all things requires the human predisposition to accept that which is different. Such a predisposition is an expression of epistemological, ethical and political aperture. The disposition to co-exist with the different is imagined in the de-anthropocentricization of the bonds with all living realms. And otherness is, in some way, the reflection of sameness (*mismidad*). The other is closely related to the self, because the vision of the other implies a reflection about the self; it implies, consciously or not, a relationship with the self. These topics are addressed in this book from an interdisciplinary perspective, encompassing arts, humanities and social sciences.
