This book is devoted to the optimization of product design and manufacturing. It contains selected and carefully composed articles based on presentations given at the IDMME conference, held in Compiègne University of Technology, France, in 1998. The authors are all involved in cutting-edge research in their respective fields of specialization. The integration of manufacturing constraints and their optimization in the design process is becoming more and more widespread in the development of mechanical products or systems. There is a clear

industrial need for these kinds of methodologies. Important - but still unsolved - problems are related to the definition of design processes, the choice of optimal manufacturing processes, and their integration through coherent methodologies in adapted environments. The main topics addressed in this book are: analysis and optimization of mechanical parts and products (computational structural mechanics, optimum design of structures, finite element solvers, computer-aided geometry, modeling and synthesis of mechanisms); analysis and optimization for fabrication and manufacturing systems (modeling of forming processes, modeling for control and measurement, tolerancing and assembly in manufacturing, off-line programming and optimal parameters for machining, robotics, welding); methodological aspects of integrated design and manufacturing (new methodologies for design with constraints, communication tools, training applications, computer-aided manufacturing). Apart from giving a thorough theoretical background, a very important theme is the relation between research and industrial applications. The book is of interest for engineers, researchers and PhD students who are involved in the optimization of design and manufacturing processes.

Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within

the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

This handbook provides the latest thinking, methodologies and cases in the rapidly growing area of collaborative management research. What makes collaborative management research different is its emphasis on creating a close partnership between scholars and practitioners in the search for knowledge concerning organizations and complex systems. In the ideal situation, scholars and their managerial partners would work together to define the research focus, develop the methods to be used for data collection, participate equally in the analysis of data, and work together in the application and dissemination of knowledge. The handbook contains insightful reflections on the state of the art as well as detailed descriptions of the collaborative efforts of an international group of

leading edge academics and their practitioner counterparts. The applications of collaborative research methods included in this volume include those aimed at individual development, organizational development, regional development efforts and economic policy. The insights from the cases suggest that collaborative management research has been a highly effective means of getting at issues that other research methods and intervention techniques have failed to address. The rationale for conducting this highly engaging type of research is explored in the first section of the handbook, followed by sections that offer new methodologies, descriptive cases, views from those directly involved, and issues and enablers about the use of this approach in advancing knowledge and practice. The handbook does appeal to scholarly practitioners as well as practical scholars.

This book describes the important role played by communities in innovation processes and how organizations can benefit from it. A community brings together individuals who share a common passion for a given area of knowledge and can contribute to innovation at different levels: capitalization of good practices, problem solving, sharing of expertise, or development of new and creative ideas. The literature has progressively identified many variants of communities such as communities of practice, epistemic communities, communities of interest, virtual communities, etc. These forms of communities differ regarding the type of the specialized activities of knowledge on which they focus. As practitioners and academics increasingly emphasized the needs of collaborative approaches in innovation, they progressively challenged the traditional idea that innovation is mainly generated by hierarchical corporate departments and highlighted the active role that communities play in innovation processes. The aim of this book is to shed light, using multiple examples, on the proactive and fundamental role of communities in the new innovation practices of organizations.

'How I wish that you had invited me to that most attractive feast on the Ides of March!' Cicero lived through some of the most turbulent years in the history of Rome, and witnessed at first-hand the

overthrow of the republic and its replacement by a tyranny. His letters to friends and family are an astonishingly detailed record of daily life and politics in Rome. This selection, covering the years 68-43 BC, not merely documents in detail Cicero's career but simultaneously provides a month-by-month record of the final collapse of the Roman senatorial government. The letters provide from the inside a vivid picture of events from the high point of Cicero's consulship of 63, through the humiliation of his exile and subsequent subjection to the dynasts, to the assassination of Caesar in 44, and Cicero's brief hour of glory in leading senatorial resistance to the tyranny of Mark Antony. In P. G. Walsh's lively new translation, Cicero's correspondence once more brings alive the excitement and danger of ancient Rome. A behind-the-scenes view of the power struggles within the Vatican and "a look inside the byzantine halls of the institutional Catholic Church."—Publishers Weekly A journalist

who has long covered the Vatican, Marco Politi takes us deep inside the struggle roiling the Roman Curia and the Catholic Church worldwide, beginning with Benedict XVI, the pope who famously resigned in 2013, and intensifying with the unexpected election of Jorge Mario Bergoglio, archbishop of Buenos Aires, now known as Pope Francis. Politi's account balances the perspectives of Pope Francis's supporters, Benedict's sympathizers, and those disappointed members of the laity who feel alienated by the institution's secrecy, financial corruption, and refusal to modernize. Politi dramatically recounts the sexual scandals that have rocked the church and the accusations of money laundering and other financial misdeeds swirling around the Vatican and the Italian Catholic establishment, and how Pope Francis's attempts to address these crimes has been met with resistance from entrenched factions. He writes of the decline in church attendance and vocations to the priesthood as the church continues to prohibit divorced and remarried Catholics from receiving Communion. He visits European parishes where women perform the functions of missing male priests—and where the remaining parishioners would welcome the ordination of women, if the church would allow it. Pope Francis's emphasis on pastoral compassion for all who struggle with the burden of family life has also provoked the ire of traditionalists. He knows from experience what life is like for the poor in South America and elsewhere, and highlights the contrast between the vital, vibrant faith of these parishioners and the disillusionment of European Catholics. As Pope Francis and his supporters are locked in battle with the defenders of the traditional hard line and with ecclesiastical corruption, the future of Catholicism is at stake—and it is far from certain Francis will succeed in saving the institution from decline.

La création et le lancement de produits est une des questions fondamentales soulevées en marketing. Pourquoi innover ? Quels sont les risques à éviter, les stratégies à adopter, les tests et études à utiliser ? Comment évaluer la réussite commerciale et marketing des nouveaux produits ? Ce manuel propose d'aborder ces différentes problématiques de manière globale, en décrivant les concepts clés issus de la recherche et les différentes méthodologies utilisées par les entreprises, tant dans les secteurs de la grande consommation que dans les domaines industriels, des services ou celui des hautes technologies. Cette 3e édition, entièrement actualisée, propose de nouveaux exemples et cas d'entreprise et intègre les dernières nouveautés du domaine : objets connectés, design thinking, impression 3D, consommation collaborative, Big Data, crowdsourcing... ? The luxury market has transformed from its traditional conspicuous consumption model to a new

experiential luxury sensibility that is marked by a change in how consumers define luxury. In a global context, it is crucial to understand why consumers buy luxury, what they believe luxury is, and how their perception of luxury value impacts their buying behavior. This handbook aims to provide a holistic approach to luxury marketing with respect to the characteristics and the key challenges and opportunities of luxury brand management.

Therefore, the multifaceted contributions by authors from different parts of the world will offer both a research and management perspective of luxury marketing and deliver a concentrated body of knowledge with contributions from diverse elements. Do things such as performance indicators, valuation formulas, consumer tests, stock prices or financial contracts represent an external reality? Or do they rather constitute, in a performative fashion, what they refer to? The Provoked Economy tackles this question from a pragmatist angle, considering economic reality as a ceaselessly provoked reality. It takes the reader through a series of diverse empirical sites – from public administrations to stock exchanges, from investment banks to marketing facilities and business schools – in order to explore what can be seen from such a demanding standpoint. It demonstrates that descriptions of economic objects do actually produce economic objects and that the simulacrum of an economic act

is indeed a form of realization. It also shows that provoking economic reality means facing practical tests in which what ought to be economic or not is subject to elaboration and controversy. This book opens paths for empirical investigation in the social sciences, but also for the philosophical renewal of the critique of economic reality. It will be useful for students and scholars in social theory, sociology, anthropology, philosophy and economics.
