Trouble Boys is the first definitive, no-holds-barred biography of one of the last great bands of the twentieth century: The Replacements. With full participation from reclusive singer and chief songwriter Paul Westerberg, bassist Tommy Stinson, guitarist Slim Dunlap, and the family of late band co-founder Bob Stinson, author Bob Mehr is able to tell the real story of this highly influential group, capturing their chaotic, tragic journey from the basements of Minneapolis to rock legend. Drawing on years of research and access to the band's archives at Twin/Tone Records and Warner Bros. Mehr also discovers previously unrevealed details from those in the group's inner circle, including family, managers, musical friends and collaborators.

Dedicated to the preservation of all forms of off-road recreation in an environmentally responsible manner.

GOP 2.0 is both a book and a movement that unites people around a common view of civility and freedom. GOP 2.0 puts policy over politics. It aspires to make Americans great. It's about Geoff Duncan's "P.E.T. Project," reviving the party with conservative Policies, genuine Empathy, and a respectful Tone. "I'm not the

only conservative in America who wakes up wishing the past months were just a bad dream. I'm not the lone Republican who feels in my gut that our party is following the wrong path. And I'm not alone in believing there's a better way forward." As Lt. Governor of the State of Georgia, Geoff Duncan never expected to find himself in the national spotlight – or in the crosshairs of the President of the United States. Then the 2020 Election and its aftermath brought the nation's attention to Georgia. Amidst a hurricane of conspiracy and misinformation, Duncan spoke up for truth, conservative values, and the Republican Party he knows. Duncan had a front row seat as Georgia endured a long nightmare of fraud allegations, Presidential coercion, a dual runoff that flipped the U.S. Senate, and election reform that sparked national protests. He called for reason and principle even as Donald Trump viciously attacked him. He fought for "the silenced majority," current or former Republicans who yearn for a party that can reclaim lost ground and leave behind the politics of dishonesty, disorder, and division. GOP 2.0 is Geoff Duncan's vision, forged by his unexpected struggle for the party's future. In his words, "GOP 2.0 is not a new party – it's a better direction for our Republican Party." In this refreshing and reinvigorating new book, a leader who has been through the fire lays out a better way forward, one that lifts up reasoned ideas, expands the party, and positions the GOP to win

back the White House in 2024.

Principles and Practice of Interventional Pulmonology provides a comprehensive text covering all aspects of Interventional Pulmonology. Providing both pathophysiologic background as well as illustrated and clear instruction on how procedures ought to be performed, this text will be of great value to interventional pulmonologists, thoracic surgeons, surgical oncologists, and interventional radiologists.

In the early '90s, Big Tobacco was making a killing. There was no entity more powerful, and national tobacco-related deaths numbered in the hundreds of thousands each year. The economic loss from smoking-related illnesses was billions of dollars. And yet, Big Tobacco had never paid a nickel in court. Until one Southern, small-town lawyer figured out how Florida could sue Big Tobacco to reimburse the state for health care costs. The end result? Beyond the \$13 billion settlement, hundreds of thousands of American lives have been, and will continue to be, saved. Meet Fred Levin. Called by his own son "a philanthropist and a cockroach," Fred Levin is no ordinary attorney, and his remarkable story is far from squeaky clean. In *And Give Up Showbiz?*, New York Times bestselling author Josh Young works closely with Levin to give readers a glimpse into the extraordinary and entertaining life of the top trial lawyer who was a pioneer in establishing American personal injury law. Seen as an inspiring innovator by some and a flamboyant self-promoter by others, Levin has not only fought against Big Tobacco, he has won victories for women, African Americans, and workers everywhere. Levin's unprecedented legal career is just one aspect of his roller-coaster life story. From managing one of the world's greatest boxers to avoiding multiple disbarment attempts, and from becoming a chief in the country of Ghana to even being a person of interest

in two separate murder investigations, his story reads like a novel suitable for the silver screen. And Give Up Showbiz? is both shockingly candid and wildly funny.

Centring on South Africa's Hluhluwe-iMfolozi Park, this book synthesizes a century of insights from the ecology and conservation management of one of Africa's oldest protected wildlife areas. The park provides important lessons for conservation management, as it has maintained conservation values rivalling those of much larger parks sometimes through, and sometimes despite, strong management interventions, including the rescue of the white rhino from extinction. In addition, the book highlights the ecological science produced in the

park, much of which has become widely influential, including the megaherbivore concept, new functional approaches to understanding biomes, and new understandings about the role of consumers in shaping ecosystems. The volume is ideal for researchers and policymakers interested in the conservation of relatively small, isolated and protected areas.

Some European lands have been progressively alleviated of human pressures, particularly traditional agriculture in remote areas. This book proposes that this land abandonment can be seen as an opportunity to restore natural ecosystems via rewilding. We define rewilding as the passive management of ecological successions having in mind the long-term goal of restoring natural ecosystem processes. The book aims at introducing the concept of rewilding to scientists, students and practitioners. The first part presents the theory of rewilding in the European context. The second part of the book directly addresses the link between rewilding, biodiversity, and habitats. The third and last part is dedicated to practical aspects of the implementation of rewilding as a land management option. We believe that this book will both set the basis for future research on rewilding and help practitioners think about how rewilding can take place in areas under their management.

When Ohio governor John Kasich ran for president, his powerful message of

hope and togetherness struck a chord with American voters. In *Two Paths: America Divided or United*, he carries that message forward by reflecting on the tumultuous 2016 campaign, sharing his concerns for America and his hopes for our future, and sounding a clarion call to reason and purpose, humility and dignity, righteousness and calm. “The country never looked so grand and magnificent as it did from ten thousand feet,” he writes of his time on the campaign trail, “and it was always a thrilling, faith-affirming thing to look out our window and see the sun splashing across Bryce Canyon in Utah, or the lights of the New York skyline at night as we flew past the Statue of Liberty, or an open field in the heartland that ran as far as our eyes could see.... I’d look out and think what an honor it would be to lead this great nation, what a blessing.” To be sure, the full story of the 2016 Presidential race will be written over time, but to understand what it was to be on the front lines of one of the most divisive and corrosive campaign battlegrounds in history, readers won’t find a richer, more thoughtful firsthand account than this one—a frank, refreshing assessment of the American dynamic and a clear path we might follow toward a more promising tomorrow. As Governor Kasich reminds us in these pages, America is great because America is good—and because Americans have stayed true to who we are: one nation, under God, indivisible.

When Lawrence Anthony learned that the northern white rhino, living in the war-ravaged Congo, was on the very brink of extinction, he knew he had to act. If the world lost the sub-species, it would be the largest land mammal since the woolly mammoth to go extinct. In *The Last Rhinos*, Anthony recounts his attempts to save these remarkable animals. The demand for rhino horns in the Far East has turned poaching into a dangerous black market that threatens the lives of not just these rare beasts, but also the rangers who protect them. The northern white rhino's last refuge was in an area controlled by the infamous Lord's Resistance Army, one of the most vicious rebel groups in the world. In the face of unmoving government bureaucracy, Anthony made a perilous journey deep into the jungle to try to find and convince them to help save the rhino. An inspiring story of conservation in the face of brutal war and bureaucratic quagmires, *The Last Rhinos* will move animal lovers everywhere.

Jazz from Detroit explores the city's pivotal role in shaping the course of modern and contemporary jazz. With more than two dozen in-depth profiles of remarkable Detroit-bred musicians, complemented by a generous selection of photographs, Mark Stryker makes Detroit jazz come alive as he draws out significant connections between the players, eras, styles, and Detroit's distinctive history. Stryker's story starts in the 1940s and '50s, when the auto industry created a thriving black working and middle class in Detroit that supported a vibrant

nightlife, and exceptional public school music programs and mentors in the community like pianist Barry Harris transformed the city into a jazz juggernaut. This golden age nurtured many legendary musicians—Hank, Thad, and Elvin Jones, Gerald Wilson, Milt Jackson, Yusef Lateef, Donald Byrd, Tommy Flanagan, Kenny Burrell, Ron Carter, Joe Henderson, and others. As the city's fortunes change, Stryker turns his spotlight toward often overlooked but prescient musician-run cooperatives and self-determination groups of the 1960s and '70s, such as the Strata Corporation and Tribe. In more recent decades, the city's culture of mentorship, embodied by trumpeter and teacher Marcus Belgrave, ensured that Detroit continued to incubate world-class talent; Belgrave protégés like Geri Allen, Kenny Garrett, Robert Hurst, Regina Carter, Gerald Cleaver, and Karriem Riggins helped define contemporary jazz. The resilience of Detroit's jazz tradition provides a powerful symbol of the city's lasting cultural influence. Stryker's 21 years as an arts reporter and critic at the Detroit Free Press are evident in his vivid storytelling and insightful criticism. Jazz from Detroit will appeal to jazz aficionados, casual fans, and anyone interested in the vibrant and complex history of cultural life in Detroit. The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of

infection.

Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies, Ehren Helmut Pflugfelder turns specifically to automobility, a term used to describe the kinds of mobility afforded by autonomous, automobile-based movement technologies and their ramifications. Thus far, few studies in technical communication have explored the development of mobility technologies, the immense power that highly structured, environmentally significant systems have in the world, or the human-machine interactions that take place in such activities. Applying kinaesthetic rhetoric, a rhetoric that is sensitive to and developed from the mobile, material context of these technologies, Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day, open-source vehicle projects, and a large case study of an autonomous, electric pod car network that ultimately failed. Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us, often unconsciously, into regimes of movement and ways of experiencing the world. As Pflugfelder shows, mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks.
