Ripensare le politiche per la non autosufficienza. Liberare e qualificare il potenziale del neo-mutualismo E. Riva,2015

Il governo del sociale Stefania Ferraro,Emilio Gardini,2017-05-31 Il volume restituisce una riflessione su alcune dimensioni delle pratiche di amministrazione della sfera del “sociale”, in particolare quelle che investono in maniera più diretta e immediata la vita degli individui, con l’intenzione di decostruire alcuni regimi di verità sull’attuale “governo del sociale”. Nei singoli capitoli si analizzano le anomalie della “promozione di sé”, i cui presupposti si basano sull’esaltazione delle capacità e delle responsabilità del singolo; i paradossi e le retoriche che accompagnano le trasformazioni del “sistema sociale” e del “sistema lavoro” in Italia; le azioni di programmazione dello spazio pubblico in termini di impresa sociale; le discrepanze della politica di riorganizzazione delle risorse economiche in “fondi”; la relazione tra decomposizione del welfare e il ruolo delle cooperative sociali; il rapporto tra retoriche dell’innovazione e digital divide; le trasformazioni del modello sociale europeo. In ultimo, vengono presentati alcuni estratti di materiali relativi alle politiche giovanili a Napoli e a Salerno, e alle politiche territoriali nel salernitano.

The Future of Families to 2030 OECD,2011-12-22 This report explores likely future changes in family and household structures in OECD countries; identifies the main forces shaping the family landscape to 2030; discusses the longer-term challenges; and suggests policy options for managing the challenges.

Handbook on In-Work Poverty Henning Lohmann,Ive Marx,2018-01-26 There has been a rapid global expansion of academic and policy attention focusing on in-work poverty, acknowledging that across the world a large number of the poor are ‘working poor’. Taking a global and multi-disciplinary perspective, this Handbook provides a comprehensive overview of current research at the intersection between work and poverty.

From Columbus to ConAgra Alessandro Bonanno,1994 This examination of the role of agriculture and food in the new international division of labor argues that the globalized economy creates new winners and losers.

Combating Poverty in Local Welfare Systems Alexandru Panican,Håkan Johansson,2016-07-12 This book analyzes national anti-poverty measures at a local level via a set of unique and up-to-date empirical studies of minimum income

support schemes and activation measures in five European cities. In examining this 'local welfare system' approach, it investigates the role that civil society organizations play, and the governance arrangements that prevail in contacts between public and civil society actors in local anti-poverty strategies. The current financial and economic crisis has caused increasing levels of poverty and unemployment, and put national minimum income protection schemes under severe strain. Combating Poverty in Local Welfare Systems therefore represents a timely and important intervention in the political and scientific debates as to whether more 'local welfare' is the solution to the challenges facing European welfare states.

Trans Care Hil Malatino, 2020-09-01 A radical and necessary rethinking of trans care What does it mean for trans people to show up for one another, to care deeply for one another? How have failures of care shaped trans lives? What care practices have trans subjects and communities cultivated in the wake of widespread transphobia and systemic forms of trans exclusion? Trans Care is a critical intervention in how care labor and care ethics have been thought, arguing that dominant modes of conceiving and critiquing the politics and distribution of care entrench normative and cis-centric familial structures and gendered arrangements. A serious consideration of trans survival and flourishing requires a radical rethinking of how care operates. Forerunners is a thought-in-process series of breakthrough digital works. Written between fresh ideas and finished books, Forerunners draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in scholarship.

A History of Siena Mario Ascheri, Bradley Franco, 2019-08-08 A History of Siena provides a concise and up-to-date biography of the city, from its ancient and medieval development up to the present day, and makes Siena's history, culture, and traditions accessible to anyone studying or visiting the city. Well informed by archival research and recent scholarship on medieval Siena and the Italian city-states, this book places Siena's development in its larger context, both temporally and geographically. In the process, this book offers new interpretations of Siena's artistic, political, and economic development, highlighting in particular the role of pilgrimage, banking, and class conflict. The second half of the book provides an important analysis of the historical development of Siena's nobility, its unique system of neighborhood associations (contrade) and the race of the Palio, as well as an overview of the rise and fall of Siena's troubled bank, the Monte dei Paschi. This book is accessible to undergraduates and tourists, while also offering plenty of new insights for graduate students and scholars of all periods of Sienese history.

Social Policy in a Changing Europe Zsuzsa Ferge, Jon Eivind Kolberg, 1992

Geography and Revolution David N. Livingstone, Charles W. J. Withers, 2010-08-15 A term with myriad associations, revolution is commonly understood in its intellectual, historical, and sociopolitical contexts. Until now, almost no attention has been paid to revolution and questions of geography. Geography and Revolution examines the ways that place and space

matter in a variety of revolutionary situations. David N. Livingstone and Charles W. J. Withers assemble a set of essays that are themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions. Here, scientific revolutions—Copernican, Newtonian, and Darwinian—ordinarily thought of as placeless, are revealed to be rooted in specific sites and spaces. Technical revolutions—the advent of print, time-keeping, and photography—emerge as inventions that transformed the world's order without homogenizing it. Political revolutions—in France, England, Germany, and the United States—are notable for their debates on the nature of political institutions and national identity. Gathering insight from geographers, historians, and historians of science, *Geography and Revolution* is an invitation to take the where as seriously as the who and the when in examining the nature, shape, and location of revolutions.

Marketing Places Europe Philip Kotler, 1999 Aimed at tourism agencies, students of tourism and local government agencies, this book explains how to adopt a strategic marketing plan that will enable places to adapt and conquer the ever-evolving world marketplace.

Facing An Unequal World Raquel Sosa Elizaga, 2018-02-26 Raquel Sosa Elizaga has assembled an incredibly complete set of analyses of inequality written by a range of scholars about a wide range of issues. Incomparable essential reading. - Immanuel Wallerstein, Senior Research Scientist, Sociology, Yale University Over recent decades, living conditions in poorer countries have deteriorated, leaving us faced with the present phenomenon of global inequality. Arguably the biggest challenge of the 21st Century is the confrontation and eventual elimination of the processes of structural inequality that affect these millions of human beings today. *Facing an Unequal World* tackles and critically examines key issues and challenges for global sociology across these interrelated themes: The dimensions of inequality and the configurations of structural inequalities and structures of power Conceptions of justice in different historical and cultural traditions Conflicts on environmental justice and sustainable futures The social injuries of inequality, and overcoming inequalities Written by a selection of international key sociologists and academics, this is a valuable resource for undergraduate and postgraduate students, and researchers in sociology alike.

The Future of the Social Investment State Marius R. Busemeyer, Caroline de la Porte, Julian L. Garritzmann, Emmanuele Pavolini, 2020-04-02 Social investment is part of a strategy to modernize the European welfare states by focusing on human resource development throughout the life-course, while ensuring financial sustainability. The last decades have seen cost containment in areas such as pensions and health care, but also expansion in areas such as early childhood education, higher education and active labor market policies. This development is linked to a Social Investment (SI) approach, which should, ideally, promote a better reconciliation of work and family life, high levels of labor market productivity and strong economic growth, while also mitigating social inequality. However, institutionalization of policies that may mainly benefit the middle class has some unintended effects, such as perpetuating new inequalities and the creation of other Matthew effects. While

research on the rise of the social investment state as a new paradigm of social policy-making for European welfare states has grown significantly, there are still important gaps in the literature. The chapters in this book address the controversies around social investment related to inequalities, individual preferences and the politics of social investment. This volume is therefore organized around policies, politics and outcomes. The contributing authors bring together expert knowledge and different perspectives on SI from several disciplines, with original path-breaking empirical contributions, addressing some key questions that thus far are unanswered, related to Matthew effects, inequalities, ambiguities of social investment and institutional complementarities. Furthermore, it is the first volume that covers the core policy areas of social investment: childcare, education and labour market policies. The chapters in this book were originally published in a special issue of the Journal of European Public Policy.

The Immaterial André Gorz,2010 We live in a world where material products have increasingly become vehicles for intangible symbolic and aesthetic messages. A very sizeable marketing and advertising industry produces only images and symbols--the immaterial dimension that `sells' material commodities. The economic boom that accelerated in the 1990s and crashed so spectacularly in 2008 was based largely on immaterial consumption, as capitalism tried to overcome the crisis of the Fordist regime by throwing itself into the new, so-called knowledge economy. --

Getting Skills Right Organisation for Economic Co-operation and Development,2017 This report describes the construction of the database of skill needs indicators, i.e. the OECD Skills for Jobs Database, and presents initial results and analysis. It identifies the existing knowledge gaps concerning skills imbalances, providing the rationale for the development of the new skill needs and mismatch indicators. Moreover, it explains the methodology used to measure skills shortage, surplus and mismatch, and provides key results and insights from the data.

Re-Forming Capitalism Wolfgang Streeck,2010-03-04 Wolfgang Streeck has written extensively on comparative political economy and institutional theory. In this book he addresses some of the key issues in this field: the role of history in institutional analysis, the dynamics of slow institutional change, the limitations of rational design and economic-functionalist explanations of institutional stability, and the recurrent difficulties of restraining the effects of capitalism on social order. In the classification of the 'Varieties of Capitalism' school, Germany has always been taken as the chief exemplar of a 'European', coordinated market economy. Streeck explores to what extent Germany actually conforms to this description. His

argument is supported by original empirical research on wage-setting and wage structure, the organization of business and labor in business associations and trade unions, social policy, public finance, and corporate governance. From this evidence, *Bringing Capitalism Back In* traces the current liberalization of the postwar economy of democratic capitalism by means of an historically-grounded approach to institutional change. This is an important book in comparative political economy and key reading across the social sciences for academics, researchers, and advanced students of Political Economy, Sociology, comparative business systems.
