Project Management Patrick Harper-Smith,Simon Derry,2012-03-23 Effective managers now recognize that most operational activities aimed at achieving key team objectives can and should be considered projects and managed accordingly. Typically these projects will range from: complex operational tasks, one-off initiatives such as moving offices or installing a new IT system, to the development of new products and services. However, while many of the traditional project management principles still apply, most tools and techniques need to be adapted and simplified to make them relevant to modern businesses. For those that master these new skills, exciting career opportunities lie ahead that will accelerate functional managers into new areas.

*Building Procurement* Roy Morledge,Adrian J. Smith,Samuel Y. Appiah,2021-02-26 As an industrial process, construction is unique. The procurement processes used to achieve the successful completion of built assets requires a different approach to that adopted in most other industries, due to the design of buildings being bespoke and the sites being geographically varied. The procurement process is central to the success of any construction project and many of the problems which impact construction projects can be traced back to the procurement phase, so a good understanding of the methods of procurement, the development of a procurement strategy and the influence it has on project success is essential for all those working in the industry. Much has changed in the global construction industry since publication of the second edition of *Building Procurement*, for example the increase in debt burden of many major economies, widespread adoption of Building Information Modelling (BIM) Technology in the industry and the United Kingdom's exit from the European Union. This new edition has been rewritten to take account of these significant developments, but at its core it continues to provide a critical examination and review of current procurement practices in the UK, continental Europe (including EU procurement procedures), China, Middle East and Sub-Saharan Africa and the USA. It retains its original strong emphasis on the need for clients to establish achievable objectives which reflect the project business case and focuses on development of suitable strategies and management structures to meet those objectives in the current construction climate. *Building Procurement* will be essential reading for senior undergraduate and postgraduate students of construction management and practitioners working in all areas of construction management.

**Risk Management for Success** Norman Marks,2020-10-15 Traditional risk management programs focus on managing and mitigating harms - in other words, on avoiding failure. But survey after survey tell us this approach is not convincing executives and boards that risk management is helping them achieve their objectives. They see it as a compliance exercise: something they have to do rather than want to do. Norman Marks draws on his personal experience as an executive and builds on the thinking in his previous books, including World-Class Risk Management, Risk Management in Plain English, and Making Business Sense of Technology Risk, to explain how risk management should instead focus on achieving success. This book discusses how a consideration of what might happen can enable informed and intelligent decisions from the setting of objectives and corporate strategies through the daily execution of the business. Those decisions enable the appropriate taking of risk so that the organization has an acceptable likelihood of achieving its objectives. An assessment of risk management is recommended by a majority of corporate governance codes around the globe and required by the Standards of the Institute of Internal Auditors. The book includes a comprehensive maturity model that details the attributes of the highest level of maturity envisaged in this book, as well as management surveys that can be tailored for your organization. They can be used as the basis for an assessment by management, the risk officer, or the internal audit team.
