This seminal book challenges the common assumption that fascism is a misogynist movement which has tended to exclude women. Using examples from Germany, Italy and France, Durham analyses the rise of women in fascist organizations across Europe from the early twenties to the present. Unusually, however, the author focuses on British fascism and in doing so he offers valuable new perspectives on fascist attitudes to women. Offering interesting examples of women training in armed combat, and more generally as voters and members of fascist organizations, he highlights women's relationship to fascist policies on birth rate, abortion and eugenics.

'When Least Heat-Moon lost his job in a college in Missouri, he got a half-ton Ford van, packed a few necessities, including Leaves of Grass and Neihardt's Black Elk Speaks, and set out to follow the track of various ancestors and write a book about America. The book is called Blue Highways and it is a masterpiece ... Least Heat-Moon has a genius for finding people who have not even found themselves, exploring their lives, capturing their language, and recreating little (or big) worlds, or moments. In short, he makes America seem new, in a very special way, and its people new. Blue Highways is a magnificent and unique tour.'

Robert Penn Warren 'Least Heat-Moon is a witty, generous, sophisticated and democratic observer. His modesty, his subtle, kindly humour, and his uncanny gift for catching good people at good moments makes Blue Highways a joy to read.' Annie Dillard

“one of the best travel books [of the twentieth] century” (The Independent). When Graham Greene left Liverpool in 1935 for what was then an Africa unmarked by colonization, it was to leave the known transgressions of his own civilization behind for those unknown. First by cargo ship, then by train and truck through Sierra Leone, and finally on foot, Greene embarked on a dangerous and unpredictable 350-mile, four-week trek through Liberia with his cousin, and a handful of servants and bearers, into a world where few had ever seen a white man. For Greene, this odyssey became as much a trip into the primitive interiors of the writer himself as it was a physical journey into a land foreign to his experience. “No one who reads this book will question the value of Greene’s experiment, or emerge unshaken by the penetration, the richness, the integrity of this moving record.” —The Guardian

This A3 format atlas is available in two binding styles, softback, and spiral bound. Each page has been titled with its geographical location so you can turn to the page you need more easily. A classic of World War II literature, an incredibly revealing work that provides a near comprehensive account of the war and brings to life the legendary general and eventual president of the United States. Five-star General Dwight D. Eisenhower was arguably the single most important military figure of World War II. *Crusade in Europe* tells the complete story of the war as he planned and executed it. Through Eisenhower's eyes the enormous scope and drama of the war--strategy, battles, moments of great decision--become fully illuminated in all their fateful glory. Penned before his Presidency, this account is deeply human and helped propel him to the highest office. His personal record of the tense first hours after he had issued the order to attack leaves no doubt of his travails and reveals how this great leader handled the ultimate pressure. For historians, his memoir of this world historic period has become an indispensable record of the war and timeless classic.
