New Scientist magazine was launched in 1956 "for all those
men and women who are interested in scientific discovery,
and in its industrial, commercial and social consequences".
The brand's mission is no different today - for its consumers,
New Scientist reports, explores and interprets the results of
human endeavour set in the context of society and culture.
Much has been written about the care of research animals.
Yet little guidance has appeared on protecting the health and
safety of the people who care for or use these animals. This
book, an implementation handbook and companion to Guide
For the Care and Use of Laboratory Animals, identifies
principles for building a program and discusses the
accountability of institutional leaders, managers, and

employees for a program's success. It provides a detailed description of risks-- physical and chemical hazards, allergens and zoonoses, and hazards from experiments--which will serve as a continuing reference for the laboratory. The book offers specific recommendations for controlling risk through administrative procedures, facility design, engineering controls, and periodic evaluations. The volume focuses on the worker, with detailed discussions of work practices, the use of personal protective gear, and the development of an emergency response plan. This handbook will be invaluable to administrators, researchers, and employees in any animal research facility. It will also be of interest to personnel in zoos, animal shelters, and veterinary facilities.

Developers, designers and operators are increasingly needing to create versatile sport and leisure amenities that are of lasting value to local and wider communities. Placing facilities design and operation at the heart of sports development, this book adopts a holistic approach, integrating experience in the field with collective knowledge across many different uses and technologies. Extensive use of case studies from around the world makes this book a definitive reference for practitioners and students in sports and leisure, building design and facilities management.
