The abdominal wall has always been of interest to surgeon-anatomists. It was recognized as a barrier, and volumes have been written demonstrating how to breach this wall. Similarly, great importance has been placed on the methods of repairing the abdominal wall, whether that repair is necessitated by a primary operative wound, a congenital failure, an acquired defect, or the ubiquitous iatrogenic problem, the postoperative abdominal wall hernia. French surgeons have a long tradition of excellence in the field of human anatomy: the names of Pare, Bichat, Cloquet, and Fruchaud readily come to mind. It is not surprising then, that this comprehensive text on the subject of the abdominal wall and its defects emanates from France. Although there are many interesting aspects to this presentation of abdominal wall problems, I find the review of prosthetic material and its use to be most unique. The synthetic meshes available today may well revolutionize our various approaches for repair of hernial defects. Considerable experience has evolved in the use of these prosthetic materials, particularly in the United Kingdom and Europe. I have been a proponent of prosthetic mesh for the cure of recurrent groin hernia during the past decade. According to the results reported in this book, the use of a prosthetic material in selected patients needing primary hernia repair seems indicated. I would be remiss if the organization GREPA were not highlighted.

Provides convincing evidence that angels, demons, and fallen angels were flesh-and-blood members of a giant race predating humanity, spoken of in the Bible as the Nephilim. • Indicates that the earthly paradise of Eden was a realm in the mountains of Kurdistan. • By the author of Gateway to Atlantis. Our mythology describes how beings of great beauty and intelligence, who served as messengers of gods, fell from grace through pride. These angels, also known as Watchers, are spoken of in the Bible and other religious texts as lusting after human women, who lay with them and gave birth to giant offspring called the Nephilim. These religious sources also record how these beings revealed forbidden arts and sciences to humanity--transgressions that led to their destruction in the Great Flood. Andrew Collins reveals that these angels, demons, and fallen angels were flesh-and-blood members of a race predating our own. He offers evidence that they lived in Egypt (prior to the ancient Egyptians), where they built the Sphinx and other megalithic monuments, before leaving the region for what is now eastern Turkey following the cataclysms that accompanied the last Ice Age. Here they lived in isolation before gradually establishing contact with the developing human societies of the Mesopotamian plains below. Humanity regarded these angels--described as tall, white-haired beings with viperlike faces and burning eyes--as gods and their realm the paradise wherein grew the tree of knowledge. Andrew Collins demonstrates how the legends behind the fall of the Watchers echo the faded memory of actual historical events and that the legacy they have left humanity is one we can afford to ignore only at our own peril.

In a book that will profoundly alter the modern discourse on mind and influence the practice of neuromedicine, neurobiologist/neuropsychiatrist, Richard M. Pico unveils a revolutionary new approach to understanding consciousness that pinpoints its origins in the brain. Called "Biological Relativity," the approach combines the laws of physics—especially Einstein's laws of relativity—to the latest breakthroughs in neuroscience, molecular biology, and computational theory to create a coherent four-dimensional model for explaining the origins of life and the emergence of complex biological systems—from the living cell to the thinking brain. In a fascinating, ambitious narrative that draws upon a lifetime of experimental and clinical work, Dr. Pico tells a riveting story that begins in the imponderably distant past, with the first proto-cell that endured long enough to become its own frame of reference—both structurally and temporally—and culminates with the most complex biological referent system known to science, the human brain. He then elaborates his groundbreaking theory through discussions of such things as the origins of language, music, and mathematics. He explains why he believes consciousness is uniquely human, and explores the causes and potential treatments for a variety of thought disorders.

Radical, comprehensive vision of the kingdom of God in light of the new creation Twentieth-century Dutch missiologist and prolific author J. H. Bavinck was committed to confronting the world with the saving message of Christ. In this first English translation of the Dutch work published in 1946, Bavinck presents a cosmic kingdom vision and champions the coming of the kingdom of Christ as the basic message of the gospel. Bavinck eloquently challenges believers to live as kingdom people as he expresses a uniquely Reformed perspective on the eternal significance of our temporal world. His eschatological vision, which permeates the book, is now more relevant than ever as climate change, resource depletion, financial turmoil, and other issues increasingly threaten our world. With Bert Hielema's skillful translation capturing the beauty and power of Bavinck's original text, Between the Beginning and the End calls all Christians to consider anew the entire scope of the church and Christ's kingdom.

'The introductory account of Mr. Brunton's pony-back journey up the mountainside has real charm. One of his most interesting chapters gives a practical-minded consideration to the probable future of Tibet.' New York Times Paul Brunton was one of a very small number of his generation to travel in India and Tibet so extensively at a time when very few were doing so with such insight and discernment. His journalistic skills produced magnificent descriptions of the snowy peaks and high-desert landscapes of the Himalayan region, but it was the lessons he learned from the holy men he met on his journey that transformed him into one of the great interpreters of the East. In this magnificent spirituality classic, he explains that we all need 'oases of calm in a world of storm', no matter what era we are living in, and that to retreat from our everyday lives for a while is not weakness but strength. By taking the trouble to discover the deep silence within us we will find the benefits of being linked to an 'infinite power, an infinite wisdom, an infinite goodness'. *A Hermit In The Himalayas* is a fascinating blend of travel writing and profound spiritual experience. As we accompany the author on his journey through the vast Himalayas ranges towards Mount Kailas in Tibet, he also shows us an even more remarkable - and timeless - inner path which will help us cope with the ups and downs of our contemporary world.

Drawing from the spirit of the Gospels, Frankenstein, and the "ancient astronauts" theories of Erich von Däniken, *They Were Not Gods: A Space-Age Fair Tale* is ultimately about the human spirit in the most universal sense. It is a story of space travel connecting three living beings who felt many of the same feelings we feel, thought many of the same thoughts we think, and asked themselves many of the same questions we find ourselves asking. Paleface, a young woman from an outer space colony, left her family behind to become an explorer, hoping her efforts would benefit mankind. When everything started to go wrong, she began to question the direction she was taking in life. In a different part of the galaxy, Cros lived a very dull life exploring outer space, until the discovery of a gigantic time capsule sent him on an uncertain voyage into a dangerous new world. Knowing little of life beyond his home planet, Thundercloud often dreamed of traveling in space, but learned to be happy where he was. When his whole world changed, however, he found himself with difficult decisions to make as he watched various intelligent life forms cross paths and collide.

Introduction to Tantra Shastra by John Woodroffe. Originally the extended introduction to a translation of the Mahanirvana Tantra by "Arthur Avalon" (a collective pseudonym for Woodroffe and an unnamed collaborator), this is a sufficiently general treatment to repay reading apart from the work to which it was originally attached. While there are a few caveats, Woodroffe was the first Western writer to treat seriously and sympathetically of the Sakta Tantrik cults and their scriptures.

Did an Italian monk, out of a burning love of music, invent a time machine in this century -- a machine that would extend his senses Far back into time? According to Mr. Krassa, Father Alfredo Pellegrino Ernetti, born in 1926 and who died mysteriously in 1996, developed the apparatus over a period of 40 years. The important lectures in this volume were given by Rudolf Steiner in Dornach, Switzerland, to leading educators, including many from England. As a result, he was invited to Oxford, England, to expand on some of the themes presented in these lectures. Steiner begins by placing Anthroposophy as the foundation for understanding the principles behind Waldorf education. In the talks that follow, he describes an education based on the human being as a continually developing being of body, soul, and spirit. Out of this perspective, Waldorf education depends on the teacher's ability to observe and respond to each stage of a child's development. Steiner shows how Waldorf education emphasizes the efficient use of children's inner energies, and how children can be nurtured through their natural stages of development by giving them just what they need at the right time - an approach that he refers to in these talks as "soul economy." The topics on education include: health and illness, children from before the seventh year through adolescence, physical education, esthetic education, and religious and moral education. These detailed and accessible lectures give parents and teachers the keys to a much-needed renewal of education for our children and their future.

The Essence of Jung's Psychology and Tibetan Buddhism cuts to the heart of two very different yet remarkably similar traditions. The author touches on many of their major ideas: the collective unconscious and karma, archetypes and deities, the analyst and the spiritual friend, and mandalas. Within Tibetan Buddhism she focuses on tantra and relates its emphasis on spiritual transformation, also a major concern of Jung. This expanded edition includes new material on the integration of the two traditions, and the importance of these paths of the heart in today's unsteady world.
