Jane Austen comes to modern-day Los Angeles in Claire LaZebnik's imaginative take on *Persuasion*, where seventeen-year-old Anna Eliot finds out whether there's such a thing as a second chance when it comes to first love. Fans of Polly Shulman, Maureen Johnson, Elizabeth Eulberg, Stephanie Perkins, and, of course, Jane Austen will love this irresistibly funny and romantic contemporary tale. Anna is tired of worrying about what other people think. After all, that was how she lost the only guy she ever really liked, Finn Westbrook. Now, three years after she broke his heart, the one who got away is back in her life—and he wants nothing to do with her. Anna keeps trying to persuade herself that she doesn't care about Finn either, but even though they've both changed since they first met, deep down she knows he's the guy for her. Now if only she can get him to believe that, too . . .

One hundred years ago, most of the medical treatments and technologies that we take for granted hadn't even been imagined or were found in the pages of science fiction novels rather than medical journals. Today, on the other hand, medical research often sounds like science fiction. This eBook, *Tomorrow's Medicine*, looks at some of the more fascinating areas where technology that could transform health is being developed, including cybernetics, regenerative medicine, nanotechnology and genetically tailored treatments. Although many of these advances may not be ready to treat humans for many years, some of them may someday profoundly change—and extend—our lives. In "Bionic Connections," for example, D. Kacy Cullen and Douglas Smith discuss synthetic limbs that function as well (or better) than our own. Echoes of the 1966 film *Fantastic Voyage* abound in "Nanomedicine Targets Cancer" by

James Heath, Mark Davis and Leroy Hood, who examine how miniaturized tools can both measure the molecular interactions of disease and deliver targeted therapies. Several articles discuss different approaches for regeneration, including "Grow Your Own Eye," in which author Yoshiki Sasai illustrates how his lab successfully grew a retina from stem cells to "A Sweet Solution for Replacing Organs," in which Katherine Harmon describes how a speaker at a recent TED talk used a 3-D printer to create a kidney. A century from now, will the sight of an amputee be a rarity, with cybernetic limbs controlled by thought and nearly indistinguishable from the biological ones? Perhaps most people will have their genomes read for indications of future disease and take steps to prevent it – or even to cure inherited disorders. Will we replace some drugs with tiny machines, fanning out inside the body to repair damage? As exciting as these possibilities are to extend both the length and quality of life, immortality – or at least agelessness – may be forever out of our reach. As Thomas Kirkwood notes in his piece, "Why Can't We Live Forever?" death might be the price we pay for our complex biology. Even so, the doctors of a century past would surely be impressed by what medical science has accomplished in the past hundred years: antibiotics, organ transplants and the elimination of smallpox, to name but a few. The next century should be equally impressive, and with the various types of new technologies on the horizon, many of us have a good chance of seeing it happen.

In 1973, graffiti ran rampant in NYC, reaching its peak that summer. The work of black writers

from the Bronx like SUPER COOL 223, RIFF 70 (WORM/CASH), and PHASE 2 defined the art which the kids called Top-to- Bottom or T-to-B, as it vertically covered a full subway car. Some T-to-B pieces were so elaborate and complex that the NYT hypothesized that they were a collaboration between professional artists and the graffiti writers. Here are photos from that heady era.

Marvin Muddle is the bumbling, indecisive CEO of the company that bears his surname. The future of the Muddle Corporation is very much in doubt despite the fact that it once was a world leader in the manufacture of a certain hi-tech product. While Marvin and his Management Review Committee search for a "cheap, quick, and easy" solution to problems that have resulted from decades of rotten decisions, the firm's performance - and employee morale - sink

ever lower. At the moment, Marvin Muddle's proposed solution is that of cost-cutting, outsourcing to overseas facilities, crafting a new mission statement, and - in particular - the development of a new logo. The perky and persuasive Sally Swindel, a management consultant, claims to have the answer: the implementation of the latest, greatest management fad. All it will take, Sally promises, is the presentation of a weeklong short course, a long-term consulting contract, and the purchase of copies of her firm's most recent management best seller. That book is the latest in a long list of her firm's previous best sellers, including those dedicated to reengineering, one-minute management, total quality control, quality circles, management by objectives, management by walking around, management by positive thinking, management by the Ouija board, management practices of Hannibal Lecter, management via blind faith, management by intimidation, theories A through Z, and a host of other celebrated concepts. This might be amusing if it weren't for the fact that there is, in this nation, far too many "Muddle-like" firms, and far too much Muddled Management. As a consequence, the leading role the U.S. once held in such areas as space exploration, military weapon systems and - in particular - high tech manufacturing, is in serious decline. As just one example, the Intel Corporation is now the sole remaining U.S. company capable of the fabrication of high-density, high-performance computer chips - a technology that was invented in this nation. As our nation's capability to produce these computer chips and a host of other high technology products diminishes, so does the likelihood that it will have the means to prosper and survive in the new economy of the 21st century: The Digital Economy. On the factory floors of Muddle, Incorporated, we follow the trials and tribulations of a handful of Muddle's employees and their desperate attempts to convince top management of the need to recognize and overcome the

three obstacles to the achievement of any non-trivial goal; i.e., the hurdles imposed by Unnecessary Complexity, Excessive Variability, and - in particular - a massive reservoir of Intellectual Myopia. Until those three obstacles are surmounted, or at the very least mitigated, there is no manufacturing management fad or motivational speech that will provide the Muddle Corporation with any significant or, in particular, sustainable improvement in the performance of their factories.

(Book). Directly from the Mission District in San Francisco, the explosive fusion of Latin, salsa and rock is chronicled from a writer who has followed the music and the musicians for over 30 years. The book covers the stories of prominent Latin rock bands including Santana and Malo, examining in detail the pioneering records and the ways in which both reflect a wide spectrum of Latin influences. It highlights the cast of characters and emerging period in the US during the late '60s, with all the cultural background events including the Summer of Love, Woodstock, political activism, and the record label expansion. Legendary figures such as Bill Graham, Clive Davis and the Escovedos family play crucial roles in the development of this sound. As Latin music continues to become more mainstream, the interest in its musical roots grows. This book sheds light on these musical pioneers, and is gorgeously illustrated with over 800 B&W photos by Jim Marshall, Rudy Rodriguez, Joan Chase and others, plus artwork of dozens of rare album covers.

Do you remember these great pop stars and their hits? Deerhoof's The Man, The King, The Girl Butch Hancock's West Texas Waltzes and Dust Blown Tractor Tunes, Swamp Dogg's Cuffed, Collared and Tagged, Michael Head's The Magical World Of The Strands, John Trubee's The Communists Are Coming to Kill Us, John Phillips's Wolf King of L.A., and Michel Magne's Moshe Mouse Crucifixion? You will when you read *Lost in the Grooves*, a fascinating guide to the back alleys off the pop music superhighway. Pop music history is full of little-known musicians, whose work stands defiantly alone, too quirky, distinctive, or demented to appeal to a mass audience. This book explores the nooks and crannies of the pop music world, unearthing lost gems from should-have-been major artists (Sugarpie DeSanto, Judee Sill), revisiting lesser known works by established icons (Marvin Gaye's post-divorce kissoff album, *Here My Dear*; The Ramones' *Subterranean Jungle*), and spotlighting musicians who simply don't fit into neat categories (k. mccarty, Exuma). The book's encyclopedic alphabetical structure throws off strange sparks as disparate genres and eras rub against each other: folk-psych iconoclasts face louche pop crooners; outsider artists set their odd masterpieces down next to obscurities from the stars; lo-fi garage rock cuddles up with the French avant-garde; and roots rock weirdoes trip over bubblegum. This book will delight any jukebox junkie or pop culture fan.

The Secwepemc (Shuswap) people of the Plateau of northwestern North America developed and practice(d) intricate relationships with plants that reflect the biodiversity of their environment and thousands of years of experience of living in Secwepemcúlecw, their homeland. This collection of essays derives from more than twenty years of collaborative research on ethnobotany and ethnoecology with Secwepemc plant specialists and elders. It begins with an in-depth introduction to botanical and indigenous perspectives on Secwepemc plants, environment and landscape, and then goes on to address such diverse topics as archaeobotany, plant resource management and stewardship, edible root vegetables and edible lichen harvesting and processing, the role of cultural knowledge in understanding Secwepemc medicines, and the nutritional qualities of edible plants. Additional chapters speak to the fascinating ways in which plant and environmental knowledge is articulated on oral narratives, and how Secwepemc Traditional Ecological Knowledge and Wisdom is constituted. In light of the escalating nature of environmental degradation in Secwepemcúlecw, the volume addresses the crucial relevance, now and in the future, of Secwepemc TEKW and environmental stewardship.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective, to clarifying the principle meanings attributed to the constitution. The study goes on to analyse

some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology of politics and comparative public law.

The odyssey of a group of “refugees” from a closed-down online game and an exploration of emergent fan cultures in virtual worlds. Play communities existed long before massively multiplayer online games; they have ranged from bridge clubs to sports leagues, from tabletop role-playing games to Civil War reenactments. With the emergence of digital networks, however, new varieties of

adult play communities have appeared, most notably within online games and virtual worlds. Players in these networked worlds sometimes develop a sense of community that transcends the game itself. In *Communities of Play*, game researcher and designer Celia Pearce explores emergent fan cultures in networked digital worlds—actions by players that do not coincide with the intentions of the game's designers. Pearce looks in particular at the Uru Diaspora—a group of players whose game, *Uru: Ages Beyond Myst*, closed. These players (primarily baby boomers) immigrated into other worlds, self-identifying as “refugees”; relocated in *There.com*, they created a hybrid culture integrating aspects of their old world. Ostracized at first, they became community leaders. Pearce analyzes the properties of virtual worlds and looks at the ways design affects emergent behavior. She discusses the methodologies for studying online games, including a personal account of the sometimes messy process of ethnography. Pearce considers the “play turn” in culture and the advent of a participatory global playground enabled by networked digital games every bit as communal as the global village Marshall McLuhan saw united by television. Countering the ludological definition of play as unproductive and pointing to the long history of pre-digital play practices, Pearce argues that play can be a prelude to creativity.

NOW THE ACCLAIMED HBO SERIES GAME OF THRONES—THE MASTERPIECE THAT BECAME A CULTURAL PHENOMENON Winter is coming. Such is the stern motto of House Stark, the northernmost of the fiefdoms that owe allegiance to King Robert Baratheon in far-off King's Landing. There Eddard Stark of Winterfell rules in Robert's name. There his family dwells in peace and comfort: his proud wife, Catelyn; his sons Robb, Brandon, and Rickon; his daughters Sansa and Arya; and his bastard son, Jon Snow. Far to the north, behind the towering Wall, lie savage Wildings and worse—unnatural things relegated to myth during the centuries-long summer, but proving all too real and all too deadly in the turning of the season. Yet a more immediate threat lurks to the south, where Jon Arryn, the Hand of the King, has died under mysterious circumstances. Now Robert is riding north to Winterfell, bringing his queen, the lovely but cold Cersei, his son, the cruel, vainglorious Prince Joffrey, and the queen's brothers Jaime and Tyrion of the powerful and wealthy House Lannister—the first a swordsman without equal, the second a dwarf whose stunted stature belies a brilliant mind. All are heading for Winterfell and a fateful encounter that will change the course of kingdoms.

It is a complex time to be a parent. Our climate is in crisis, and economic inequality is deepening. Racialized violence is spreading, and school shootings are escalating. How do we, as parents, cultivate in our children a love of the earth, a cry for justice, and a commitment to nonviolence? Where do we place our bodies so we teach our kids that resistance is crucial and change is possible? What practices do we hold as a family to encourage them to work with their hands, honor their hearts, and nurture their spirits? The Sandbox Revolution calls upon our collective wisdom to wrestle with the questions, navigate the challenges, offer concrete practices, and remind parents of the sacredness of the work. Written by parents who are also writers, pastors, teachers, organizers, artists, gardeners, and activists, this anthology offers a diversity of voices and experiences on topics that include education, money, anti-racism, resistance, spirituality, disability justice, and earth care.

La producción intelectual de la CEPAL en sus 70 años de existencia ha sido vasta en distintos ámbitos del desarrollo. En este libro se analizan y contextualizan los principales hitos e ideas del pensamiento económico de la CEPAL sobre recursos naturales, medio ambiente y sostenibilidad, organizados en las dos grandes etapas que han caracterizado la vida institucional: la estructuralista (1948-1990) y la neoestructuralista (de 1990 en adelante). A partir de una revisión sistemática de la literatura, se destacan ideas como el vínculo entre la especialización productiva en recursos naturales y los términos de intercambio desfavorables,

formulada en los años cincuenta; la soberanía sobre los recursos naturales, en los sesenta; la enunciación temprana del principio de responsabilidades comunes pero diferenciadas, en los setenta; los estilos de desarrollo y medio ambiente, en los ochenta; la competitividad espuria, en los noventa, y la gobernanza de los recursos naturales, el estilo de desarrollo sostenible con igualdad y el gran impulso ambiental, en las dos primeras décadas del siglo XXI. El pensamiento neoestructuralista de la CEPAL es dinámico, abierto y se renueva permanentemente sin perder su tradición estructuralista. El libro aporta también elementos conceptuales para formular un neoestructuralismo ecológico.
