In turn heartbreaking, irreverent, moving—and at times raucously humorous—one of the nation's leading pediatric researchers recounts his first years as a newly minted, struggling, and insecure doctor at Massachusetts General Hospital in Boston. A graduate of a state university medical school, Scott Rivkees was

competing with elite students from some of the most prestigious schools in the country. Nervous and uncertain, he worked unholy hours with patients ranging from indigent street people to celebrity guests drawn to the reputation and care offered by Mass General. Along the way he learned what medical school textbooks don't teach: how to deal with immense pressure, exhaustion, unruly patients, mysterious conditions, the joy of saving a life, and the wrenching suddenness of losing a patient, more often than not a young child. His resident education did not prevent him from losing his sense of irony and humor as he recounts bleary nights on the town, the allure of young nurses, substandard housing, and the value of pricking an inflated ego.

Renowned theologian and philosopher of religion John Hick takes a hard look at intellectual problems facing Christians in the late twentieth century: Where exactly does Christianity fit into the scheme of the world in light of other world religions? and Is it possible to remain Christian while accepting the truth of other beliefs? Employing the use of a dialogue between "Phil" (philosophy) and "Grace" (theology), Hick explores the validity of other religions and Christianity's place among them. Offering good reasons for why the traditional stance that

Christianity is the only true religion is no longer workable, he puts forth a cogent defense of Christianity in the global context of other religions. This book is must reading for those concerned about the uniqueness of Christianity and how it is to be interpreted theologically in today's world.

When *The Essential 55* was published, Ron Clark became a tireless promoter, traveling the country to speak to large groups of teachers and fans. And when his Oprah appearance shot the book onto the New York Times bestseller list, he kept the heat on. We can expect the same tenacious commitment to promoting his follow-up book, *The Excellent 11*. *The Excellent 11* contains eleven sections, with each one focusing on a theme directly related to teaching and raising children. Ron Clark draws from his own experience to give advice, telling personal stories that demonstrate the significance of each theme within the learning environment--an environment that extends beyond the classroom and into the larger world. Using themes ranging from Adventure, Ingenuity, and Humor to Dedication, Creativity, and Love, Clark provides a road map for both parents and teachers who want to enrich their children's learning experiences.

"Once celebrated in the Western media as a shining example of a 'liberal' and 'tolerant' Islam, Indonesia since the end of the Soeharto regime (May 1998) has witnessed a variety of developments that bespeak a conservative turn in the country's Muslim politics. In this timely collection of original essays, Martin van Bruinessen, our most distinguished senior Western scholar of Indonesian Islam, and four leading Indonesian Muslim scholars explore and explain these developments. Each chapter examines recent trends from a strategic institutional

perch: the Council of Indonesian Muslim scholars, the reformist Muhammadiyah, South Sulawesi's Committee for the Implementation of Islamic Shari'a, and radical Islamism in Solo. With van Bruinessen's brilliantly synthetic introduction and conclusion, these essays shed a bright light on what Indonesian Muslim politics was and where it seems to be going. The analysis is complex and by no means uniformly dire. For readers interested in Indonesian Muslim politics, and for analysts interested in the dialectical interplay of progressive and conservative Islam, this book is fascinating and essential reading." -Robert Hefner, Director Institute on Culture, Religion, and World Affairs, Boston University

This is an up-to-date revision of the classic text first published in 1983. It includes a historical perspective on the growth of evaluation theory and practice and two comparative analyses of the various alternative perspectives on evaluation. It also includes articles representing the major schools of thought about evaluation written by the leaders who have developed these schools and models. The final section describes and discusses the Standards for Program Evaluation and the reformation of program evaluation.

Elaine B Johnson outlines the importance of integrating modern scientific discoveries into current education practices. *Contextual Teaching and Learning: What It Is and Why It's Here to Stay* stresses interdependence, differentiation, and self-organization as the principals that form CTL, as opposed to the dualism between thought and action that plagues traditional views on education. Elaine B Johnson illustrates the relationship between brain functions, memory retention, and teaching methods, and the significance of incorporating real life examples in lesson plans.

. Renewal of Life by Transmission. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word "control"

in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment.

This edition of this handbook updates and expands its review of the research, theory, issues and methodology that constitute the field of educational communications and technology. Organized into seven sectors, it profiles and integrates the following elements of this rapidly changing field.

What role does narrative play in building teachers' knowledge? In this timely volume, foremost scholars in the field of education not only open, but they deepen the conversation about the uses of narrative in the construction of teachers' knowledge.

?Akhlaq mulia Muhammadlah, dan bukannya pedang, yang menyebabkan umat Muslim berjaya dan mampu menyingkirkan segala penghalang. Ketika menamatkan biografi Muhammad, saya sedih karena tak ada lagi yang bisa saya baca tentang kehidupan nan agung itu.? (Mahatma Gandhi). A Future Perfect is the first comprehensive examination of the most important revolution of our time—globalization—and how it will continue to change our lives. Do businesses benefit from going global? Are we creating winner-take-all societies? Will globalization seal the triumph of junk culture? What will happen to individual careers? Gathering evidence worldwide, from the shantytowns of São Paulo to the boardrooms of General Electric, from the troubled Russia-Estonia border to the booming San Fernando Valley sex industry, John Micklethwait and Adrian Wooldridge deliver an illuminating tour of the global economy and a fascinating assessment of its potential impact.

The ability to conceptualize an economic problem verbally, to formulate it as a mathematical model, and then represent the mathematics in software so that the model can be solved on a computer is a crucial skill for economists. Computational Economics contains well-known models--and some brand-new ones--designed to help students move from verbal to

mathematical to computational representations in economic modeling. The authors' focus, however, is not just on solving the models, but also on developing the ability to modify them to reflect one's interest and point of view. The result is a book that enables students to be creative in developing models that are relevant to the economic problems of their times. Unlike other computational economics textbooks, this book is organized around economic topics, among them macroeconomics, microeconomics, and finance. The authors employ various software systems--including MATLAB, Mathematica, GAMS, the nonlinear programming solver in Excel, and the database systems in Access--to enable students to use the most advantageous system. The book progresses from relatively simple models to more complex ones, and includes appendices on the ins and outs of running each program. The book is intended for use by advanced undergraduates and professional economists and even, as a first exposure to computational economics, by graduate students. Organized by economic topics Progresses from simple to more complex models Includes instructions on numerous software systems Encourages customization and creativity
