As artists, we are continuously seeking inspiration for our art. However, often, we exaggerate and overcomplicate our quest. As a result, we get stuck in our work and forget the reason why we make art in the first place. Unconsciously, we influence our art by the search for meaning: What is the future? What is perfection? What do design & art mean? Who is the designer or artist? Why are art, design & life connected? We should be cautious about these philosophical issues since they instigate our struggle to make art. They try to undermine our creativity and aim to limit our potential. But all it takes is a different perspective on the answers to these questions. Therefore, in this book, Dani Foroux redefines old definitions of paramount concepts and explains their relationship with your art- it illustrates the simplicity of creating meaningful art and is a reminder of why you make art in the first place. Futurist in the Present is both a guide and biography by Dani Foroux for anyone who wants to elevate their art. Initially, it was intended as a booklet to an exclusively released shoe, The SOFIA, a silhouette inspired by his mother. The design and story of the footwear differ tremendously from the notion of traditional footwear, which placed the young designer in an intricate process. Thus, Dani felt an urge to explain the design and its complex and extensive development process. An important reason for the intricate process was crafting the shoes not as a product, but as art; the creation of art has an entirely different foundation than product

development. But soon Dani's desire to explain the design narrative manifested in a full book of unique philosophy on design, art, and life. He applied the concepts in the book to his work and life and experienced their positive effects in both areas. Therefore, for the first time, Dani is sharing them with others to help elevate art in general; Dani believes that art is a road that we all share. Ultimately, as an artist, Dani has written this book to stimulate fellow artists to kick-start their art. Because one is not born an artist; one chooses to become an artist. His stories instruct and entertain, bringing the past of Indian Railways alive in the present. Did you know that India's first steam engine never ran on tracks and was actually used to run driving mills in a factory? That the maximum speed of the first commercial train in India was 4.5 miles/hour?
