

Rural Sociology An Introduction 1st Edition Tikicatgrill

This collection of original chapters, written by prominent social scientists, elucidates the theory and practice of contemporary rural sociology. The book applies lessons from the careers of sociologists and their field research endeavors, covering a wide range of topics: agricultural production, processing, and marketing; international food security and rural development; degradation of the bio-physical environment across borders; and the study of community, family, health, and many other issues in an increasingly globalized world. The authors' candid accounts provide insight into possibilities for enhancing opportunity and equality and serving basic human needs.

Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual

Henri Lefebvre's *Critical Theory of Space* offers a rigorous analysis and revival of Lefebvre's works and the context in which he produced them. Biagi traces the historical-critical time-frame of Lefebvre's intellectual investigations, bringing to light a theoretical constellation in which historical methods intersect with philosophical and sociological issues: from Marxist political philosophy to the birth of urban sociology; from rural studies to urban and everyday life studies in the context of capitalism. Examining Lefebvre's extended investigations into the urban sphere as well as highlighting his goal of developing a "general political theory of space" and of innovating Marxist thought, and clarifying the various (more or less accurate) meanings attributed to Lefebvre's concept of the "right to the city" (analysed in the context of the French and international sociological and philosophical-political debate), *Henri Lefebvre's Critical Theory of Space*

ultimately brings the contours of Lefebvre's innovative perspective—itsself developed at the end of the “short twentieth century”—back into view in all its richness and complexity.

When the Ottoman Empire collapsed following the First World War, the feudal system which had survived untouched in much of Anatolia began to change. Kemal Ataturk's task of building a nation 'from the people up' meant that the peasantry, by far Turkey's largest ethnographic group, became an important symbol of social cohesion. Here, Sinan Yildirmaz analyses the history of modern Turkey through the material culture of this peasantry - their speeches, social club documents, art and diaries - and reveals a rich social and political life which flowered after the Second World War. *Politics and the Peasantry in Post-War Turkey* is the first history to show how the changing peasantry laid the foundations for the modern Turkish state, and will be essential reading for students and scholars of the Ottoman Empire and of the History of Modern Turkey.

Foot and mouth disease and BSE have both had a devastating impact on rural society. Alongside these devastating developments, the rise of the organic food movement has helped to revitalize an already politicized rural population. From fox-hunting to farming, the vigour with which rural activities and living are defended overturns received notions of a

sleepy and complacent countryside. Over the years "rural life" has been defined, redefined and eventually fallen out of fashion as a sociological concept--in contrast to urban studies, which has flourished. This much-needed reappraisal calls for its reinterpretation in light of the profound changes affecting the countryside. First providing an overview of rural sociology, Hillyard goes on to offer contemporary case studies that clearly demonstrate the need for a reinvigorated rural sociology. Tackling a range of contentious issues--from fox-hunting to organic farming--this book offers a new model for rural sociology and reassesses its role in contemporary society.

Must rural Americans pay the price of urban progress and modern lifestyles? How will the increased pressures of the 1980s affect those who live and work in rural communities? In addressing these overriding questions the authors of this book take a serious look at such issues as who will operate our farms and how those farms will meet rising demands for food, how higher energy costs will change life in rural areas, the current and future needs of rural families and their communities, who in fact lives in these communities, and what can be done about escalating rural crime and recent social changes that have disrupted the traditional patterns of rural society. Because the United States is an interdependent system of rural and urban, of

providers and consumers, these issues are vitally important to all-scholars, policy makers, and citizens alike. The contributors bring us up to date on the contemporary rural scene and offer suggestions for research essential to intelligent decision making about the challenges and problems the 1980s hold in store for rural America.

This book will prove insightful to students and scholars interested in German literary, philosophical, and cultural studies."--BOOK JACKET.

Chippewa Lake is an idyllic waterfront community in north-central Michigan, popular with retirees and weekenders. The lake is surrounded by a rural farming community, but the area is facing a difficult transition as local demographics shift, and as it transforms from an agriculture-based economy to one that relies on wage labor. As farms have disappeared, local residents have employed a variety of strategies to adapt to a new economic structure. The community, meanwhile, has been indelibly affected by the advent of newcomers and retirees challenging the rural cultural values. An anthropologist with a background in sociology, Cindy L. Hull deftly weaves together oral accounts, historic documents, and participant surveys compiled from her nearly thirty years of living in the area to create a textured portrait of a community in flux.

The first of an eight-volume series, *The Literature of the Agricultural Sciences*, this book analyzes the trends in the published literature of agricultural economics and rural sociology during the past fifty years. It uses citation analysis and other bibliometric techniques to identify the primary journals, report series, and monographs of current importance to the developed industrial countries as well as those in the Third World.
