This paper addresses the issue of threshold effects between public debt and economic growth in the Caribbean. The main finding is that there exists a threshold debt to gross domestic product (GDP) ratio of 55–56 percent. Moreover, the debt dynamics begin changing well before this threshold is reached. Specifically, at debt levels lower than 30 percent of GDP, increases in the debt-to-GDP ratio are associated with faster economic growth. However, as debt rises beyond 30 percent, the effects on economic growth diminishes rapidly and at debt levels reaching 55-56 percent of GDP, the growth impacts switch from positive to negative. Thus, beyond this threshold, debt becomes a drag on growth.

Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

From its invention in Europe at the end of the nineteenth century, the automobile crisscrossed the world, completely took over the cities, and became a feature of daily life. Considered basic to the American lifestyle, the car reflected individualism, pragmatism, comfort, and above all modernity. In Latin America, it served as a symbol of distinction, similar to jewelry or fine clothing. In *The Cultural Life of the Automobile*, Guillermo Giucci focuses on the automobile as an instrument of social change through its “kinetic modernity” and as an embodiment of the tremendous social impact of technology on cultural life. Material culture—how certain objects generate a wide array of cultural responses—has been the focus of much scholarly discussion in recent years. The automobile wrought major changes and inspired images in language, literature, and popular culture. Focusing primarily on Latin America but also covering the United States,

Europe, Asia, and Africa, Giucci examines how the automobile was variously adapted by different cultures and how its use shaped and changed social and economic relationships within them. At the same time, he shows how the “automobilization” of society became an essential support for the development of modern individualism, and the automobile its clearest material manifestation.

In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a number of improvements over the first edition.

A major new text on contemporary global political economy that focuses centrally on key issues and actors. Concise and accessibly written, it provides an ideal introduction to the contemporary dynamics and processes of change in the global political economy.

From limousines to canoes to the Apollo spacecraft, Gregory Votolato chronicles the ever-evolving design of vehicles, nautical crafts, and other objects of transportation, and in particular explores the relationship between mass transportation and the travel experience.

Originally published in 1991, although written in the 1970s when the New Orthodoxy was exerting its most powerful influence upon students of the period, this book examines what changed and what did not change in Germany as a result of the Revolution of 1918. It discusses in particular, aspects of German life which the Social Democrats had singled out for change, and specifically political, land, and educational reform and the liberalization of the cultural and artistic climate. Modern introduction to theory of coding and decoding with many exercises and examples.

The author looks at the specifics of oil reserves and the petroleum industry and speculates on what will happen when the well runs dry.

Information on routine servicing and repair for the DIY mechanic, with tasks described and photographed in a step-by-step sequence.

The most radical of Citroen's idiosyncratic offerings, the DS was sensational when it was introduced in 1955. Twenty years and 1.45 million cars later it was still technically advanced to most other cars. Revolutionary in driving characteristics and comfort, it remains one of the most innovative cars of all time.

For some years, David Cross has been intrigued by how racing cars arrived at the race paddocks and was disappointed to find no specific guidance or literature on what appeared to be an important facet of motorsport. He decided to remedy this omission and his detailed research has resulted in the publication of this unique book. Inside the Paddock - Racing Car Transporters at Work contains nearly 550 images, many previously unpublished, which are enhanced by well-researched and informative captions. After the introduction which gives a historical overview of the circumstances and logistics involved in arriving at a race meeting, the book is divided into over 150 sections which investigate and discuss the transporters of individual teams, privateers, manufacturers, constructors and record-breakers. The author has been ably assisted by Bjorn Kjer, a specialist in lorries, but particularly racing car transporters and the other support vehicles which appeared at race circuits. His knowledge has been a source of much detailed information, identifying many of the vehicles and venues in the photographs. This book from Wolfgang Publications shows how and why of performance engine building with 500 color photos. Not a what-to-buy-book - it's a how-to-build book. Take advantage of the knowledge shared by the R&R Cycles crew.

Welcome to Truth Facts, a collection of information graphics that poke fun at societal quirks and everyday absurdities through charts and graphs. Danish writer Mikael Wulff and cartoon artist Anders Morgenthaler have taken the internet by storm with their humorous and perceptive infographics that turn commonplace phenomena into clever commentary. In distilling keen observations about universal experiences into elegant charts and graphs, Truth Facts gets to the heart of the paradoxical and wonderful world we all share, and puts modern reality into perspective in a funny and visceral way. These simple, colorful graphics explore societal quirks and everyday oddities, such as what happens when you call customer service (anything but service), when banks are open (only when you're at work), the biggest lies on the internet ("LOL"), and much more. Playfully teasing readers even as it explores themes like perception vs. reality, this compendium of life's truthiest facts prods us to laugh at ourselves, own up to our shortfalls, accept the strangeness of the world we live in, and continue on—happier and more connected to one another than ever before.

As the financial and environmental costs of fossil fuels continue to rise, the ancient art of windpower is making a steady comeback, and many countries are promoting wind energy generation as part of a drive toward a sustainable future. Yet many environmental enthusiasts prefer a more do-it-yourself approach. "Windpower Workshop" provides all the essential information for people wanting to build and maintain a windpower system for their own energy needs. Hugh Piggott runs his own successful windpower business in Scotland.

**NEW YORK TIMES BESTSELLER** • An inspiring personal story of redemption, second chances, and the transformative power within us all, from the founder and CEO of the nonprofit charity: water. At 28 years old, Scott Harrison had it all. A top nightclub promoter in New York City, his life was an endless cycle of drugs, booze, models—repeat. But 10 years in, desperately unhappy and morally bankrupt, he asked himself, "What would the exact opposite of my life look like?"

Walking away from everything, Harrison spent the next 16 months on a hospital ship in West Africa and discovered his true calling. In 2006, with no money and less than no experience, Harrison founded charity: water. Today, his organization has raised over \$400 million to bring clean drinking water to more than 10 million people around the globe. In *Thirst*, Harrison recounts the twists and turns that built charity: water into one of the most trusted and admired nonprofits in the world. Renowned for its 100% donation model, bold storytelling, imaginative branding, and radical commitment to transparency, charity: water has disrupted how social entrepreneurs work while inspiring millions of people to join its mission of bringing clean water to everyone on the planet within our lifetime. In the tradition of such bestselling books as *Shoe Dog* and *Mountains Beyond Mountains*, *Thirst* is a riveting account of how to build a better charity, a better business, a better life—and a gritty tale that proves it's never too late to make a change. 100% of the author's net proceeds from *Thirst* will go to fund charity: water projects around the world.

Alfred P. Sloan, Jr. led the General Motors Corporation to international business success by virtue of his brilliant managerial practices and his insights into the new consumer economy he and General Motors helped to produce. Sloan's business biography, *My Years With General Motors*, was an instant best seller when it was first published in 1964 and is still considered indispensable reading by modern business giants.

In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.
