Education is a positive construct which empowers people to make use of its potentialities in the best ways to achieve excellence. Research in this endeavour tries to resolve various problems related to education, educational process and educational advancements. Thereby, keeping education updated and advanced in turn preparing updated positive and constructive citizens of the society. Today an educated person is expected to be equipped with the most advanced knowledge, skills, humane values and digitalisation, including evaluation of existing policies and bringing out components & variables to be covered by forthcoming policies. Thus, research is positively correlated with the human and material development, ensuring humane and developed society. The strength of an institution is reflected by the researches undertaken by the members over there. It gives me immense pleasure to note that survey of research abstracts in Faculty of Education, Banaras Hindu University has been completed and ready for its publication in hard and soft mode. The present volume includes 256 abstracts since 1952, including most recent D.Litt. abstract in education. This survey no doubt presents a trend of researches understudy. These abstracts will certainly pave educational paths to solving recent educational issues. A commendable contribution has been done by the team of publication. This will have a long-term impact on future researchers. Moreover, preservation of research knowledge, covering 33 identified educational areas and its dissemination were much needed and expected for the cause of quality research. I am sure, the volume will serve its qualitative purpose to researchers, teachers, administrators and policy-makers in India and abroad. We are grateful to Prof.D.P.Singh, Chairman, University Grants Commission, New Delhi (India) for

This innovative approach to teaching Java language and programming uses game design development as the method to applying concepts. Instead of teaching game design using Java, projects are designed to teach Java in a problem-solving approach that is both a fun and effective. Learning Java with Games introduces the concepts of Java and coding; then uses a project to emphasize those ideas. It does not treat the object-oriented and procedure and loop parts of Java as two separate entities to be covered separately, but interweaves the two concepts so the students get a better picture of what Java is. After studying a rich set of projects, the book turns to build up a “Three-layer Structure for Games” as an architecture template and a guiding line for designing and developing video games. The proposed three-layer architecture not only merges essential Java object-oriented features but also addresses loosely coupled software architecture.

PREFACE It gives me immense pleasure to share a few sentences as preface of the ‘Survey of Research Abstract of Faculty of Education (K)’, Banaras Hindu University, Varanasi. As we are aware that educational research aimed at developing curriculum, syllabus, textbooks, instructional materials, assessment modules, pedagogical innovations and qualitative practices and reforms. Information and communication technology, e-resources, e-contents, on-line mode of curricular transactions are becoming more prominent and effective in certain domains worldwide. Researches at doctoral and post-doctoral level are to be addressed the issues related to community, its needs and aspirations, curriculum (advances to be incorporate) and teaching-learning processes in order to make education updated, fulfilling the developmental needs, updated education refines the sensitivities of the learners to be constructive and productive in their approaches to bring desired development for themselves and for the society at large. Fast changing scenario on expected to lines and also on unexpected lines, both demand multifaceted preparedness to meet the challenges of life, likely to emerge. The present covid-19 situation has forced people globally to be locked down to fight against fatal corona virus. Under the situation researches and education processes one unique features such as: online mode of teaching- learning, development of e-content & e-resources, digital pedagogy, curricular flexibility, alternate system of evaluation and examinations, teachers knowledge base and preparedness and students achievement etc. all these have put forwards new areas of study. The comprehensive volume II of the Research Abstract includes eighty Ph.D. thesis and two hundred P.G. dissertations, covered various areas, including educational psychology, philosophy, sociology, technology, curricular studies, examination, evaluation, discipline-based pedagogies etc. Volume provides a rich knowledge base to readers to find knowledge gap in a particular areas for further research design in a way researcher finds a direction to proceed with a new problem with a sound research plan.
