Microsoft Azure Essentials Azure Machine Learning Jeff Barnes, 2015-04-25 Microsoft Azure Essentials from Microsoft Press is a series of free ebooks designed to help you advance your technical skills with Microsoft Azure. This third ebook in the series introduces Microsoft Azure Machine Learning, a service that a developer can use to build predictive analytics models (using training datasets from a variety of data sources) and then easily deploy those models for consumption as cloud web services. The ebook presents an overview of modern data science theory and principles, the associated workflow, and then covers some of the more common machine learning algorithms in use today. It builds a variety of predictive analytics models using real world data, evaluates several different machine learning algorithms and modeling strategies, and then deploys the finished models as machine learning web services on Azure within a matter of minutes. The ebook also expands on a working Azure Machine Learning predictive model example to explore the types of client and server applications you can create to consume Azure Machine Learning web services. Watch Microsoft Press's blog and Twitter (@MicrosoftPress) to learn about other free ebooks in the Microsoft Azure Essentials series.

23 Things They Don't Tell You about Capitalism Ha-Joon Chang, 2011-01-02 INTERNATIONAL BESTSELLER For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable.-Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists-the apostles of the freemarket-have spun since the Age of Reagan. Chang, the author of the international bestseller *Bad Samaritans*, is one of the world's most respected economists, a voice of sanity-and wit-in the tradition of John Kenneth Galbraith and Joseph Stiglitz. *23 Things They Don't Tell You About Capitalism* equips readers with an understanding of how global capitalism works-and doesn't. In his final chapter, *How to Rebuild the World*, Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

The Eldest Son Archibald Marshall, 2012-01-01 Nina, said the Squire, I'm most infernally worried. He was sitting in his wife's morning-room, in a low chair by the fire. In front of him was a table set for tea for one—himself. There were buttered toast and dry toast and preserves, a massive silver teapot, milk jug, cream jug, and sugar basin, a breakfast cup of China tea, and two boiled eggs, one of which he was attacking, sitting forward in his chair with his legs bent. He had come in from hunting a few minutes before, at about six o'clock, and it was his habit thus to consume viands which most men of his age and bulk might have been afraid of, as likely to spoil their dinner. But he was an active man, in spite of his fifty-nine years and his tendency to put on flesh, and it would have taken more than a tea that was almost a meal to reduce his appetite for dinner at eight, after a day in the saddle and a lunch off sandwiches and a flask of sherry. When his tea was over he would indulge himself in half an hour's nap, with the Times open at the leader page on his knee, and go up to dress, feeling every inch of him a sportsman and an English country gentleman. His tea was generally brought to him in his library. This evening a footman had followed him into that room immediately upon his entering the house, as usual, had unbuckled his spurs, pulled off his boots for him, and put on in their place a pair of velvet slippers worked in silk, which had been warming in front of the fire. Only when his coat was wet or much splashed with mud did the Squire change that. He considered smoking-jackets rather effeminate, and slippers, on ordinary occasions, sloppy. It was only in his dressing-room or on these evenings after hunting that he wore them. Otherwise, if he had to change his boots during the daytime he put on another pair. He was particular on little points like this. All his rules were kept precisely, by himself and those about him. This evening he had told the footman, and the butler who had followed him into the room with the tray, that he would have his tea in Mrs. Clinton's room, and he had marched across the hall with a firm and decisive step, in his red coat and buckskin breeches, between which and his hand-knitted heather-mixture socks showed a white expanse of under-drawers round a muscular calf. Mrs. Clinton sat opposite to him in another low chair, at work on a woollen waistcoat. He always wore waistcoats made by her, thick for the winter, light for the summer, and she knitted his socks for him, of which he required a large number, for he hated them to be darned. He liked to see her working for him like this. He was a rich man, but a woman ought to work with her hands for her husband, whether he was rich or poor. It was her wifely duty, and incidentally it kept her out of mischief. Mrs. Clinton, at the age of fifty-four, with her smooth yellow-grey hair and her quiet and composed face, did not look as if she would be up to serious mischief, even if this and other restrictions were removed from her. She looked up when her husband addressed her, and marked the furrow between his heavy eyebrows. Then she looked down again at her work and waited for

him to unbosom himself further.
