What is the Gospel? Knowing the answer to this question is vital if one is to receive salvation, for belief in the wrong gospel will not save, but condemn (Gal 1:6-9). In the Gospel of Matthew, Jesus himself explains the Gospel in his very own way, for it is written: Jesus...said to them..., "The Son of Man will be...crucified. On the third day he will be raised to life! ... Whoever wants to become great among you must be your servant..., just as the Son of Man did not come to be served, but to serve, and to give his life as a ransom for many (Matthew 20:17-19, 26-28). To save you from eternal damnation, God sent His Son Jesus Christ into the world to become its savior. Because "God so loved the world" (John 3:16), He gave his own son to pay the penalty for our sins on the cross. This is the good news of the Gospel. By his blood, you can pray to invite Jesus into your heart. If you do this, he will become your personal Lord and Savior. The promise given to all true believers is as follows: Whoever is thirsty, let him come; and whoever wishes, let him take the free gift of the water of life..., the tree of life and...the holy city (Revelation 22:17-19). Instead of hunger and thirst, you are given the promise of the water and of the tree of life. Through the blood of Christ, you will return to paradise, for from paradise man was taken and to paradise man must return. In the restoration of all things, the end is like the beginning (Acts 3:21). For this reason, the Apostle Paul, in his letter to the Romans, clarified the forgiveness that is found in Jesus saying: All have sinned and fall short of the glory of God..., but God demonstrates his own love for us in this: While we were still sinners, Christ died for us..., for the wages of sin is death, but the gift of God is eternal life in Christ Jesus our Lord. ... If you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you will be saved (Romans 3:23-5:8, 6:23-10:10). The gospel is the good news of the death, burial, and resurrection of Jesus Christ, of whom the Bible declares, "Salvation is found in no one else, for there is no other name under heaven given to men by which we must be saved" (Acts 4:12). And Jesus said of himself: "I am the way and the truth and the life. No one comes to the Father except through me" (John 14:6). Why is this such wonderful news? It provides full and free deliverance from the power and penalty of sin. This is according to the grace of God alone through faith in Jesus Christ alone, for it is "by grace you have been saved, through faith" (Eph 2:8-10). However, in the Gospel of Luke, Jesus warns, "I tell you, Nay: but, except ye repent, ye shall all likewise perish" (Lk 13:3). If you simply turn from your sins by turning to the cross, you will experience the renewal that the Holy Spirit brings. Believe in your heart that Christ died and rose again. That is faith in God. The only way you can be saved is by accepting His free gift of eternal life. When this happens, the evidence of true belief is the presence of the Holy Spirit, for he convicts you of sin, causes spiritual birth, indwells, seals, sanctifies, guides, equips, teaches

Written by experienced technicians, MODERN DIESEL TECHNOLOGY: HEAVY EQUIPMENT SYSTEMS, Third Edition, combines universal and manufacturer-specific information within a single, reliable resource. The book's unique focus on off-highway mobile equipment systems gives readers an in-depth guide to service and repair essentials for heavy equipment, agricultural equipment, and powered lift truck technology. Detailing everything from safety to best practices, chapter coverage

addresses key areas including hydraulics, heavy-duty brakes, drivetrains, steering, suspension, and track systems. Now featuring a visually appealing, full-color design, the Third Edition also includes the latest updates in computer-controlled hydraulics, GPS, electronic controls, J1939 multiplexing, and electric drive vehicle systems, providing valuable insights into important trends and technology specialty technicians need to know to master their ever-evolving trade. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A great tool for novice actors who want to improve public speaking skills, or for those involved in the dramatic arts, presents a collection of scenes and monologues, broken down by category, from popular theatrical plays ranging from Shakespeare to Broadway productions. Original.

This specification prescribes the requirements for classification of surfacing electrodes for shielded metal arc welding. Classification is based upon the chemical composition of the deposited weld metal except for tungsten carbide electrodes where classification is based on the mesh range, quantity, and composition of the tungsten carbide granules. A guide is appended to the specification as a source of information as to the characteristics and applications of the classified electrodes.

This book explores seven centuries of change in Cyprus and the Eastern Mediterranean world through the rise and fall of Famagusta's medieval Armenian Church. An examination of the complex and its art escorts the reader from the era of the Crusades in Lusignan Cyprus, through the rise and fall of the Venetian, Ottoman and British Empires, to the political stasis of the present day. The Armenian church was a home for displaced villagers during the post-independence era, became a military storage facility post-1974 and eventually fell into abandonment once again. This study represents a pioneering history of the Armenian community in Famagusta and a probing analysis of the art and architecture it left behind. It is also a permanent record of the long-term engagement and commitment of Nanyang Technological University Singapore, the World Monuments Fund, and the Famagusta Municipality to protect this precious site, under extremely challenging circumstances. "Provides information on liquid cooling for datacom equipment centers. Concerned with energy efficiency"--

An extensive guide for learning how to use the Creo Parametric software for 3D design for manufacturing. Design for manufacturability, DFM, is a product design method that enables efficient manufacturing of products. The guide is published as a series of four individual PDF ebooks. Each book can be used as a textbook during a course or for self-studies. All the templates, formats, sheets and parts showed in each book are available for download. Download links can be found inside the books. The book guides the reader through turning machining with Live Tools and combined milling and turning manufacturing.

Designed for the required course on hydraulics found in diesel technology and heavy equipment programs, MOBILE EQUIPMENT HYDRAULICS: A SYSTEMS AND TROUBLESHOOTING APPROACH, takes a practical approach to the understanding of fluid power / hydraulic systems. Instead of concentrating on the design issues of fluid power systems this book approaches hydraulics more like a technician would to approach a system that requires maintenance or troubleshooting. Nearly all aspiring diesel technicians receive training in this subject, which is one of seven areas of study recognized by ASE Education Foundation in diesel technology. Coverage includes a study of terminology, industrial standards, symbols and basic circuitry design as related to fluid power. Examples are drawn from actual equipment that is relevant to the program of study, whether it be heavy truck, earth-

moving, or agricultural equipment. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Vols. - include the Shorthorn Society's Grading register for beef Shorthorn cattle; v. - include the society's Herd book of poll shorthorns.

My First Tie is a wonderful story of a young boy sharing his experience learning how to tie his very first tie. The authors give us an inside scoop into the mind of a young boy seeking to mature and learn new things. Who knew learning to tie a tie would teach us the importance of honesty and telling the truth. We are also introducing a positive black male character to children's literature. Coach is a fixer, a teacher, a motivator, a mentor, and all-around great guy. My First Tie is the second book in a wonderful children's book series, The Adventures Of Coach And Little Dell.

The Deputy Commissioner of General Services Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: preparing written material; understanding and interpreting written material; administration; organizing data into tables and records; and other related areas.

Perfect glucose logbook that includes spaces for 52 weeks to track your blood sugar regimen. Use this book to track time, date and blood sugar reading before and after breakfast, lunch, dinner and bedtime. This is note section that can be used to document more health information and if you want to track medications, vitamins, food intake, sleep, or exercise. Perfect Sized 8.5" x 11" Paper White paper Pages 110 pages Cover: Soft cover (mat

Examines the history of central and eastern Africa, including an overview of each of the countries that comprise this area of the continent.

Water supply and waste systems (building, Waste-water drainage, Drainage, Buildings, Rainwater control systems, Gutters, Rainwater pipes, Circular shape, Design, Mathematical calculations, Installation, Verification, Maintenance

This 68th Birthday Gift / Journal / Diary / Notebook makes an awesome unique birthday card / greeting card idea as a present! This journal is 6 x 9 inches in size with 110 blank lined pages for writing down thoughts, notes, ideas, or even sketching.

"The Pretentious Young Ladies" by Molière. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten or yet undiscovered gems of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Providing discussions of cutter material variations and options, feeds, speeds and coolants, tool holders, and applications, this text discusses the side effects of countersinking, including stress risers. It contains case histories, practical tips, and information to make process selection easier.

William Lewis Manly (1820-1903) and his family left Vermont in 1828, and he grew to manhood in Michigan and Wisconsin. On hearing the news of gold in California, Manly set off on horseback, joining an emigrant party in Missouri. Death Valley in '49 (1894) contains Manly's account of that overland journey. Setting out too late in the year to risk a northern passage through the Sierras, the group takes the southern route to California, unluckily choosing an untried short cut through the mountains. This fateful decision brings the party through Death Valley, and Manly describes their trek through the desert, as well as the experiences of the Illinois "Jayhawkers" and others who took the Death Valley route. Manly's memoirs continue with his trip north to prospecting near the Mariposa mines, a brief trip back east via the Isthmus, and his return to California and another try at prospecting on the North Fork of the Yuba at Downieville in 1851. He provides lively anecdotes of life in mining camps and of his visits to Stockton, Sacramento, and San Francisco.

Discontinuous Systems develops nonsmooth stability analysis and discontinuous control synthesis based on novel modeling of discontinuous dynamic systems, operating under uncertain conditions. While being primarily a research monograph devoted to the theory of discontinuous dynamic systems, no background in discontinuous systems is required; such systems are introduced in the book at the appropriate conceptual level. Being developed for discontinuous systems, the theory is successfully applied to their subclasses – variable-structure and impulsive systems – as well as to finite- and infinite-dimensional systems such as distributed-parameter and time-delay systems. The presentation concentrates on algorithms rather than on technical implementation although theoretical results are illustrated by electromechanical applications. These specific applications complete the book and, together with the introductory theoretical constituents bring some elements of the tutorial to the text.
