

Safer Home Assessment Tool

This book focuses on evidence-based occupational therapy in the care of older adults in different clinical settings, from home to acute hospital, from intensive care unit to rehabilitation centers and nursing homes. Occupational therapy has progressively developed as a new discipline aiming to improve the daily life of individuals of different ages, from children to older adults. The book first reviews the interaction between occupational therapy and geriatrics and then discusses in depth how occupational therapy interventions are applied in the community, in the acute hospital and in the nursing home. It highlights the key role of occupational therapy in the management of frail patients, including critically ill older patients and persons with dementia, and describes in detail how to maintain occupational therapy interventions across different settings to avoid the fragmentation of care. The ageing population requires new innovative approaches to improve the quality of life, and as such this book provides clinicians with handy, key information on how to implement occupational therapy in the daily clinical care of older adults based on the current scientific evidence.

Occupational therapists require skills to access the daily living skills of their clients. This book uses a transactional approach to examine the home environment and the client. Current and future needs are assessed and this book addresses concerns and suggests solutions which will assist in helping the client remain in their own home.

This unique and engaging open access title provides a compelling and ground-breaking account of the patient safety movement in the United States, told from the perspective of one of its most prominent leaders, and arguably the movement's founder, Lucian L. Leape, MD.

Read Book Safer Home Assessment Tool

Covering the growth of the field from the late 1980s to 2015, Dr. Leape details the developments, actors, organizations, research, and policy-making activities that marked the evolution and major advances of patient safety in this time span. In addition, and perhaps most importantly, this book not only comprehensively details how and why human and systems errors too often occur in the process of providing health care, it also promotes an in-depth understanding of the principles and practices of patient safety, including how they were influenced by today's modern safety sciences and systems theory and design. Indeed, the book emphasizes how the growing awareness of systems-design thinking and the self-education and commitment to improving patient safety, by not only Dr. Leape but a wide range of other clinicians and health executives from both the private and public sectors, all converged to drive forward the patient safety movement in the US. *Making Healthcare Safe* is divided into four parts: I. *In the Beginning* describes the research and theory that defined patient safety and the early initiatives to enhance it. II. *Institutional Responses* tells the stories of the efforts of the major organizations that began to apply the new concepts and make patient safety a reality. Most of these stories have not been previously told, so this account becomes their histories as well. III. *Getting to Work* provides in-depth analyses of four key issues that cut across disciplinary lines impacting patient safety which required special attention. IV. *Creating a Culture of Safety* looks to the future, marshalling the best thinking about what it will take to achieve the safe care we all deserve. Captivatingly written with an "insider's" tone and a major contribution to the clinical literature, this title will be of immense value to health care professionals, to students in a range of academic disciplines, to medical trainees, to health administrators, to policymakers and even to lay readers with an interest in patient safety and in

the critical quest to create safe care.

Wall Street Journal Bestseller! Next Big Idea Club selection?chosen by Malcolm Gladwell, Susan Cain, Dan Pink, and Adam Grant as one of the "two most groundbreaking new nonfiction reads of the season!" "A must-read that topples the idea that emotions don't belong in the workplace." --Susan Cain, author of *Quiet* A hilarious guide to effectively expressing your emotions at the office, finding fulfillment, and defining work-life balance on your own terms. How do you stop the office grouch from ruining your day? How do you enjoy a vacation without obsessing about the unanswered emails in your inbox? If you're a boss, what should you do when your new, eager hire wants to follow you on Instagram? The modern workplace can be an emotional minefield, filled with confusing power structures and unwritten rules. We're expected to be authentic, but not too authentic. Professional, but not stiff. Friendly, but not an oversharer. Easier said than done! As both organizational consultants and regular people, we know what it's like to experience uncomfortable emotions at work - everything from mild jealousy and insecurity to panic and rage. Ignoring or suppressing what you feel hurts your health and productivity -- but so does letting your emotions run wild. Our goal in this book is to teach you how to figure out which emotions to toss, which to keep to yourself, and which to express in order to be both happier and more effective. We'll share some surprising new strategies, such as:

- * Be selectively vulnerable: Be honest about how you feel, but don't burden others with your deepest problems.
- * Remember that your feelings aren't facts: What we say isn't always what we mean. In times of conflict and miscommunication, try to talk about your emotions without getting emotional.
- * Be less passionate about your job: Taking a chill pill can actually make you healthier and more focused.

Drawing on what we've learned from behavioral

Read Book Safer Home Assessment Tool

economics, psychology, and our own experiences at countless organizations, we'll show you how to bring your best self (and your whole self) to work every day.

Better Living With Dementia: Implications for Individuals, Families, Communities, and Societies highlights evidence-based best practices for improving the lives of patients with dementia. It presents the local and global challenges of these patients, also coupling foundational knowledge with specific strategies to overcome these challenges. The book examines the trajectory of the disease, offers stage-appropriate practices and strategies to improve quality of life, provides theoretical and practical frameworks that inform on ways to support and care for individuals living with dementia, includes evidence-based recommendations for research, and details global examples of care approaches that work. Weaves research evidence and theories with practical know-how. Identifies support strategies for home, community, and health care settings. Provides stage-appropriate strategies relative to dementia severity. Summarizes dementia pathology, diagnosis, and progression. Considers the changing needs of both the individual with dementia and family and formal caregivers. Offers evidence-informed recommendations for research, practice, policy, and how to make things better at home, in the community, in healthcare and service settings, and through national policies. Provides local and global exemplars of what works. Provides case vignettes to illustrate key points with real examples. Contains brief conversations with national and international experts.

In a health care environment, risks abound. This must-have book provides organizations with the tools and know-how to conduct effective assessments of potential risks and take steps to minimize them. Whether the risk issue is infant and pediatric abduction, infection control during construction, fire safety, or potential disaster emergencies, **Environment of Carer Risk**

Read Book Safer Home Assessment Tool

Assessment guides organizations through a basic risk assessment process and suggests potential high-profile, high-risk areas for consideration. It shows how to use existing standards tools such as the Periodic Performance Review, Interim Life Safety Measures, the hazard vulnerability analysis, and more. And, it provides case studies, examples, and worksheets for assessing and minimizing risk and includes a CD-ROM with interactive risk assessment forms. Performing risk assessments can help organizations avoid OSHA fines, accreditation noncompliance, and more. But the bottom line is that by performing prudent and timely risk assessments, organizations can help ensure patient, staff, and visitor safety.

Elder Care in Occupational Therapy has been extensively revised into a new and completely updated second edition. This pragmatic text presents up-to-date information in a user-friendly format that seamlessly flows from one subject to the next. From wellness to hospice, Elder Care in Occupational Therapy, Second Edition offers a broad yet detailed discussion of occupational therapy practice that is devoted to older adults. A wide variety of topics are covered in a concise format, such as historical perspectives, theoretical insights, the aging process, and current interventional strategies, to name a few. Twenty informative appendices are also included that clarify issues such as Medicare coverage, community and clinical living arrangements, client-centered practice, exercise programs, evidence-based practice, and a summary of the newly adopted Occupational Therapy Practice Framework: Domain and Process. Additional features: Contains information about the most advanced scientific achievements that can ultimately affect occupational therapy. Lists new and updated resource materials. Presents case studies that provide theoretical considerations and Intervention methods. Clearly discusses exciting and new venues for occupational therapy programming.

Read Book Safer Home Assessment Tool

Explains fundamentals of documentation and current reimbursement issues. Perfect for the student or clinician, *Elder Care in Occupational Therapy, Second Edition* provides classic, professional information on theory, disease entities, and intervention in a comprehensive format.

Nowadays, cerebral palsy (CP) rehabilitation, along with medical and surgical interventions in children with CP, leads to better motor and postural control and can ensure ambulation and functional independence. In achieving these improvements, many modern practices may be used, such as comprehensive multidisciplinary assessment, clinical decision making, multilevel surgery, botulinum toxin applications, robotic ambulation applications, treadmill, and other walking aids to increase the quality and endurance of walking. Trainings are based on neurodevelopmental therapy, muscle training and strength applications, adaptive equipment and orthotics, communication, technological solves, and many others beyond the scope of this book. In the years of clinical and academic experiences, children with cerebral palsy have shown us that the world needs a book to give clinical knowledge to health professionals regarding these important issue. This book is an attempt to fulfill and to give "current steps" about CP. The book is intended for use by physicians, therapists, and allied health professionals who treat/rehabilitate children with CP. We focus on the recent concepts in the treatment of body and structure problems and describe the associated disability, providing suggestions for further reading. All authors presented the most frequently used and accepted treatment methods with scientifically proven efficacy and included references at the end of each chapter.

This is the only handbook for hospice and palliative care professionals looking to

Read Book Safer Home Assessment Tool

enhance their care delivery or their programs with LGBTQ-inclusive care. Anchored in the evidence, extensively referenced, and written in clear, easy-to-understand language, *LGBTQ-Inclusive Hospice and Palliative Care* provides clear, actionable strategies for hospice and palliative physicians, nurses, social workers, counselors, and chaplains.

The field of occupational health and safety constantly changes, especially as it pertains to biomedical research. New infectious hazards are of particular importance at nonhuman-primate facilities. For example, the discovery that B virus can be transmitted via a splash on a mucous membrane raises new concerns that must be addressed, as does the discovery of the Reston strain of Ebola virus in import quarantine facilities in the U.S. The risk of such infectious hazards is best managed through a flexible and comprehensive Occupational Health and Safety Program (OHSP) that can identify and mitigate potential hazards. *Occupational Health and Safety in the Care and Use of Nonhuman Primates* is intended as a reference for vivarium managers, veterinarians, researchers, safety professionals, and others who are involved in developing or implementing an OHSP that deals with nonhuman primates. The book lists the important features of an OHSP and provides the tools necessary for informed decision-making in developing an optimal program that meets all particular institutional needs. From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who

Read Book Safer Home Assessment Tool

are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based—including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Read Book Safer Home Assessment Tool

The rapid growth of home health care has raised many unsolved issues and will have consequences that are far too broad for any one group to analyze in their entirety. Yet a major influence on the safety, quality, and effectiveness of home health care will be the set of issues encompassed by the field of human factors research--the discipline of applying what is known about human capabilities and limitations to the design of products, processes, systems, and work environments. To address these challenges, the National Research Council began a multidisciplinary study to examine a diverse range of behavioral and human factors issues resulting from the increasing migration of medical devices, technologies, and care practices into the home. Its goal is to lay the groundwork for a thorough integration of human factors research with the design and implementation of home health care devices, technologies, and practices. On October 1 and 2, 2009, a group of human factors and other experts met to consider a diverse range of behavioral and human factors issues associated with the increasing migration of medical devices, technologies, and care practices into the home. This book is a summary of that workshop, representing the culmination of the first phase of the study. Presenting the new edition of the text that delivers the most widely-used and developed conceptual model in occupational therapy. Beautifully redesigned and fully revised, the Third Edition of *A Model of Human Occupation (MOHO)* delivers the latest in human occupation research and application to practice. New to this edition: a reader-friendly format with second color and additional illustrations and anecdotes; more case

Read Book Safer Home Assessment Tool

examples for integrating the model into practice; a discussion of the therapy process and how change occurs; language linked to UT and ICIDH-2 terminology; a research chapter; and numerous research references highlighting the growing body of evidence supporting MOHO.

Historically, regulations governing chemical use have often focused on widely used chemicals and acute human health effects of exposure to them, as well as their potential to cause cancer and other adverse health effects. As scientific knowledge has expanded there has been an increased awareness of the mechanisms through which chemicals may exert harmful effects on human health, as well as their effects on other species and ecosystems. Identification of high-priority chemicals and other chemicals of concern has prompted a growing number of state and local governments, as well as major companies, to take steps beyond existing hazardous chemical federal legislation. Interest in approaches and policies that ensure that any new substances substituted for chemicals of concern are assessed as carefully and thoroughly as possible has also burgeoned. The overarching goal of these approaches is to avoid regrettable substitutions, which occur when a toxic chemical is replaced by another chemical that later proved unsuitable because of persistence, bioaccumulation, toxicity, or other concerns. Chemical alternative assessments are tools designed to facilitate consideration of these factors to assist stakeholders in identifying chemicals that may have the greatest likelihood of harm to human and ecological health, and to provide

Read Book Safer Home Assessment Tool

guidance on how the industry may develop and adopt safer alternatives. A Framework to Guide Selection of Chemical Alternatives develops and demonstrates a decision framework for evaluating potentially safer substitute chemicals as primarily determined by human health and ecological risks. This new framework is informed by previous efforts by regulatory agencies, academic institutions, and others to develop alternative assessment frameworks that could be operationalized. In addition to hazard assessments, the framework incorporates steps for life-cycle thinking - which considers possible impacts of a chemical at all stages including production, use, and disposal - as well as steps for performance and economic assessments. The report also highlights how modern information sources such as computational modeling can supplement traditional toxicology data in the assessment process. This new framework allows the evaluation of the full range of benefits and shortcomings of substitutes, and examination of tradeoffs between these risks and factors such as product functionality, product efficacy, process safety, and resource use. Through case studies, this report demonstrates how different users in contrasting decision contexts with diverse priorities can apply the framework. This report will be an essential resource to the chemical industry, environmentalists, ecologists, and state and local governments.

While neuropsychological testing can accurately detect cognitive deficits in persons with brain injury, the ability to reliably predict how these individuals will function in everyday life has remained elusive. This authoritative volume brings together well-

Read Book Safer Home Assessment Tool

known experts to present recent advances in the neuropsychological assessment of key real-world capacities: the ability to live independently, work, manage medications, and drive a car. For each of these domains, contributors describe cutting-edge tests, procedures, and interpretive strategies and examine salient theoretical and methodological issues. Chapters also review approaches for evaluating specific populations, including older adults and patients with traumatic brain injury, depression, dementia, schizophrenia, and other neurological and psychiatric disorders.

A staple of family medicine training for 30 years, *Essentials of Family Medicine* offers a comprehensive introduction to this specialty designed just for clerkship students. Covering principles of family medicine, preventive care, and a full range of common ambulatory care problems, it provides all the guidance you need to succeed on a clinical rotation in family medicine.

Environmental gerontology – the research on aging and environment – evolved during the late 1960s, when the domain became a relevant topic due to societal concerns with the problems of housing for elderly people. The field proliferated during the 1970s and 1980s, and remains viable and active today on an international scale. However, in recent times, the viability of the field and its future has been brought into question. In this volume, international experts across diverse areas reflect on the current progress of their respective disciplines, illustrating research-grounded benefits emerging from their work, and suggesting new agenda that can guide progress in the future. The contributors address a wide range of issues, including: evaluation of existing paradigms and new theories that might advance both research and training; issues

Read Book Safer Home Assessment Tool

and applications in methods, measures, and empirically-generated research agenda; innovative approaches to environmental transformations in home, community, and long-term care settings; and understudied populations and issues in environmental gerontology. This book was originally published as a special issue of the Journal of Housing for the Elderly.

Tina M. Marrelli's new book, *Home Care Nursing: Surviving in an Ever-Changing Care Environment* is a practical and comprehensive guidebook written concisely and without jargon or insider acronyms, making the book accessible to anyone whose work is connected to home care nursing services. Designed to provide chapters as stand-alone resources for readers with previous experience seeking updated guidance, *Home Care Nursing* is also an excellent guide for course or orientation material. Each chapter is packed with practical questions, discussion topics, and additional resources, such as a complete Medicare Benefit Policy for reference. Additionally, offering more than just an overview of the healthcare and home care markets, this book discusses the unique practice setting and environment of home care nursing, the laws regulations, and quality, and how to make the leap into the field, document your home visit, and improve your professional growth and development.

Be prepared for the growing opportunities in community and population health practice with the 3rd Edition of this groundbreaking resource. The New Edition reflects the convergence of community and population health practice with expanded content on health promotion, well-

Read Book Safer Home Assessment Tool

being, and wellness. Drs. Scaffa and Reitz present the theories underpinning occupational therapy practice in community and population health. Then, the authors provide practical guidance in program needs assessment, program development, and program evaluation. Both new practitioners and students will find practice-applicable coverage, including expanded case examples, specific strategies for working in the community, and guidance on securing funding for community and population health programs.

Initial priorities for U.S. participation in the International Decade for Natural Disaster Reduction, declared by the United Nations, are contained in this volume. It focuses on seven issues: hazard and risk assessment; awareness and education; mitigation; preparedness for emergency response; recovery and reconstruction; prediction and warning; learning from disasters; and U.S. participation internationally. The committee presents its philosophy of calls for broad public and private participation to reduce the toll of disasters.

Now authored by two outstanding occupational therapy experts and 48 contributors who include educators, clinicians, and leaders in their profession, the fifth edition of this trusted text introduces occupation-based practice in the context of working with physical disabilities. It gives a comprehensive, in-depth overview of occupational therapy, history and theory, the occupational therapy process, evaluation and intervention in the occupational performance areas, the performance components, interventions, and treatment applications.

Developed to help occupational therapists learn to use the COPM. Provides a self-directed program which allows learning at your own pace, links reference materials in a step-by-step fashion, and demonstrates examples and clinical scenarios.

This textbook on assessment and outcome measurement is written for both occupational

Read Book Safer Home Assessment Tool

therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome, evaluation and measurement and discussing the complexity of therapy assessment and measurement, including the challenge of measuring human behaviour and the impact of factors such as task demand and context, including the environment. Methods of data collection (e.g. observation, interview, standardised testing) and sources (e.g. self-report, proxy) for collecting information about clients are then reviewed, and the main purposes of assessment (e.g. descriptive, evaluative, predictive, discriminative) presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

The invaluable resource provides a sophisticated technique for teachers to observe, assess, plan and evaluate to improve pupil behaviour. The book recognises the diverse demands of the modern classroom and explores ways in which asking the right question can help in the development of effective solutions. This is far more than ticking check lists as it will: develop a more rigorous approach to the tracking and assessment of behaviour related issues; deepen understanding about biological, psychological and social factors

Read Book Safer Home Assessment Tool

influencing behaviour; give examples of reflective and diagnostic practice, informing planning for successful interventions; and explore ways of collecting appropriate information to support requests for interventions from other agencies. The pack includes a CD ROM with reflective tasks, diagnostic tools, illustrative poems and a staff Powerpoint for professional development sessions. Occupational therapists are expected to maintain their knowledge of best practice by independently keeping up to date on the latest research. With this work, the authors have assembled the evidence for effectiveness of occupational therapy for adults and older adults. It brings together the latest published peer-reviewed literature, conceptual approaches, outcome measures, and intervention approaches to address the three main areas by: Identifying a finite set of interventions which occupational therapists deliver most often, and providing details of those intervention approaches; Identifying where the research evidence shows that occupational therapists can achieve specific positive effects as a result of those interventions; Identifying the outcome measures most commonly and reliably used by researchers in occupational therapy to demonstrate the effects of interventions. The authors have comprehensively reviewed all of the intervention effectiveness literature for occupational therapy provided for adults. The material reviewed crosses all diagnostic categories and areas of practice for

Read Book Safer Home Assessment Tool

adults and older adults. Analysis of over 500 research studies and systematic reviews form the basis for this book.

Since publication of the original edition in 1996, this book has established itself as an essential text for occupational therapists. It offers an understanding of the law relating to their practice, but is written to be accessible for those who have no prior legal knowledge. The text provides valuable information for occupational therapists employed in health and social services, as well as the law relevant to private practitioners. The book includes chapters on all the main client groups and presents the relevant specialist law. Students and teachers of occupational therapy will find the chapters on professional registration, education, training and research of particular interest. The third edition has been substantially revised to cover significant changes in legislation since the previous version. There is also a brand new chapter on the subject of death and dying. *Legal Aspects of Occupational Therapy* remains a key resource for the occupational therapy student, practitioner and service manager.

This handbook is designed to guide public sector managers and development practitioners through the process of large-scale housing reconstruction after major disasters, based on the experiences of recent reconstruction programs in Aceh (Indonesia), Sri Lanka, Pakistan, Gujarat (India) and Bam (Iran).

Read Book Safer Home Assessment Tool

"MS is always in the back of your mind. If there is something you want to do, you always wonder if the MS will allow you do to it." —Darlene, living with MS for 22 years

Living with multiple sclerosis (MS) is challenging and multidimensional. MS pervades all aspects of life: one's body becomes unpredictable and unreliable, one's identity and sense of self are tested, and relationships with others often change. MS symptoms emerge and remit; limitations evolve and progress. MS rehabilitation is an active, person-centered, and goal-oriented process embedded within a respectful and collaborative partnership between the person with MS and the members of his or her rehabilitation treatment team. Using the International Classification of Functioning, Disability and Health (ICF) as a guiding framework, *Multiple Sclerosis Rehabilitation: From Impairment to Participation* provides a comprehensive and evidence-based resource to inform and guide clinical reasoning and decision making during each phase of the MS rehabilitation process, from initial referral to post-discharge follow-up. With an emphasis on the application of evidence throughout the entire MS rehabilitation process, the specific objectives of the book are to increase the understanding of: The nature and impact of specific impairments, activity limitations, and participation restrictions experienced by people with MS How to select and use valid, reliable, and relevant assessment tools to inform the development of rehabilitation goals

Read Book Safer Home Assessment Tool

and intervention plans, and to evaluate outcomes This book provides information about the nature and impact of MS on the daily lives of people living with the disease, describes evidence-based assessment processes and instruments, and summarizes current knowledge that can inform goal setting and intervention planning. Thoughtful application of the knowledge contained in this book will inform and guide rehabilitation providers to work collaboratively with people with MS and enable them to achieve their goals for participation in everyday life. Since the first edition of this very successful book was written to synthesise and review the enormous body of work covering falls in older people, there has been an even greater wealth of informative and promising studies designed to increase our understanding of risk factors and prevention strategies. This second edition, first published in 2007, is written in three parts: epidemiology, strategies for prevention, and future research directions. New material includes recent studies covering: balance studies using tripping, slipping and stepping paradigms; sensitivity and depth perception visual risk factors; neurophysiological research on automatic or reflex balance activities; and the roles of syncope, vitamin D, cataract surgery, health and safety education, and exercise programs. This edition will be an invaluable update for clinicians, physiotherapists, occupational therapists, nurses, researchers, and all those working in community, hospital and

Read Book Safer Home Assessment Tool

residential or rehabilitation aged care settings.

Designed to help students become effective, reflective practitioners, this fully updated edition of the most widely used occupational therapy text for the course continues to emphasize the “whys” as well as the “how-tos” of holistic assessment and treatment. Now in striking full color and co-edited by renowned educators and authors Diane Powers Durette and Sharon Gutman, *Occupational Therapy for Physical Dysfunction, Eighth Edition* features expert coverage of the latest assessment techniques and most recent trends in clinical practice. In addition, the book now explicitly integrates “Frames of Reference” to help students connect theories to practice and features a new six-part organization, thirteen all-new chapters, new pedagogy, and more.

Fully revised to reflect the latest AOTA standards, *Occupational Therapy Evaluation for Adults: A Pocket Guide, 2nd Edition* is a quick, comprehensive reference to guide students and practitioners as they perform efficient evaluations of adults, identify problems, and plan and implement interventions to produce optimal therapeutic outcomes. Clinical examples illustrate the application of content, illustrations demonstrate assessment techniques, and extensive tables capture information in an easy-to-read manner. This completely revised and updated Second Edition covers a wide range of new assessments and tools

Read Book Safer Home Assessment Tool

for community-based practitioners, includes up-to-coverage of assessing clients in natural settings, and offers a strong focus on helping readers develop practical skills for the workplace.

Nearly 600 instruments are reviewed in this new edition of occupational therapy's classic publication, including many developed by occupational therapists. An international team of academicians, clinicians, researchers, and advanced-degree candidates working in various practice arenas collaborated on this update. The assessment profiles—which include title, authors, format, purpose, population, time required to administer, setting or position, materials or tools, brief description, interpretation, reliability and validity, source, additional references, cost, and sample—will be useful to clinicians and students, who must choose appropriate tools for clinical practice; to educators, who select assessment procedures for the classroom; and to researchers, who will find instruments that are designed for research purposes or will benefit from further investigation. This edition includes a matrix of all assessments, showing content areas and age ranges of each instrument.

The definitive work on occupational therapy for physical dysfunction returns in its Sixth Edition, with reputable co-editors and clinical, academic, and consumer contributors. This text provides a current and well-rounded view of the field- from theoretical rationale to evaluation, treatment, and follow-up. Through the Occupational Functioning Model (OFM), the Sixth Edition continues to emphasize the conceptual foundation and

Read Book Safer Home Assessment Tool

scientific basis for practice, including evidence to support the selection of appropriate assessments and interventions. NEW TO THIS EDITION: Student DVD with video clips demonstrating range of motion, manual muscle testing, construction of hand splints, and transferring patients Evidence Tables summarize the evidence behind key topics and cover Intervention, Participants, Dosage, Type of Best Evidence, Level of Evidence, Benefit, Statistical Probability, and Reference Assessment Tables summarize key assessment tools and cover Instrument and Reference, Description, Time to Administer, Validity, Reliability, Sensitivity, and Strengths and Weaknesses Urbanization in Asia is expected to reach 55% by 2030 and 64% by 2050 to constitute 53% of the world's urban population and contribute half the world's gross domestic product. But as cities swell, they also struggle with environmental degradation, traffic congestion, inadequate urban infrastructure, and lack of basic civic services. This manual prepared by Urban Sector Group of the Asian Development Bank (ADB) provides guidelines for conducting rapid urban assessments. It is guided by the Urban Operational Plan 2012-2020 which outlines ADB's support to its members in developing their urban economies through the 3E approach (Economy, Environment, and Equity). It presents a framework providing a context for the city-level 3E tool kits (Tool Kit for Rapid Economic Assessment, Planning, and Development of Cities in Asia; Green City Development Tool Kit; and Enabling Inclusive Cities: Tool Kit for Inclusive Urban Development).

Read Book Safer Home Assessment Tool

Draw upon the foundations necessary for finding and interpreting research evidence across all healthcare professions. Revised to reflect the most current changes in the field of clinical research in rehabilitation and medicine, you'll find a growing emphasis on evidence-based practice (EBP) as well as new vocabulary that is being integrated into research and practice across disciplines.

New trends in mental healthcare practice and a rapid increase in the aged population are causing an explosion in the fields of clinical gerontology and geropsychology today. This comprehensive second edition handbook offers clinicians and graduate students clear guidelines and reliable tools for assessing general mental health, cognitive functioning, functional age, psychosocial health, comorbidity, behavior deficits, and more. Psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning are addressed in full, and a wide range of conditions and disorders common to this patient population are covered. Each chapter provides an empirical review of assessment instruments, assessment scales in their totality, a review of how these instruments are used with and adapted for different cultural groups, illustration of assessments through case studies, and information on how to utilize ongoing assessment in treatment and/or treatment planning. This combination of elements will make the volume the definitive assessment source for clinicians working with elderly patients. The most comprehensive source of up-to-date data on gerontological assessment, with review articles covering: psychopathology, behavioral

Read Book Safer Home Assessment Tool

disorders, changes in cognition, and changes in everyday functioning Consolidates broadly distributed literature into single source, saving researchers and clinicians time in obtaining and translating information and improving the level of further research and care they can provide Chapters directly address the range of conditions and disorders most common for this patient population - i.e. driving ability, mental competency, sleep, nutrition, sexual functioning, demntias, elder abuse, depression, anxiety disorders, etc Fully informs readers regarding conditions most commonly encountered in real world treatment of an elderly patient population Each chapter cites case studies to illustrate assessment techniques Exposes reader to real-world application of each assessment discussed
