This volume is a collection of scholarly papers that explore the complex issues concerning English Studies in the present Indian context. The discussions in this volume range from historical perspectives to classroom-specific pedagogies, from sociological and political hierarchies to the dynamics of intellectual development in the English language environment. Interrogating both policy and practice pertaining to English Studies in the context of Indian society, culture, history, literature and governance, the chapters seek to formulate contemporary perspectives to these debates and envision alternative possibilities. Since the introduction of English to India more than 2 centuries ago, the language has transmuted the very fabric of Indian society, culture, history, literature and governance. The idea of India cannot be conceived in its entirety without taking into consideration the epistemological role that English has played in its formation. The present globalized world order has added dimensions to English Studies which are radically different from those of India's colonial and postcolonial past. It is therefore imperative that the multitudinous shades and shadows of the discipline be re-examined with inputs drawn from the present context. This volume is for scholars and researchers of English literature and language studies, linguistics, and culture studies, and others interested in exploring new paradigms of engagement with the disciplinary formulation of English Studies in India.

An authentic, heartfelt and compelling narrative – straight from the horse's mouth – that reveals for the first time numerous unknown aspects of the life and times of one of the greatest legends of all time who stands out as a symbol of secular India. Dilip Kumar (born as Yousuf Khan), who began as a diffident novice in Hindi cinema in the early 1940s, went on to attain the pinnacle of stardom within a short time. He came up with spellbinding performances in one hit film after another – in his almost six-decade-long career – on the basis of his innovative capability, determination, hard work and never-say-die attitude. In this unique volume, Dilip Kumar traces his journey right from his birth to the present. In the process, he candidly recounts his interactions and relationships with a wide variety of people not only from his family and the film fraternity but also from other walks of life, including politicians. While seeking to set the record straight, as he feels that a lot of what has been written about him so far is 'full of distortions and misinformation', he narrates, in graphic detail, how he got married to Saira Banu, which reads like a fairy tale! Dilip Kumar relates, matter-of-factly, the event that changed his life: his meeting with

Devika Rani, the boss of Bombay Talkies, when she offered him an acting job. His first film was Jwar Bhata (1944). He details how he had to learn everything from scratch and how he had to develop his own distinct histrionics and style, which would set him apart from his contemporaries. After that, he soon soared to great heights with movies such as Jugnu, Shaheed, Mela, Andaz, Deedar, Daag and Devdas. In these movies he played the tragedian with such intensity that his psyche was adversely affected. He consulted a British psychiatrist, who advised him to switch over to comedy. The result was spectacular performances in laugh riots such as Azaad and Kohinoor, apart from a scintillating portrayal as a gritty tonga driver in Naya Daur. After a five-year break he started his 'second innings' with Kranti (1981), after which he appeared in a series of hits such as Vidhaata, Shakti, Mashaal, Karma, Saudagar and Qila.

The book presented here is the first work of Western literary criticism to examine the Hindi laghukath? - a modern Indian prose genre that has been published since the 1970s in Hindi newspapers and magazines and is characterised by its concise form (500 words on average) and socio-political agenda. The importance of the genre within the Hindi literary scene lies in the fact that the laghukath? is based on indigenous genres which have been modernised, whereas the Hindi short story and the novel are Western genres that have been appropriated and Indianised. A thorough investigation of around 280 primary texts accompanied by an evaluation of the relevant Hindi criticism gives a comprehensive literary analysis of this genre and its historical development. This allows, in conclusion, to delineate an "ideal type" of laghukath?, suggesting a range of compulsory, desirable and optional features. English translations of almost 50 representative Hindi texts complete the picture and thus provide an insight into this genre so far unknown to a Western audience.

A comprehensive reference to both spoken and literary Hindi provides translations for over thirty-six thousand words.

It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book ? acclaimed for being the first social history to document and understand India's new entrepreneurial groups ? Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

The design and analysis of efficient data structures has long been recognized as a key component of the Computer Science curriculum. Goodrich, Tomassia and Goldwasser's approach to this classic topic is based on the object-oriented paradigm as the framework of choice for the design of data structures. For each ADT presented in the text, the authors provide an associated Java interface. Concrete data structures realizing the ADTs are provided as Java classes implementing the interfaces. The Java code implementing fundamental data structures in this book is organized in a single Java package, net.datastructures. This package forms a coherent library of data structures and algorithms in Java specifically designed for educational purposes in a way that is complimentary with the Java Collections Framework.
