With the Veritas Prep Decision Tree and other proprietary techniques, you will be able to solve problems with speed and skill. Veritas Prep's revolutionary approach to Data Sufficiency has helped tens of thousands of students master the subject. Learn everything you need to know to solve any Data Sufficiency problem ever created.

Many books on reliability focus on either modeling or statistical analysis and require an extensive background in probability and statistics. Continuing its tradition of excellence as an introductory text for those with limited formal education in the subject, this classroom-tested book introduces the necessary concepts in probability and statistics within the context of their application to reliability. The Third Edition adds brief discussions of the Anderson-Darling test, the Cox proportionate hazards model, the Accelerated Failure Time model, and Monte Carlo simulation. Over 80 new end-of-chapter exercises have been added, as well as solutions to all odd-numbered exercises. Moreover, Excel workbooks, available for download, save students from performing numerous tedious calculations and allow them to focus on reliability concepts. Ebeling has created an exceptional text that enables readers to learn how to analyze failure, repair data, and derive appropriate models for reliability and maintainability as well as apply those models to all levels of design.

"This book provides the first ever overview of the history and development of Islam in Afghanistan. It covers every era from the conversion of Afghanistan through the medieval and early modern periods to the present day. Based on primary sources in Arabic, Persian, Pashto, Urdu and Uzbek, its depth and scope of coverage is unrivalled by any existing publication on Afghanistan. As well as state-sponsored religion, the chapters cover such issues as the rise of Sufism, Sharia, women's religiosity, transnational Islamism and the Taliban. Islam has been one of the most influential social and political forces in Afghan history. Providing idioms and organizations for both anti-state and anti-foreign mobilization, Islam has proven to be a vital socio-political resource in modern Afghanistan. Even as it has been deployed as the national cement of a multi-ethnic 'Emirate' and then 'Islamic Republic,' Islam has been no less a destabilizing force in dividing Afghan society. Yet despite the universal scholarly recognition of the centrality of Islam to Afghan history, its developmental trajectories have received relatively little sustained attention outside monographs and essays devoted to particular moments or movements. To help develop a more comprehensive, comparative and developmental picture of Afghanistan's Islam from the eighth century to the present, this edited volume brings together specialists on different periods, regions and languages. Each chapter forms a case study 'snapshot' of the Islamic beliefs, practices, institutions and authorities of a particular time and place in Afghanistan"--Provided by publishe

Presents an introduction to the processes of portfolio management, discussing

how to identify business goals, develop strategy, evaluate environmental and risk factors and successfully complete project objectives. Original.

Tenali Raman was a court jester, an intelligent advisor and one of the ashtadiggajas (elephants serving as pillar and taking care of all the eight sides) in the Bhuvana Vijayam (Royal Court) of the famed emperor of Vijaynagar Empire (City of joy) in Karnataka - Sri Krishna Deve Raya (1509- 1529), the model ruler par excellence to Ashoka, Samudra Gupta and Harsha Vardhana. Tenali Raman was an embodiment of acute wit and humour and an admirable poet of knowledge, shrewdness and ingenuity. In a short span, the legacy left behind by Tenali Raman attained eternity. All these qualities of Tenali Raman have been fully explored and displayed in this collection of vibrant fables and anecdotes. The book is a marvelous treasury of legends of Tenali Raman and Emperor Raya which evokes a long lost, never- never land: an enchanted world of alert wits and tricky gossips; crafty crooks with biting tongues, valiant brigands and an assorted cluster of uncommon common people. Narrated by the author and superbly illustrated, "e;Fix Your Problems - The Tenali Raman Way"e; is an engaging blend of earthly wisdom and sparkling humour which deal with concepts that have certain timelessness. Each story is followed by terse moral and incalculable snippets which are usually that little extra that brings the reader a little more closer to his goal on the way to realizations. Every story purveys a pithy folk wisdom that triumphs over all trials and tribulations. The moralistic traits sagaciously portrayed by these stories intend to develop a series of impacts that can reinforce certain key ideas by the rational mind of the readers in all facets of life and propel them to the top in every endeavour. The stories various layers of meaning educates, informs, advises, enthuses, inspires and amuses and thus have a teaching effects which makes this book a must read for every aspiring individuals who wants to race ahead in the world of opportunities and cusses. The book also exposes how richly endowed Bharata Khanda (India before invasions) had been in the east in the field of wisdom and knowledge down the ages of which the west is ignorant.

The processing of food is no longer simple or straightforward, but is now a highly inter-disciplinary science. A number of new techniques have developed to extend shelf-life, minimize risk, protect the environment, and improve functional, sensory, and nutritional properties. The ever-increasing number of food products and preservation techniques cr

A series of six books for Classes IX and X according to the CBSE syllabus. Each class divided into 3 parts. Part 1 - Physics. Part 2 - Chemistry. Part 3 - Biology Gives a clear explanation of the basic principles of task-based teaching Contains many examples of tasks and lesson plans from teachers around the world Provides sample materials and lesson plans showing how to focus on meaning, language, and form Includes guidance on adapting existing course materials to include a task-based element Suitable for teacher training courses or for individual teachers Authors are leading world experts on task-based teaching

Bibhutibhushan Bandyopadhyay was one of the greatest writers in modern Bengali literature, best known for his autobiographical novel *Pather Panchali*, which, along with another of Bandyopadhyay's books, formed the basis for Satyajit Ray's classic *Apu Trilogy*. In this semi-autobiographical novel, Satyacharan is a young graduate in 1920s Calcutta, who, unable to find a job in the city, takes up the post of a 'manager' of a vast tract of forested land in neighboring Bihar. As he is increasingly enchanted and hypnotized by the exquisite beauty of nature, he is burdened with the painful task of clearing this land for cultivation. As ancient trees fall to the cultivator's axe, indigenous tribes--to whom the forest had been home for millennia--lose their ancient way of life. The promise of 'progress' and 'development' brings in streams of landless laborers, impoverished schoolmasters and starving boys from around the region, and the narrator chronicles in visionary prose the tale of destruction and dispossession that is the universal saga of man's struggle to bend nature to his will. Written in 1937-39, and now available in English translation, *Aranyak* is an unforgettable account of hard lives in a place of vanishing beauty, preserved here for all time by a brilliant artist.

Twenty-week lecture presented by Elijah Muhammad when dedicating Muhammad Temple #2 in Chicago, June-October, 1972.

This 'English Speaking & Grammar' book of Cromosys Language Research and Education Center is designed to teach you English from very basic to the advanced level. The lessons and study materials uniquely designed, which you will not find in any other books, are to guide you to be fluent following correct usage of grammar. Having done the research over English in twelve years, I am confident to assure you that it has everything that you need to get a good command over English. Its step-by-step explanation to tense, modals, advanced modals, voice and preposition with rules and alerts guarantee your success. You will feel that this is the only book you were always in the need of. The communication in any language without following the rules degrades the standard and corrupts the meaning. As the world is changing day by day, English is incorporating in all the sectors of human life around the globe. Every day, the use of English is increasing and a person with good knowledge of it is able to get a good job. And so, the call centers and print and visual media have great demand of those who are good in this language. The modern ventures of newspapers, magazines, and movies have contributed a lot to make English strong, sense-touching, smooth and beautiful. As English has advanced a lot in last twenty-five years, the universal standard of it has adopted many new sentence structures and grammar patterns, which are never taught to the students in academic schools. And that is why English remains difficult to many people.

The book focuses to foster new and original research ideas and results in three broad areas: computing, analytics, and networking with its prospective applications in the various interdisciplinary domains of engineering. This is an exciting and emerging interdisciplinary area in which a wide range of theory and methodologies are being investigated and developed to tackle complex and challenging real world problems. It also provides insights into the International Conference on Computing Analytics and Networking (ICCAN 2017) which is a premier international open forum for scientists, researchers and technocrats in academia as well as in industries from different parts of the world to present, interact, and exchange the state of art of concepts, prototypes, innovative research ideas in several diversified fields. The book includes invited

keynote papers and paper presentations from both academia and industry to initiate and ignite our young minds in the meadow of momentous research and thereby enrich their existing knowledge. The book aims at postgraduate students and researchers working in the discipline of Computer Science & Engineering. It will be also useful for the researchers working in the domain of electronics as it contains some hardware technologies and forthcoming communication technologies.

In this book, by means of an engrossing fictional story which skilfully incorporates various historical figures and many true incidents as well as the author's own personal experiences, fortified with excerpts from newspapers and other documents, Humayun Ahmed manages to produce a remarkably vivid and well balanced picture of the political events and bloody civil war which led to the emergence of Bangladesh as an independent state in 1971. No other work on the subject has the same breadth of vision or the same power to absorb and engage the reader. This is essential reading for anyone who wishes to explore the human reality behind the stark facts of the Bangladesh Liberation War. In the present translation Humayun Ahmed's highly accessible Bengali style has been recreated in modern colloquial English, making an easy read for Western readers. This edition also comprises explanatory notes to assist those unfamiliar with the cultural and historical background to the novel.

Judiciary is an essential and integral part of a state, and its independence is a prerequisite of a liberal democratic state. Bangladesh, which emerged through a war of independence against the Pakistani in 1971, included democracy as one of the state principles in its constitution in 1972, and the constitution ensured the separation of judiciary from executive, and independence of the judiciary. I had the opportunity and honor to observe this transformation and the hindrances as a participant of the Bangladeshi judiciary since 1974 -- rising from a practitioner at a lower court in the north-eastern district of Sylhet to the highest judicial position of the country, the Chief Justice of the Supreme Court. But, in 2017, after delivering a historic verdict in favor of the independence of judiciary, I was forced to resign and exiled by the current government. The series of unfortunate and unprecedented events, which led to the tension between the executive and judiciary and subsequent improper action against me, began on September 17, 2014 when the Bangladesh Parliament amended the constitution to provide power of impeaching judges to the members of the parliament. The 16th Amendment of the Constitution deleted the provision of removing Judges from office through a highly powerful committee of peers called the Supreme Judicial Council (SJC). The SJC, as stipulated in the constitution, also allowed the accused to have self-defense. Most importantly, the process was meant to protect the judiciary from being subjected to political vagaries and serving political leaders than the citizens. On May 5, 2016, a special High Court bench declared the amendment illegal and unconstitutional. Soon after the verdict, the MPs blasted judges for nullifying their legislation and began displaying sheer disrespect to the judiciary. However, the state party opted for an appeal which was heard by a seven-member full appellate bench. It was incumbent on me to head the Bench. On July 3, 2017, the bench unanimously rejected the appeal upholding the High Court verdict. The complete text of the unanimous verdict, including the observations, were made public on August 1, 2018. Following the appellate decision, on September 13 the parliament passed a resolution calling for legal steps to nullify the Supreme Court verdict. Prime Minister and other members of her party and

ministers blasted me for going against the parliament. Cabinet members including the Law Minister began smearing me alleging misconduct and corruption. While I remained confined at my official residence and lawyers and judges were prevented to visit me, media were told that I am unwell and have sought medical leave. Various ministers said I will go abroad on medical leave. On October 14, 2017, as I had to leave the country, I tried to clear the air in a public statement that I am neither unwell nor am I leaving the country for good. I was hoping that my physical absence combined with Court's regular vacation will allow the situation to calm down and good sense will prevail; that the government will understand that the essence of the Verdict - upholding the independence of judiciary - is beneficial to the nation and the state. Finally, in the face of intimidation and threats to my family and friends by the country's military intelligence agency called the Directorate General of the Defense Forces Intelligence (DGDFI), I submitted resignation from abroad. This book comprises an introduction, highlighting my judicial life, experiences, challenges before the judiciary in Bangladesh, its struggle for independence, sanctity of the legal profession, erosion of values in judicial services, political interference and the state of nascent democracy.

Comprehensive course divided into 20 units, each focusing on a different grammar point. With glossary of grammar points, various exercises, illustrations, examples, and answers. Suitable for self-study, building vocabulary, and developing grammar skills.

When it comes to creating powerful and effective hacking tools, Python is the language of choice for most security analysts. But just how does the magic happen? In *Black Hat Python*, the latest from Justin Seitz (author of the best-selling *Gray Hat Python*), you'll explore the darker side of Python's capabilities—writing network sniffers, manipulating packets, infecting virtual machines, creating stealthy trojans, and more. You'll learn how to: –Create a trojan command-and-control using GitHub –Detect sandboxing and automate common malware tasks, like keylogging and screenshotting –Escalate Windows privileges with creative process control –Use offensive memory forensics tricks to retrieve password hashes and inject shellcode into a virtual machine –Extend the popular Burp Suite web-hacking tool –Abuse Windows COM automation to perform a man-in-the-browser attack –Exfiltrate data from a network most sneakily Insider techniques and creative challenges throughout show you how to extend the hacks and how to write your own exploits. When it comes to offensive security, your ability to create powerful tools on the fly is indispensable. Learn how in *Black Hat Python*. Uses Python 2

This book examines the rise of religious extremism in Pakistan, particularly since 1947, and analyzes its connections to the Pakistani army's corporate interests and U.S.-Pakistan relations. It includes profiles of leading Pakistani militant groups with details of their origins, development, and capabilities. The author begins with an historical overview of the introduction of Islam to the Indian sub-continent in 712 AD, and brings the story up to the present by describing President Musharraf's handling of the war on terror. He provides a detailed account of the political developments in Pakistan since 1947 with a focus on the influence of religious and military forces. He also discusses regional politics, Pakistan's attempt to gain nuclear power status, and U.S.-Pakistan relations, and offers predictions for Pakistan's domestic and regional prospects.

Reviews the structure and content focus of the GRE General Test, provides sample questions, and suggests strategies for taking either the written or computerized GRE

This book compares constructs from C with constructs from Ada in terms of levels of abstractions. Studying these languages provides a firm foundation for an extensive examination of object-oriented language support in C++ and Ada 95. It explains what alternatives are available to the language designer, how language constructs should be used

in terms of safety and readability, how language constructs are implemented and which ones can be efficiently compiled and the role of language in expressing and enforcing abstractions. The final chapters introduce functional (ML) and logic (Prolog) programming languages to demonstrate that imperative languages are not conceptual necessities for programming.

#1 NEW YORK TIMES BESTSELLER • ONE OF ESSENCE'S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS In this iconic memoir of his early days, Barack Obama “guides us straight to the intersection of the most serious questions of identity, class, and race” (The Washington Post Book World). “Quite extraordinary.”—Toni Morrison In this lyrical, unsentimental, and compelling memoir, the son of a black African father and a white American mother searches for a workable meaning to his life as a black American. It begins in New York, where Barack Obama learns that his father—a figure he knows more as a myth than as a man—has been killed in a car accident. This sudden death inspires an emotional odyssey—first to a small town in Kansas, from which he retraces the migration of his mother’s family to Hawaii, and then to Kenya, where he meets the African side of his family, confronts the bitter truth of his father’s life, and at last reconciles his divided inheritance. Praise for *Dreams from My Father* “Beautifully crafted . . . moving and candid . . . This book belongs on the shelf beside works like James McBride’s *The Color of Water* and Gregory Howard Williams’s *Life on the Color Line* as a tale of living astride America’s racial categories.”—Scott Turow “Provocative . . . Persuasively describes the phenomenon of belonging to two different worlds, and thus belonging to neither.”—The New York Times Book Review “Obama’s writing is incisive yet forgiving. This is a book worth savoring.”—Alex Kotlowitz, author of *There Are No Children Here* “One of the most powerful books of self-discovery I’ve ever read, all the more so for its illuminating insights into the problems not only of race, class, and color, but of culture and ethnicity. It is also beautifully written, skillfully layered, and paced like a good novel.”—Charlayne Hunter-Gault, author of *In My Place* “*Dreams from My Father* is an exquisite, sensitive study of this wonderful young author’s journey into adulthood, his search for community and his place in it, his quest for an understanding of his roots, and his discovery of the poetry of human life. Perceptive and wise, this book will tell you something about yourself whether you are black or white.”—Marian Wright Edelman

The Standard for Portfolio Management Project Management Inst

Treasure-hunting team Sam and Remi Fargo must protect a book that could help locate lost Mayan cities in this adventure in the #1 New York Times bestselling series. Husband-and-wife team Sam and Remi Fargo are in Mexico, packing medical supplies in the wake of an earthquake, when they come upon a remarkable discovery—the mummified remains of a man clutching an ancient sealed pot. Within the pot is a Mayan book, a codex larger than any known before. The book contains astonishing information about the Mayans, their cities, and about mankind itself. The secrets are so powerful that some people would do anything to possess them—as the Fargos are about to find out. Many men and women are going to die for that book.

Harness the power of your subconscious to create a life you desire! *The Power of Your Subconscious Mind* teaches us how to remove the subconscious obstacles that prevent us from achieving the success we wish for. In this book, bestselling author Joseph Murphy asserts that life events are actually the result of the workings of our conscious and subconscious minds. He suggests practical techniques through which one can change one’s destiny, principally by focusing and redirecting this miraculous energy. In these pages are the ways in which one can unleash the extraordinary mental powers to acquire self-confidence, attain professional success, create wealth, build harmonious relationships, overcome fears, get rid of bad habits and promote overall well-being and happiness. Covering a variety of topics from healing to academia to riches, the author cites numerous compelling examples of the power of our thoughts and beliefs in influencing our reality. When we change our thinking and prepare

our subconscious mind, we change our destiny. Joseph Murphy was an American author and New Thought minister, ordained in Divine Science and Religious Science. A popular speaker, Murphy lectured on both American coasts and in Europe, Asia, and South Africa. Murphy is considered one of the pioneering voices of affirmative-thinking philosophy.

Python is fast becoming the programming language of choice for hackers, reverse engineers, and software testers because it's easy to write quickly, and it has the low-level support and libraries that make hackers happy. But until now, there has been no real manual on how to use Python for a variety of hacking tasks. You had to dig through forum posts and man pages, endlessly tweaking your own code to get everything working. Not anymore. Gray Hat Python explains the concepts behind hacking tools and techniques like debuggers, trojans, fuzzers, and emulators. But author Justin Seitz goes beyond theory, showing you how to harness existing Python-based security tools—and how to build your own when the pre-built ones won't cut it. You'll learn how to: –Automate tedious reversing and security tasks –Design and program your own debugger –Learn how to fuzz Windows drivers and create powerful fuzzers from scratch –Have fun with code and library injection, soft and hard hooking techniques, and other software trickery –Sniff secure traffic out of an encrypted web browser session –Use PyDBG, Immunity Debugger, Sulley, IDAPython, PyEMU, and more The world's best hackers are using Python to do their handiwork. Shouldn't you?

Do you want to learn Korean the fast, fun and easy way? And do you want to master daily conversations and speak like a native? Then this is the book for you. Learn Korean: Must-Know Korean Slang Words & Phrases by KoreanClass101 is designed for Beginner-level learners. You learn the top 100 must-know slang words and phrases that are used in everyday speech. All were hand-picked by our team of Korean teachers and experts. Here's how the lessons work: • Every Lesson is Based on a Theme • You Learn Slang Words or Phrases Related to That Theme • Check the Translation & Explanation on How to Use Each One And by the end, you will have mastered 100+ Korean Slang Words & phrases!

Featuring contributions from worldwide leaders in the field, the carefully crafted Electric Power Generation, Transmission, and Distribution, Third Edition (part of the five-volume set, The Electric Power Engineering Handbook) provides convenient access to detailed information on a diverse array of power engineering topics. Updates to nearly every chapter keep this book at the forefront of developments in modern power systems, reflecting international standards, practices, and technologies. Topics covered include: Electric power generation: nonconventional methods Electric power generation: conventional methods Transmission system Distribution systems Electric power utilization Power quality L.L. Grigsby, a respected and accomplished authority in power engineering, and section editors Saifur Rahman, Rama Ramakumar, George Karady, Bill Kersting, Andrew Hanson, and Mark Halpin present substantially new and revised material, giving readers up-to-date information on core areas. These include advanced energy technologies, distributed utilities, load characterization and modeling, and power quality issues such as power system harmonics, voltage sags, and power quality monitoring. With six new and 16 fully revised chapters, the book supplies a high level of detail and, more importantly, a tutorial style of writing and use of photographs and graphics to help the reader understand the material. New chapters cover: Water Transmission Line Reliability Methods High Voltage Direct Current Transmission System Advanced Technology High-Temperature Conduction Distribution Short-Circuit Protection Linear Electric Motors A volume in the Electric Power Engineering Handbook, Third Edition. Other volumes in the set: K12648 Power Systems, Third Edition (ISBN: 9781439856338) K13917 Power System Stability and Control, Third Edition (ISBN: 9781439883204) K12650 Electric Power Substations Engineering, Third Edition (ISBN: 9781439856383) K12643 Electric Power Transformer Engineering, Third Edition (ISBN: 9781439856291)

From May 2009 through October 2011, arrests were made for 32 "homegrown," jihadist-

inspired terrorist plots by American citizens or legal permanent residents of the United States. Two of these resulted in attacks--U.S. Army Major Nidal Hasan's alleged assault at Fort Hood in Texas and Abdulhakim Muhammed's shooting at the U.S. Army-Navy Career Center in Little Rock, AR--and produced 14 deaths. By comparison, in more than seven years from the September 11, 2001, terrorist strikes (9/11) through April 2009, there were 21 such plots. Two resulted in attacks, and no more than six plots occurred in a single year (2006). The apparent spike in such activity from May 2009 to October 2011 suggests that at least some Americans--even if a tiny minority--continue to be susceptible to ideologies supporting a violent form of jihad. This report describes homegrown violent jihadists and the plots and attacks that have occurred since 9/11. For this report, "homegrown" and "domestic" are terms that describe terrorist activity or plots perpetrated within the United States or abroad by American citizens, legal permanent residents, or visitors radicalized largely within the United States. The term "jihadist" describes radicalized individuals using Islam as an ideological and/or religious justification for their belief in the establishment of a global caliphate, or jurisdiction governed by a Muslim civil and religious leader known as a caliph. The term "violent jihadist" characterizes jihadists who have made the jump to illegally supporting, plotting, or directly engaging in violent terrorist activity. The report also discusses the radicalization process and the forces driving violent extremist activity. It analyzes post-9/11 domestic jihadist terrorism and describes law enforcement and intelligence efforts to combat terrorism and the challenges associated with those efforts. It also outlines actions underway to build trust and partnership between community groups and government agencies and the tensions that may occur between law enforcement and engagement activities. Appendix A provides details about each of the post-9/11 homegrown jihadist terrorist plots and attacks. Finally, the report offers policy considerations for Congress.

This book presents various computational and cognitive modeling approaches in the areas of health, education, finance, environment, engineering, commerce, and industry. It is a collection of selected conference papers presented at the International Conference on Trends in Computational and Cognitive Engineering (TCCE 2020). It shares cutting-edge insights and ideas from mathematicians, engineers, scientists, and researchers and discusses fresh perspectives on problem solving in a range of research areas.

Today, it is considered good business practice for tourism industries to support their micro and macro environment by means of strategic perspectives. This is necessary because we cannot contemplate companies existing without their environment. If companies do not involve themselves in such undertakings, they are in danger of isolating themselves from the shareholder. That, in turn, creates a problem for mobilizing new ideas and receiving feedback from their environment. In this respect, the contributions of academics from international level together with the private sector and business managers are eagerly awaited on topics and sub-topics within Strategies for Tourism Industry - Micro and Macro Perspectives.

NEW YORK TIMES BESTSELLER A GOOD MORNING AMERICA Book Club Pick! A magnificent new novel from the Nobel laureate Kazuo Ishiguro—author of *Never Let Me Go* and the Booker Prize-winning *The Remains of the Day*. *Klara and the Sun*, the first novel by Kazuo Ishiguro since he was awarded the Nobel Prize in Literature, tells the story of Klara, an Artificial Friend with outstanding observational qualities, who, from her place in the store, watches carefully the behavior of those who come in to browse, and of those who pass on the street

outside. She remains hopeful that a customer will soon choose her. Klara and the Sun is a thrilling book that offers a look at our changing world through the eyes of an unforgettable narrator, and one that explores the fundamental question: what does it mean to love? In its award citation in 2017, the Nobel committee described Ishiguro's books as "novels of great emotional force" and said he has "uncovered the abyss beneath our illusory sense of connection with the world."

Updated and expanded second edition covers all aspects of capsule technology, including history, standards, methods and equipment used in manufacture, filling, printing, weighing, cleaning and inspecting of both hard and soft capsules.

This book presents original, peer-reviewed research papers from the 4th Purple Mountain Forum –International Forum on Smart Grid Protection and Control (PMF2019-SGPC), held in Nanjing, China on August 17–18, 2019. Addressing the latest research hotspots in the power industry, such as renewable energy integration, flexible interconnection of large scale power grids, integrated energy system, and cyber physical power systems, the papers share the latest research findings and practical application examples of the new theories, methodologies and algorithms in these areas. As such book a valuable reference for researchers, engineers, and university students.

Travelling on foot, in jeeps, on rafts in the far-flung Himalayan regions of Northern Pakistan, Kathleen Jamie found a country in the tumult of change. She met Sufi mystics and Irish missionaries; young men and women caught between East and West, and women in purdah with whom she lived and became friends. This book won the Scottish Arts Council Book Award 1992.
