S Ben Porath

Official Gazette of the United States Patent and Trademark Office ,2002

Fundamentals of Picoscience Klaus D. Sattler,2013-09-26 Ushering in the next technological era, this state-of-the-art book focuses on the instrumentation and experiments emerging at the picometer scale. International scientists and researchers at the forefront of the field address the key challenges in developing new instrumentation and techniques to visualize and measure structures at this sub-nanometer level. The book helps you understand how picoscience is an extension of nanoscience, determine which experimental technique to use in your research, and connect basic studies to the development of next-generation picoelectronic devices.

Concrete in the Service of Mankind Ravindra Dhir,Neil Henderson,2003-09-02 Concrete is ubiquitous and unique, found in every developed and developing country. Indeed, there are no alternatives to concrete as a volume construction material for infrastructure. This raises important questions of how concrete should be designed and constructed for cost effective use in the the short and long term, and to encourage further radical development. Equally, it must be environmentally friendly during manufacture, in an aesthetic presentation in structures and in the containment of harmful materials.; The central theme of the Congress is Concrete in the Service of Mankind, under which five self-contained Conferences, each dealing with a particular aspect, are planned. The Congress offers opportunity to discuss how to improve and extend this service to mankind using responsible exploitation, underwritten by sound technical understanding and research base. It brings together the shared skills and experience of the various disciplines involved in the construction process world wide.; This major publication continues the tradition established by Dundee University of organizing major international conferences every three years dealing with some aspect of concrete and also the link between Spon and Dundee University for publication of the proceedings.; This book should be of interest to concrete technologists; contractors; civil engineers; consultants; government agencies; research organizations.

Metalanguages for Dissecting Translation Processes Rei Miyata,Masaru Yamada,Kyo Kageura,2022-07-04 This edited volume covers the development and application of metalanguages for concretely describing and communicating translation processes in practice. In a modern setting of project-based translation, it is crucial to bridge the gaps between various actors involved in the translation process, especially among clients, translation service providers (TSPs), translators, and technology developers. However, we have been confronted with the lack of common understanding among them about the notion and detailed mechanisms of translation. Against this backdrop, we are developing systematic, fine-grained metalanguages that are designed to describe and analyse translation processes in concrete terms. Underpinned by the rich accumulation of theoretical findings in translation studies and established standards of practical translation services, such as ISO 17100, our metalanguages extensively cover the core processes in translation projects, namely project management, source document analysis, translation, and revision. Gathering authors with diverse backgrounds and expertise, this book proffers the fruits of the contributors' collaborative endeavour; it not only provides practicable metalanguages, but also reports on wide-ranging case studies on the application of metalanguages in practical and pedagogical scenarios. This book supplies concrete guidance for those who are involved in the translation practices and translation training/education. In addition to being of practical use, the metalanguages reflect explication of the translation process. As such, this book provides essential insights for researchers and students in the field of translation studies. The up-to-date versions of the metalanguages, related materials, and the corrigendum for the book content are available on our project website: <https://tntc-project.github.io>

Multimedia Information Systems in Practice Wing S. Chow,1999 With the help of advanced technology in telecommunications, the benefits of multimedia applications have become even more significant than when it was used as just as a form for strategic advantage by individuals. The International Conference on Multimedia and Telecommunications Management, held December 17-19, 1998, highlights the recent significant research in the areas of multimedia and telecommunications applications in industry. This book collects the 58 reviewed papers from 18 countries, that were chosen out of 140 submissions for presentation at the conference. An introductory paper entitled Multimedia in Facet: A Facet of Hong Kong Environment by Wing S Chow et al., is included as an introductory chapter to render readers a better understanding of the study subjects. This volume is useful for researchers, practitioners and students alike for an update on the mosr recent developments in the ever-changing and significant field of multimedia and telecommunications.
