"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

No contemporary figure is more demonized than the Islamist foreign fighter who wages jihad around the world. Spreading violence, disregarding national borders, and rejecting secular norms, so-called jihadists seem opposed to universalism itself. In a radical departure from conventional wisdom on the topic, *The Universal Enemy* argues that transnational jihadists are engaged in their own form of universalism: these fighters struggle to realize an Islamist vision directed at all of humanity, transcending racial and cultural difference. Anthropologist and attorney Darryl Li reconceptualizes jihad as armed transnational solidarity under conditions of American empire, revisiting a pivotal moment after the Cold War when ethnic cleansing in the Balkans dominated global headlines. Muslim volunteers came from distant lands to fight in Bosnia-Herzegovina alongside their co-religionists, offering themselves as an alternative to the US-led international community. Li highlights the parallels and overlaps between transnational jihads and other universalisms such as the War on Terror, United Nations peacekeeping, and socialist Non-Alignment. Developed from more than a decade of research with former fighters in a half-dozen countries, *The Universal Enemy* explores the relationship between jihad and American empire to shed critical light on both.

In his fourth *God's Generals* volume, Roberts Liardon chronicles God's great healing evangelists of the twentieth century. Journey with such paragons of faith as: Oral Roberts—one of the most influential Christian leaders in the twentieth century, Roberts had a healing ministry that spread from rural tent meetings to a world-class university, hospital, and medical school. Lester Sumrall—after being miraculously healed of tuberculosis as a boy, Sumrall dedicated the rest of his life to sharing the gospel and God's healing power with audiences around the world, both in person and through television broadcasts. Charles and Frances Hunter—often called the "Happy Hunters," Charles and Frances were known around the world as two of the most anointed and enthusiastic evangelists on earth. George Jeffreys—this Welsh Pentecostal preacher ministered along with his brother Stephen at camps, conventions, and church meetings across England and Ireland, with reports of miraculous healings and other acts of God accompanying them. F. F. Bosworth—a Depression-era Pentecostal faith healer and one of the founders of the Assemblies of God, Bosworth was known during the 1920s for his interdenominational "big tent" revivals and large auditorium healing meetings. As you read about the lives of these ministry pioneers, your faith for signs and miracles will grow as you anticipate seeing God's mighty hand move in the church today.

What are the links between people's beliefs and the foods they choose to eat? In the modern Western world, dietary choices are a topic of ethical and political debate, but how can centuries of Christian thought and practice also inform them? And how do reasons for abstaining from particular foods in the modern world compare with earlier ones? This book will shed new light on modern vegetarianism and related forms of dietary choice by situating them in the context of historic Christian practice. It will show how the theological significance of embodied practice may be retrieved and reconceived in the present day. Food and diet is a neglected area of Christian theology, and Christianity is conspicuous among the modern world's religions in having few dietary rules or customs. Yet historically, food and the practices surrounding it have significantly shaped Christian lives and identities. This collection, prepared collaboratively, includes contributions on the relationship between Christian beliefs and food practices in specific historical contexts. It considers the relationship between eating and believing from non-Christian perspectives that have in turn shaped Christian attitudes and practices. It also examines ethical arguments about vegetarianism and their significance for emerging Christian theologies of food. This important volume consists of 8 articles on the history of religions, some of them previously unpublished, that represent all 3 phases in Joachim Wach's thought. Wach, who taught the history of religions at the Divinity School of the University of Chicago from 1945 until his death in 1955, argued that the primary goal of the study of religion is the understanding of the religious experience and its expressions. Chapters include: master and disciple; Mahayana Buddhism; sociology of religion; Radhakrishnan and the comparative study of religion; religion in America; on teaching history of religions; and on understanding.

"Citizenship is salvation," preached Noble Drew Ali, leader of the Moorish Science Temple of America in the early twentieth century. Ali's message was an aspirational call for black Americans to undertake a struggle for recognition from the state, one that would both ensure protection for all Americans through rights guaranteed by the law and correct the unjust implementation of law that prevailed in the racially segregated United States. Ali and his followers took on this mission of citizenship as a religious calling, working to carve out a place for

themselves in American democracy and to bring about a society that lived up to what they considered the sacred purpose of the law. In *The Aliites*, Spencer Dew traces the history and impact of Ali's radical fusion of law and faith. Dew uncovers the influence of Ali's teachings, including the many movements they inspired. As Dew shows, Ali's teachings demonstrate an implicit yet critical component of the American approach to law: that it should express our highest ideals for society, even if it is rarely perfect in practice. Examining this robustly creative yet largely overlooked lineage of African American religious thought, Dew provides a window onto religion, race, citizenship, and law in America.

In the polygamous Fundamentalist Church of Jesus Christ of Latter-day Saints (FLDS), girls can become valuable property as plural wives, but boys are expendable, even a liability. In this powerful and heartbreaking account, former FLDS member Brent Jeffs reveals both the terror and the love he experienced growing up on his prophet's compound—and the harsh exile existence that so many boys face once they have been expelled by the sect. Brent Jeffs is the nephew of Warren Jeffs, the imprisoned leader of the FLDS. The son of a prominent family in the church, Brent could have grown up to have multiple wives of his own and significant power in the 10,000-strong community. But he knew that behind the group's pious public image—women in chaste dresses carrying babies on their hips—lay a much darker reality. So he walked away, and was the first to file a sexual-abuse lawsuit against his uncle. Now Brent shares his courageous story and that of many other young men who have become “lost boys” when they leave the FLDS, either by choice or by expulsion. Brent experienced firsthand the absolute power that church leaders wield—the kind of power that corrupts and perverts those who will do anything to maintain it. Once young men no longer belong to the church, they are cast out into a world for which they are utterly unprepared. More often than not, they succumb to the temptations of alcohol and other drugs. Tragically, Brent lost two of his brothers in this struggle, one to suicide, the other to overdose. In this book he shows that lost boys can triumph and that abuse and trauma can be overcome, and he hopes that readers will be inspired to help former FLDS members find their way in the world.

Illuminating the Darkness critically addresses the issue of racial discrimination and colour prejudice in religious history. Tackling common misconceptions, the author seeks to elevate the status of blacks and North Africans in Islam. The book is divided into two sections: Part I of the book explores the concept of race, 'blackness', slavery, interracial marriage and racism in Islam in the light of the Qur'an, Hadith and early historical sources. Part II of the book consists of a compilation of short biographies of noble black and North African Muslim men and women in Islamic history including Prophets, Companions of the Prophet and more recent historical figures. Following in the tradition of revered scholars of Islam such as al-Jahiz, Ibn al-Jawzi and al-Suyuti who wrote about this topic, *Illuminating the Darkness* is structured according to a similar monographic arrangement.

The present collection seeks to contribute toward finding that distance by making the tradition of thought more a living reality and not an object of arid analyses. Unlike most collections the present one transcends disciplinary boundaries, as it acknowledges the interconnectedness of philosophical, theological, and political arguments on these themes.

Shaikh Muhammad al-Tahir ibn Ashur is the most renowned Zaytuna Imam and one of the great Islamic scholars of the 20th century. The publication of this translation of Shaikh Ibn Ashur's *Treatise on Maqasid al-Shari'ah* is a breakthrough in studies on Islamic law in the English language. In this book, Ibn Ashur proposed Maqasid as a methodology for the renewal of the theory of Islamic law, which has not undergone any serious development since the era of the great imams. Ibn Ashur – quite courageously – also addressed the sensitive topic of the intents/Maqasid of Prophet Muhammad (SAAS) behind his actions and decisions. He introduced criteria to differentiate between the Prophetic traditions that were meant to be part of Islamic law and the Prophetic actions/ sayings that were meant to be for the sake of specific purposes such as political leadership, court judgment, friendly advice, and conflict resolution. But Ibn Ashur's most significant contribution in this book has been the development of new Maqasid by coining new, contemporary, terminology that were never formulated in traditional *usul al-fiqh*. For example, Ibn Ashur developed the theory of the 'preservation of lineage' into 'the preservation of the family system', the 'protection of true belief' into 'freedom of beliefs', etc. He also introduced the concepts of 'orderliness', 'natural disposition', 'freedom', 'rights', 'civility', and 'equality' as Maqasid in their own right, and upon which the whole Islamic law is based. This development opens great opportunities for Islamic law to address current and real challenges for Muslim societies and Muslim minorities.

This innovative study examines patterns of change in Shii symbols and rituals over the past two centuries to reveal how modernization has influenced the societal, political, and religious culture of Iran. Shiis, who support the Prophet Mohammads progeny as his successors in opposition to the Sunni caliphate tradition, make up 10 to 15 percent of the worlds Muslim population, roughly half of whom live in Iran. Throughout the early history of the Islamic Middle East, the Sunnis have been associated with the state and the ruling elite, while Shiis have most often represented the political opposition and have had broad appeal among the masses. Moharram symbols and rituals commemorate the Battle of Karbala in 680 CE, in which the Prophet Mohammads grandson Hoseyn and most of his family and supporters were massacred by the troops of the Umayyad caliph Yazid. Moharram symbols and rituals are among the most pervasive and popular aspects of Iranian culture and society. This book traces

patterns of continuity and change of Moharran symbols and rituals in three aspects of Iranian life: the importance of these rituals in promoting social bonds, status, identities, and ideals; ways in which the three major successive regimes (Qujars, Pahlavis, and the Islamic Republic), have either used these rituals to promote their legitimacy, or have suppressed them because they viewed them as a potential political threat; and the uses of Moharram symbolism by opposition groups interested in overthrowing the regime. While the patterns of government patronage have been radically discontinuous over the past two centuries, the roles of these rituals in popular society and culture have been relatively continuous or have evolved independently of the state. The political uses of modern-day rituals and the enduring symbolism of the Karbala narratives continue today.

The struggle to attain inner peace has been with humankind since the earliest times but what does it mean and is it even attainable? Are people being deprived of inner peace because of obstacles in the path, both real or perceived? How does a materialistic outlook affect one's search for inner peace? Most importantly, what is the only guaranteed way to achieve true and lasting inner peace? In this book, Jamaican-born scholar Dr. Bilal Philips examines the topic in detail and provides concrete and satisfying answers.

From Rumi's whirling dervishes in Turkey over 700 years ago, to circles of silent mystics in the West today, this book reveals the history and practices of Sufism, the ancient but still active system of Islamic mysticism which has long been the spiritual current in Islam that counterbalances fundamentalism. Eric Geoffroy is an authority on Sufism, and he shows us this increasingly popular contemplative dimension of Islam, which is little understood in the West.

Many books have been written about the life of the Prophet Muhammad (SAW). In writing this book, the author had a specific objective. He used the life of the Prophet (SAW) to go onto depth about the Prophet (SAW) many historians only touched on the various aspects of his life. This book goes into detail and provides reasons and explanations for whatever took place. It is a blend of modern analysis and ancient detail. Its objective is to nurture faith, purify characters and fan the struggle to embrace the truth and be faithful to it. Indeed, the life of the Prophet (SAW) has been documented as a message for practical implementation, not intellectual entertainment'You may think that you have studied the life of Muhammad by following his history from birth to death but this is a grave mistake. You will never really understand the Sirah unless you study the noble Qur'an and the purified Sunnah. The amount that you derive from these will tell the strength of your connection with the prophet of Islam, sallallahu `alaihi wa sallam' From the EpilogueAn important work of the Egyptian scholar Sheikh Muhammad al-Ghazali. Drawing upon his profound classical Islamic learning and an extensive knowledge of modern science, Sheikh al-Ghazali has broken new ground in the study of Seerah, bringing to bear a fresh but wholly authentic approach. This is a work which all serious students should have, to complement the Seerah of the Prophet Muhammad (SAW)

Gold Winner of the 2012 Benjamin Franklin Award and the 2012 Independent Publisher Book Award! This is a definitive book on the Sufi "way of blame" that addresses the cultural life of Sufism in its entirety. Originating in ninth-century Persia, the "way of blame" (Arab. malamatiyya) is a little-known tradition within larger Sufism that focused on the psychology of egoism and engaged in self-critique. Later, the term referred to those Sufis who shunned Islamic literalism and formalism, thus being worthy of "blame." Yannis Toussulis may be the first to explore the relation between this controversial movement and the larger tradition of Sufism, as well as between Sufism and Islam generally, throughout history to the present. Both a Western professor of the psychology of religion and a Sufi practitioner, Toussulis has studied malamatiyya for over a decade. Explaining Sufism as a lifelong practice to become a "perfect mirror in which God contemplates Himself," he draws on and critiques contemporary interpretations by G. I Gurdjieff, J. G. Bennett, and Idries Shah, as well as on Frithjof Schuon, Martin Lings, and Seyyed Hossein Nasr. He also contributes personal research conducted with one of the last living representatives of the way of blame in Turkey today, Mehmet Selim Ozic.

In any event, if there is any division between a Muslim and a Christian on the grounds of dogma, belief, ethics or morality, then the cause of such conflict could be traced to an utterance of Paul found in his books of Corinthians, Phillipians, Galatians, Thessolarians, etc., in the Bible. As against the teaching of the Master (Jesus) that salvation only comes through keeping of the commandments (Mathew 19:16-17), Paul nails the law and the commandments to the cross (Colossians 2:14) and claims that salvation can only be obtained through the death and resurrection of Jesus Christ:- "If Christ be not risen from the dead, then our preaching is vain, and your faith is also vain." (1 Corinthians 15:14) Jihad, with its many terrifying associations, is a term widely used today, though its meaning is poorly grasped. Few people understand the circumstances requiring a jihad, or

"holy" war, or how Islamic militants justify their violent actions within the framework of the religious tradition of Islam. How Islam, with more than one billion followers, interprets jihad and establishes its precepts has become a critical issue for both the Muslim and the non-Muslim world. John Kelsay's timely and important work focuses on jihad of the sword in Islamic thought, history, and culture. Making use of original sources, Kelsay delves into the tradition of shari'a--Islamic jurisprudence and reasoning--and shows how it defines jihad as the Islamic analogue of the Western "just" war. He traces the arguments of thinkers over the centuries who have debated the legitimacy of war through appeals to shari'a reasoning. He brings us up to the present and demonstrates how contemporary Muslims across the political spectrum continue this quest for a realistic ethics of war within the Islamic tradition. Arguing the Just War in Islam provides a systematic account of how Islam's central texts interpret jihad, guiding us through the historical precedents and Qur'anic sources upon which today's claims to doctrinal truth and legitimate authority are made. In illuminating the broad spectrum of Islam's moral considerations of the just war, Kelsay helps Muslims and non-Muslims alike make sense of the possibilities for future war and peace.

I designed a learning system for myself that quadrupled my aptitude for learning computer languages. It worked so well for me that I've used it to teach coding to grandmothers, cab drivers, musicians, and 50,000 other newbies. Washington University research shows that a key teaching method I use--interactive recall practice--improves learning performance 400 percent. Computer languages are not inherently hard to understand, even for non-techies. Remembering is the problem. Research shows that you will remember everything if you're repeatedly asked to recall it. That's the beauty of flash cards. But technology offers an even better way to make information stick. With my book you get almost a thousand interactive exercises--they're free online--that embed the whole book in your memory. Algorithms check your work to make sure you know what you think you know. When you stumble, you do the exercise again. You keep trying until you know the chapter cold. The exercises keep you engaged, give you extra practice where you're shaky, and prepare you for each next step. Every lesson is built on top of a solid foundation that you and I have carefully constructed. Each individual step is small. But all the little steps add up to real knowledge--knowledge that you retain. You don't need to be a computer genius to learn Python. You just need to be smart about how you learn it.--Amazon.com description.
