The topics included in this issue deal with many aspects of volcanic and seismic activity, two of the natural hazards of geological origin that have the greatest impact and pose the predominant risk to society. This book comprises eighteen papers, most of which were presented at an international seminar organized and held at the Complutense University of Madrid in October 2001. The papers address geodetic, geophysical and geochemical effects caused by seismic and volcanic activity; monitoring of volcanic and seismic processes using space and terrestrial techniques; complementarity of these techniques; theoretical modelling of volcanic and seismic processes; inverse problem; interpretation of observations; hazards; seismicity patterns and application.

Whilst French fighter aircraft of the early war period are well known and the subject of many books, the bomber aircraft used by the French Air Force in this period are not well documented in English. This book describes and illustrates all such aircraft in use in WWII, from the obsolescent to the elegant and up-to-date modern bombers. Fully illustrated with many wartime photos, and scale plans of the major types. Full color profiles of many representative aircraft.

This is the fourth title in the French Wings series, describing the history of the LeO 45 from initial specifications to retirement after WWII. The Leo 45 was a modern (by 1940 standards) bomber in the Armee de l Air (French Air Force), probably the best known of such aircraft. Used during the Phoney War but more importantly employed to try to stop the German onslaught during the Bataille de France. After French armistice, the Vichy Air Force built some planes, most of them captured during invasion of Free Zone in November 1942. The Germans used this plane in the transport role, as well as French troops in North Africa when they fought alongside the Allies after Operation Torch. Specifications, construction and operations of these aircraft are described in detail, illustrated with many previously unpublished photos. Color schemes and markings are described and illustrated (Armee de l Air, Vichy Air Force, Luftwaffe, Armee de l Air after Torch)."

The groundbreaking bestseller that redefines intelligence and success Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us.

The day that Gillese Blondet turned 50, she vowed to herself that not only will she confess her age, but she would share all her secrets that confirm the following: YES, 50 is the new 30. I am 50... So What? Is the manual to get you to your mid-life feeling successful, made, beautiful in control and, above all, enjoy what you are and not grieve over what has not been. The day that Gillese Blondet turned 50, she vowed to herself that not only will she confess her age, but she would share all her secrets that confirm the following: YES, 50 is the new 30. This book is a friendly reminder that no botox will fix the wrinkles of the soul. Giselle, one of the most beloved women in the Hispanic market, takes us through the highlights of her life and the lives of powerful Latinas in their fifties who have not only achieved success in that dreaded age, but even have the luxury of having known the true love at 50. Because in this book, Blondet also shows us that in the game of love, the champion doesn't come first, but last. Funny, human, inspiring and full of anecdotes, I am 50 ... so what? Is an injection of energy for girls who want to reach that age as Giselle Blondet, and a foothold for women in their 50s that may be given the opportunity to start again.

Discover in this illuminating volume how you can use palm reading for self-exploration and personal growth.

The taco. The arepa. The empanada. The tamale. These comfort foods represent something that's shared across our Latin cultures: the concept of food in a vessel. Breaking down each new-style taco into its elements, Lorena shows you how to create each delicious layer. Master the elements, and your mix-and-match possibilities will be endless.

Arthur Pong was just an ordinary boy who after school loved to sing and fart at the same time! His neighbors cannot stand his awful pong, but will that stop Arthur from singing and farting his pants off?

The F3D was designed as a carrier-based all-weather fighter aircraft. It saw service with the United States Navy and United States Marine Corps. While it never achieved the fame of the F-86 Sabre or other contemporary aircraft, it downed several MiG-15s as a night fighter over Korea with only one air-to-air loss. It also served as an electronic warfare platform in the Vietnam War. The design, development and operations of these aircraft are described in detail, illustrated with many previously unpublished photos. Color schemes and markings are described and illustrated with full color profiles. Scale plans in 1/72nd and 1/48th. REVIEWS Like most "Yellow Series" efforts, text ably traces aircraft design, development, deployment and disposition. But eye candy really makes this effort shine. Dozens of color and B&W photos superbly supplement the study. Color plates beautifully illustrate Skyknight plumage. Tech-manual illustrations adeptly augment authenticity. And 1:72-scale drawings nicely capture Douglas' corpulent combatant. I utterly enjoyed MMP's colorful little compendium. Building a scale Skyknight? Make this little book your modeler's guide. Cybermodeler If you ever thought of doing a model of the Skyknight then this is the book for you. It follows the development of the aircraft through each

modification with an explanation of what was changed and why, a lot of pictures of the aircraft parked, in action, and color plates showing the markings for different versions of each...It is nice to know that there is a publisher like Mushroom Model Publications that is putting out detailed books that are obviously geared to the model builder. ipms

This book examines Cuban society through a study of its detective fiction and more particularly contemporary Cuban society through the novels of the author and critic, Leonardo Padura Fuentes. The author traces the development of Cuban detective writing in the light of the work of twentieth century Western European literary critics and philosophers including Raymond Williams, Antonio Gramsci, Terry Eagleton, Roland Barthes, Jean Paul Sartre, Michel Foucault, Jean François Lyotard and Jean Baudrillard in order to gain a better understanding of the social and historical context in which this genre emerged. The analysis includes discussion of the broader philosophical, political and historical issues raised by the Cuban revolution. The book concludes that the study of this popular genre in Cuba is of crucial importance to the scholar who wishes to reach as full an understanding of the social dynamics within that society as possible.

A remarkable achievement and an engrossing narrative, the poem is published here in both Spanish and English.

Fiction. Latino/Latina Studies. Translated from the Spanish by Steven J. Stewart. "Ana María Shua's microfictions reveal oneiric universes, multiform realities, secret worlds with the unlikely coherence of the absurd, the amorphous logic of the imagination. They are characterized by the most unique form of concise language and the omnipresence of humor."—Raúl Brasca
Calvin S. Brown wrote Music and Literature - A Comparison of the Arts with the hope that it might open up a field of thought which has not yet been systematically explored as there had been no survey of the entire field. This book attempts to supply such a survey.

The Half-Diet Diet is an accessible and universal weight-loss program. Rather than focusing on convoluted and challenging diets, Richard Eyre, bestselling author of Teaching Your Children Values and The Turning, provides a simpler way to control your appetite and lose weight forever: Level One: The Physical Diet—Learn what your body really needs and how controlling your appetite is about more than physical strength. Level Two: The Mental Diet—Learn to live more fully at half speed and strengthen your mind to be master of your body. Level Three: The Spiritual Diet—Connect to your body and mind through greater spirit balance. More than just a weight-loss program, The Half-Diet Diet helps you meet your weight-loss goals by taming your physical, mental, and spiritual appetites. The most complete diet book to date, The Half-Diet Diet is guaranteed to improve your body, mind, and spirit!

The question of the social treatment of the body and its transformations emerges in relation to issues of varying types (economic, therapeutic, ideological, cultural, aesthetic, commercial, technical). This book examines the various ways of managing bodily symptoms or transformations and the social stakes and systems of knowledge which relate to them, both on the medical and social level. The contributions provide analyses that concern a broad range of countries. Through the themes it tackles and the subjects it examines, this book reveals both the universal nature of the questions it asks, and the evolution of the objects and approaches of anthropology itself.

How to Protect Your Leadership Influence and Power You've worked hard to achieve your dreams and goals. Many others have done the same—only to lose it all in the end. Every day, we read about successful people in various walks of life who have lost their power and influence. They've been fired, forced to resign, or shamed out of public life. They no longer have a market for their gifts, and they may even face criminal proceedings. These leaders have lost the trust of their companies, constituents, nations, followers, and families. Many were surprised to discover that their talents alone were not enough to prevent their downfall. Why did they fail in the end? Because they lacked the one quality that would have protected their leadership and given them enduring influence. Ironically, this quality is seldom taught to leaders today, either formally or informally. It is the quality of moral force, or character. Every human being is a leader over some domain as he or she exercises gifts and influence. That domain might be the halls of government, the boardroom, the classroom, the community, or the home. In *The Power of Character in Leadership: How Values, Morals, Ethics, and Principles Affect Leaders*, you will discover what character is, what it means to develop moral force, and how to preserve your leadership influence so that it is both effective and enduring.

SENDEROS approaches language learning as a student-centered, multi-faceted process that goes beyond the ability to understand, speak, read, and write in Spanish. With SENDEROS, students are encouraged to be active participants, not passive receptors, in the learning process. Throughout each chapter, students are regularly asked to think critically, participate in pair and group work, respond to readings, express their opinions, and thoughtfully consider the views of others. Although the focus of SENDEROS is building oral and written communication skills, the variety of material and activities provided within make it equally appropriate for courses that focus on contemporary culture or grammar review. SENDEROS also works well in bridge courses to develop reading strategies before taking upper level literature and civilization classes. A limited number of definitions have dominated academic and political discourse and poverty understanding over the last few decades. The aim of this "glossary" is to widen the choice of definitions available, thereby expanding the scientific field of poverty research so it gets closer to the complex reality of poverty and the lives of poor people. This book has over 200 definitions and explanations of terms used with poverty.--[from book].

The Potez 63 and its variants was a significant part of the French Air Force's equipment in 1939/40, serving in the light bomber, fighter, and reconnaissance roles. The development and operational use of these elegant twins is described in this new book, illustrated with many photos, including a large selection of those previously unpublished. With 1/72nd scale plans, color artwork illustrating the colors and markings, and text by a noted French aviation historian, this book is essential reading for WW2 aircraft enthusiasts.

"A stage vehicle for the Marx Brothers. The scene is the Long Island estate of Mrs. Rittenhouse, a wealthy patroness of the arts with a marriageable daughter. Her celebrity weekend guest is the renowned Captain Jeffrey Spaulding, the African Explorer. He arrives with his secretary, Horatio Jameson, followed by pair of "musicians": Ravelli and the Professor. What follows is typical Marxian lunacy, involving a stolen painting, a surreal bridge game, a Broadway gossip columnist named Wally Winston, a financial wizard formerly known as Abie the Fish Peddler, and a climatic burlesque of Marie Antoinette and the Three Musketeers."--George S. Kaufman website.

From the winner of the first Lannan Prize for Cultural Freedom, a biting funny, kaleidoscopic vision of the first world through the eyes of the third Eduardo Galeano, author of the incomparable *Memory of Fire* Trilogy, combines a novelist's intensity, a poet's lyricism, a journalist's fearlessness, and the strong judgments of an engaged historian. Now his talents are richly displayed in *Upside Down*, an eloquent, passionate, sometimes hilarious exposé of our first-world privileges and assumptions. In a series of lesson plans and a "program of study" about our beleaguered planet, Galeano takes the reader on a wild trip through the global looking glass. From a master class in "The Impunity of Power" to a seminar on "The Sacred Car"--with tips along the way on "How to Resist Useless Vices" and a declaration of "The Right to Rave"--he surveys a world unevenly divided between abundance and deprivation, carnival and torture, power and helplessness. We have accepted a reality we should reject, Galeano teaches us, one where machines are more precious than humans, people are hungry, poverty kills, and children toil from dark to dark. A work of fire and charm, *Upside Down* makes us see the world anew and even glimpse how it might be set right. "Galeano's outrage is tempered by intelligence, an ineradicable sense of humor, and hope." -Los Angeles Times, front page

1956. Argentina has just lost its charismatic president Juan Perón in a military coup, and terror reigns across the land. June 1956: eighteen people are reported dead in a failed Peronist uprising. December 1956: sometime journalist, crime fiction writer, studiously unpoliticized chess aficionado Rodolfo Walsh learns by chance that one of the executed civilians from a separate, secret execution in June, is alive. He hears that there may be more than one survivor and believes this unbelievable story on the spot. And right there, the monumental classic *Operation Massacre* is born. Walsh made it his mission to find not only the survivors but widows, orphans, political refugees, fugitives, alleged informers, and anonymous heroes, in order to determine what happened that night, sending him on a journey that took over the rest of his life. Originally published in 1957, *Operation Massacre* thoroughly and breathlessly recounts the night of the execution and its fallout.

For Rosie, no matter how bleak or out of control life turned, the only thing that always remained constant was the love of her family and, most of all, her sister, Jenni.

This book presents the first feminist translation of Rosalía de Castro's seminal poetic anthology *En las orillas del Sar* [On the Edge of the River Sar] (1884). Rosalía de Castro (1837–1885) was an artist of vast poetic vision. Her understanding of human nature and her deep sensitivity to the injustices suffered by women and by such marginalized peoples as those of her native region, Galicia, are manifest in verses of universal yet rarely translated significance. An outspoken proponent of both women's rights and her region's cultural and political autonomy, Castro used her poetry as a vehicle through which to decry the crushing hardships both groups endured as Spain vaulted between progressive liberal and conservative reactionary political forces throughout the nineteenth century. Depending upon what faction held sway in the nation at any given time during Castro's truncated literary career, her works were either revered as revolutionary or reviled as heretical for the views they espoused. Long after her death by uterine cancer in 1885, Castro was excluded from the pantheon of Spanish literature by Restoration society for her unorthodox views. Compellingly, the poet's conceptualization of the individual and the national self as informed by gender, ethnicity, class, and language echoes contemporary scholars of cultural studies who seek to broaden present-day definitions of national identity through the incorporation of precisely these same phenomena. Thanks to the most recent works in Rosalian and Galician studies, we are now able to recuperate and reevaluate Rosalía de Castro's poems in their original languages for the more radical symbolism and themes they foreground related to gender, sexuality, race and class as they inform individual and national identities. However, although Castro's poetic corpus is widely accessible in its original languages, these important features of her verses have yet to be given voice in the small number of English translations of only a sub-set of her works that have been produced in the last century. As a result, our understanding of Castro's potential contributions to contemporary world poetics, gender studies, Galician and more broadly cultural studies is woefully incomplete. An English translation of Castro's works that is specifically feminist in its methodological orientation offers a unique and thought-provoking means by which to fill this void.

"Barela's record as lawmaker and his active participation in the development of Colorado suffice to make his story worth telling. The Barela biography is the record of a legislative and political career filled with firsts for Mexicanos, a fact Fernandez underscores repeatedly when showering his subject with the epithets: "Perpetual Senator." "Father of the Colorado Senate," and "Forty Years a Legislator." Among Barela's accomplishments are his election as President Pro Tempore of the Colorado Senate in 1893, his appointment by the Mexican Government as Consul in Denver, and his appointment to a similar post by the government of Costa Rica in 1897. Above all, Barela is shown to be a steadfast advocate for the Spanish-speaking community of southern Colorado, a noteworthy accomplishment considering that Colorado was a place where anti-Mexican sentiments ran high and often resulted in intimidation and open violence against the Spanish-speaking. Barela often asserted that 'Al tratarse de mi raza, especialmente si se trata de discriminar, abdicó mis ideas en política y me dedico a su defensa en todo tiempo y lugar.' [If it concerns my race, especially if it is a matter of discrimination, I abdicated my political ideologies and dedicate myself to its defense at all times and at all places]." Book jacket.

The concept of border and border crossing has important implications for how we theorize cultural politics, power, ideology, pedagogy and critical intellectual work. This completely revised and updated edition takes these areas and draws new connections between postmodernism, feminism, cultural studies and critical pedagogy. Highly relevant to the times which we currently live, Giroux reflects on the limits and possibilities of border crossings in the twenty-first century and argues that in the post-9/11 world, borders have not been collapsing but vigorously rebuilt. The author identifies the most pressing issues facing critical educators at the turn of the century and discusses topics such as the struggle over the academic canon; the role of popular culture in the curriculum; and the cultural war the New Right has waged on schools. New sections deal with militarization in public spaces, empire building, and the cultural politics of neoliberalism.

Those interested in cultural studies, critical race theory, education, sociology and speech communication will find this a valuable source of information.
