For centuries, astronomers have placed a special interest on the other planets of the solar system. But with the advent of spacecraft and the tremendous missions undertaken by the Voyager and Cassini probes, astronomers have discovered that the natural satellites of the planets—the solar system's moons—are some of the most extraordinary places imaginable. There are moons with towering geysers, erupting volcanoes, and subterranean oceans of warm, mineral-rich water. Some of the highest mountains and deepest canyons can be found on the moons. There are moons that have shattered into pieces and then reassembled. There is even a moon where it rains rocket fuel. Recently, scientists have turned to the moons for answers in their

investigations of the origins of the solar system and the evolution of life on our own planet. Featuring full-color, scientifically accurate illustrations by NASA artist Ron Miller, *Natural Satellites: The Book of Moons* chronicles these investigations and the questions we have yet to answer in our exploration of the solar system's moons.

Among the famous ranch brands of Texas are the T Anchor, JA, Diamond Tail, 777, Bar C, and XIT. And the greatest of these was XITThe XIT Ranch of Texas. It was not the first ranch in West Texas, but after its formation in the eighteen-eighties it became the largest single operation in the cow country of the Old West and covered more than three million acres, all fenced. The state of Texas patented this huge rectangle of land,

at the time considered by many to be part of "the great American desert," to the Capitol Freehold Land and Investment Company of Chicago, in exchange for funds to erect the state capitol building in Austin. This "desert" became a legend in the cattle business, and it remains today a memory to thousands who recall the era when mustangs and longhorns grazed beneath the brand of the XIT. The development and operation of this pastoral enterprise and its relation to the history of Texas is the subject of this great and widely discussed book by J. Evetts Haley, now made available to readers every where. It is the story of a wild prairie, roamed by Indians, buffalo, mustangs, and antelope, that became a country of railroads, oil fields, prosperous farms, and carefully bred herds of cattle. The XIT Ranch of Texas is the epic account of a ranching operation about which many know a little but only a few very much. It is the one volume that, more than any other, portrays the early-day cattle business of the West.

This book is the first to trace the unique monetary history of the Indian Ocean World. Long-distance trade across the region was facilitated by a highly complex multi-currency system undergirded by shared ideas that transcended ethno-linguistic, religious and class divisions. Currencies also occupied key roles in local spiritual, aesthetic and affective practices. Foregrounding these tensions between the global/universalistic and the local/particularistic, the volume shows how this traditional currency system remained in place until the middle of the twentieth century, and how aspects of the system continue to inform monetary practices throughout the region.
