As suggested by its title, this e-book presents student-oriented materials focused on legal issues common to international business transactions. With an emphasis on sales of goods and services, the materials review international transactions from both the private law and governmental regulatory perspectives, domestic and international. Several features of the book distinguish it as a teaching tool from more traditional law school offerings. First, the book is offered in an electronic format which is designed to make extensive use of web-based resources. Among other advantages, this format (1) provides much cheaper, flexible and more accessible learning materials for students; (2) takes advantage of the excellent web-based resources that students are accustomed to using, including multi-media content; and (3) creates a flexible framework that allows professors to adapt, improve or otherwise modify content to suit their needs during successive iterations of the course. Second, the materials and format are designed to encourage students to take a more active role in their learning with an emphasis on skills building. Each chapter presents a problem and typically asks students to address legal issues as a practicing lawyer would, working through primary materials — cases, statutes and treaty texts. Third, the materials are written and prepared for the uninitiated and uninformed. Basic background explanations are always provided and all questions posed in the text are meant to be answered by the students — there are no abstract, obtuse or unanswerable questions set out in the materials. With guidance from their instructor, students are required to examine the material provided not only to learn the relevant law but also to build the essential skills of effective lawyering.

Compared to domestic transactions, the risks associated with international sales are greatly multiplied. It is a rare international sales agreement to rely on minor variations of standard terms, as is so often the case in domestic agreements. Foreign laws, export/import and

currency exchange controls, treaties, transit issues, inspection of goods, insurance, tariffs – all these and more – must be taken into account in contract negotiations. This is the third edition of an enormously useful book that guides practitioners through the process of drawing up sound agreements for the international sale of goods. Organized according to the framework of an annotated agreement, with detailed commentary on each provision, it incorporates hundreds of sample clauses designed to cover every contingency, including such factors as the following (and a great deal more): • definitions; • price adjustments; • labelling; • transportation modes; • confidentiality; • INCOTERMS; • documentation; • delivery dates; • limitation of liability; • arbitration; and • corruption. Although the clauses are drawn without reference to any particular country, relevant considerations are covered in the commentary to each clause. Appendices reprint the texts of the United Nations Convention on Contracts for the International Sale of Goods (CISG), the UNIDROIT Principles, and the Principles of European Contract Law. For lawyers charged with drafting an international sales contract, this book is invaluable. Clause by clause, it clearly details the drafting process, commenting expertly on every issue likely to arise. It would be hard to find a more useful guide.
