

Sams Teach Yourself Microsoft Office Excel 2003 In 24 Hours

An alternative for Microsoft Office and StarOffice users has arrived in the form of OpenOffice.org. If you are part of the growing number of people who are making the switch from Microsoft Office or StarOffice to the free OpenOffice.org 1.1 suite, "Sams Teach Yourself OpenOffice.org All In One" is a must-have tool. Make a smooth transition from Microsoft Office to OpenOffice.org 1.1 with this task tutorial, starter kit CD-ROM and step-by-step instruction guide. Learn how to productively use the Writer, Calc, Impress and Draw applications in the OpenOffice.org 1.1 suite and how you will be able to easily work with those still using Microsoft Office and StarOffice. Don't lose valuable time trying to learn OpenOffice.org 1.1 on your own -- let "Sams Teach Yourself" help!

Examines the new features of the operating system, covering such topics as Windows XP upgrading and installation, configuring services, menu navigation, Internet options, and networking.

Sams Teach Yourself Microsoft Internet Explorer 5 in 10 Minutes is a quick, efficient reference to getting connected to the Internet, finding and browsing Web sites, sending and receiving e-mail, reading and posting to newsgroups, and generally applying Internet Explorer to your everyday office and home life. Only the most common problems and most frequently used Internet Explorer tasks are covered--from saving bookmarks of your favorite Web sites, to organizing your e-mail folders, to creating a simple page on the World Wide Web. Revised and updated, covering all the new features of Microsoft Internet Explorer 5 and its integration with Microsoft Office 2000.

Sams Teach Yourself Microsoft Office 2007 All in One Pearson Education

Visual C# .NET is available as part of Microsoft's Visual Studio .NET suite of developer tools (\$1,079 to \$2,499) or as a standalone product (\$109 before MS rebates). With the initial release of Visual Studio.NET in 2001, the focus was on the new language C# and not the developer tool Visual C#. Now that Visual Studio is moving out of the "early adopter" stage and into general acceptance by the bulk of the developer audience, the trend is toward Visual C# as a developer tool with less interest in the basis language. Teach Yourself Visual C# .NET in 24 Hours provides readers with 24 structured lessons with step-by-step guidance to real-world programming tasks including Windows and Web applications. James Foxall moves beyond the pure syntax covered in most C# books to guide readers through the basics of Visual C# .NET. Each chapter includes practice exercises, tips, notes, and cautions providing easy-to-understand advice on how to start programming quickly. Sidebars provide more experienced readers with tips that will ease their migration from Visual Basic 6 and Visual C++ to Visual C# .NET.

A guide to the software package highlights shortcuts and tips while explaining how to format and edit documents, create spreadsheets, manage email, enhance presentations, and maintain Web pages

In just 24 sessions of one hour or less, you'll learn how to build flexible, easy-to-maintain, standards-based websites with Microsoft Expression Web 2. Using this book's straightforward, step-by-step approach, you'll master the entire process—from concept and design through delivery! Each lesson builds on what you've already learned, giving you a strong real-world foundation for success, no matter what kind of site you're building! Step-by-step instructions carefully walk you through the most common Expression Web 2 tasks. Quizzes and Exercises at the end of each chapter help you test your knowledge. By the Way notes present interesting information related to the discussion. Did You Know? tips offer advice or show you easier ways to perform tasks. Watch Out! cautions alert you to possible problems and give you advice on how to avoid them Learn how to... · Build your first Expression website in just five minutes! · Import text from Microsoft Word and other software · Make the most of Expression Web 2's advanced image-editing features · Create hyperlinks that simplify navigation, perform actions, and send commands · Write error-free code quickly and easily with Code View and IntelliSense · Use CSS to control your site's appearance, create standards-based, cross-browser content, and simplify redesigns · Design site layouts that communicate more effectively · Use Dynamic Web Templates to consistently format (or reformat) hundreds of pages · Implement state-of-the-art interactivity with Behaviors · Add Silverlight, Flash, and other multimedia content · Build a web-based email form with FrontPage Server Extensions and PHP · Integrate web application code written in ASP.NET or PHP Morten Rand-Hendriksen is a web designer, developer, programmer, and digital media expert based in Burnaby, B.C., Canada. He has operated Pink and Yellow Media since 2002, creating web and design solutions for small businesses and individuals. For his work with Expression Web, he was invited as a Canadian VIP to the MIX08 conference in Las Vegas and asked to present on Building Compelling Websites on the Microsoft Platform at Microsoft's Innovation Briefing. He blogs on Expression Web at
