West Coast FBI Director Victor Dupé's personal mission is to stand up to bullies and protect the weak. Being a powerful leader, though, has its drawbacks - he must keep his own vulnerable side hidden and not let anyone get too close. He aces that every day, until the first moment he meets Olivia Fiorelli and realizes he's found someone worth the risk of opening his heart to. US Marshall Olivia Fiorelli has only one goal in life - destroy organized crime. Doing so might help her sleep at night and alleviate the guilt she feels over the murders her hitman father has committed. Running a dangerous undercover sting leads her to Victor Dupé's doorstep - and sets a deadly plot into motion. As their explosive desire erupts, the two race against a killer who hides in the shadows, viciously taking his personal revenge on Victor and those closest to him. The director has finally found someone worth holding on to, but will Olivia become the killer's last, and ultimate, target?

Sometimes you know things you're not supposed to know. Things that you can never un-know. Things that will change the course of your life...and the fate of the ones you love. I found her in our living room, bleeding and close to death, but alive. Barely. Until morning stole her last breath. The media called her killer the "Triangle Terror" ... and then forgot about her. But I never forgot—my murdered sister, and an investigation that led to my own resurrection from the dead. Twenty-two years ago, on a cold February night, Landon Worthington lost his father for the last time. After an armed robbery gone wrong, evidence and witness testimony pointed a shaky finger at Dan Worthington—deadbeat dad and alcoholic husband. But before the dust could settle over the conviction, Landon's preteen sister, Alexis, is murdered in their home, plunging Landon's life into further despair. Two decades and a cold case later, Landon is dogged by guilt over their estranged relationship and decides to confront his incarcerated father-of-the-year about what really happened the night of the robbery. But the years of lies are hard to unravel. And the biggest question of all haunts him: How does everything tie into his sister's murder? And so begins Landon's journey to piece together the puzzle of secrets, lies, and truths that can free his father, avenge his sister, and perhaps save himself. A companion short story to *A Secondhand Life*, the perfect mystery for fans of Robert Dugoni's *Third Watch* and Dean Koontz's *The*

Isabella Hush may be a talented thief, but her past is about to creep up on her. In need of quick funds to escape a nasty ex and his henchmen, she takes a chance on a rumored cache of Incan gold. But the heist goes terribly wrong and she ends up inebriated in a dark alley with a strange man dying at her feet. Against her better judgement, she pauses to help, and out of habit, picks his pockets. Then the man disappears without a trace, leaving nothing behind but filthy cobblestones, and she begins to think she imagined it all. That is, until the next morning when she finds the pilfered items in her apartment and a strange mark on her arm. Before long, she discovers there's a supernatural realm seething unknown beneath her feet. And she just might long for the simple days of a heist gone bad... Because now she's not just being hunted by dangerous men, she's being hunted by dangerous immortals.

CHILI HOT GMAT MATH REVIEW will help readers develop the skills and mindset needed to score high on the quantitative section of the GMAT exam. Each hand-selected problem comes with a Classification, Snapshot, and Chili Rating. Classification serves to identify each problem according to category or sub-category. Snapshot highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. Chili Rating helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates

that the estimated difficulty level of a given problem is "mild" (500 to 590 difficulty level), two chilies spell "hot" (600 to 690 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By studying problems of varying difficulty, candidates will learn to maintain discipline on easy but tricky math problems and also to exercise flexibility when deciding on multiple approaches and time-saving shortcuts for use in tackling harder, more involved problems. Note to readers: This book contains the excerpted math sections from the parent title "Chili Hot GMAT: 200 All-Star Problems to Get You a High Score on Your GMAT Exam."

Introduction to Quantum Mechanics, Second Edition presents an accessible, fully-updated introduction on the principles of quantum mechanics. The book outlines the fundamental concepts of quantum theory, discusses how these arose from classic experiments in chemistry and physics, and presents the quantum-mechanical foundations of many key scientific techniques. USA TODAY bestselling author Kate Meader brings her signature “steamy sex scenes, colorful characters, and riveting dialogue” (RT Book Reviews) to this novella in the Chicago Rebels series, following the general manager of the Rebels as he scores with one of his players off the ice. Dante Moretti has just landed his dream job: GM of the Chicago Rebels. And screw the haters who think there should be an asterisk next to his name because he’s the first out managing executive in pro hockey. He’s earned the right to be here and nothing will topple him off that perch—especially not an incredibly inconvenient attraction to his star defenseman, Cade “Alamo” Burnett. Cade has always been careful to keep his own desires on the down low, but his hot Italian boss proves to be a temptation he can’t resist. Sure, they both have so much to lose, but no one will ever know... As Dante and Cade’s taboo affair heats up off the ice and their relationship gets more and more intense, they’ll have to decide: is love worth risking their careers? Or is this romance destined to be forever benched?

When Serge Gainsbourg died in 1991, France went into mourning: François Mitterand himself proclaimed him "our Baudelaire, our Apollinaire." Gainsbourg redefined French pop, from his beginnings as cynical chansonnier and mambo-influenced jazz artist to the ironic "yé-yé" beat and lush orchestration of his 1960s work to his launching of French reggae in the 1970s to the electric funk and disco of his last albums. But mourned as much as his music was Gainsbourg the man: the self-proclaimed ugly lover of such beauties as Brigitte Bardot and Jane Birkin, the iconic provocateur whose heavy-breathing "Je t'aime moi non plus" was banned from airwaves throughout Europe and whose reggae version of the "Marseillais" earned him death threats from the right, and the dirty-old-boy wordsmith who could slip double-entendres about oral sex into the lyrics of a teenybopper ditty and make a crude sexual proposition to Whitney Houston on live television. Gilles Verlant's biography of Gainsbourg is the best and most authoritative in any language. Drawing from numerous interviews and their own friendship, Verlant provides a fascinating look at the inner workings of 1950s-1990s French pop culture and the conflicted and driven songwriter, actor, director and author that emerged from it: the young boy wearing a yellow star during the German Occupation; the young art student trying to woo Tolstoy's granddaughter; the musical collaborator of Petula Clark, Juliette Greco and Sly and Robbie; the seasoned composer of the Lolita of pop albums, Histoire de Melody Nelson; the cultural icon who transformed scandal and song into a new form of delirium.

The new edition of Gene Control has been updated to include significant advances in the roles of the epigenome and regulatory RNAs in gene regulation. The chapter structure remains the same: the first part consists of pairs of chapters that explain the mechanisms involved and how

they regulate gene expression, and the second part deals with specific biological processes (including diseases) and how they are controlled by genes. Coverage of methodology has been strengthened by the inclusion more explanation and diagrams. The significant revision and updating will allow Gene Control to continue to be of value to students, scientists and clinicians interested in the topic of gene control.

A thrilling tale of a scientist turned Nazi spy informing on America's nuclear war program. The location and mission of Omega Canyon were top secret. During World War II, it served as the most restricted area on the Los Alamos atomic-bomb research and testing grounds. Paul Haber was a physicist banished by the Nazi party during the war. Like many academics in Germany, he came to America to help with the war effort and to avenge the loss of his wife and child to a Nazi concentration camp. But after being approached by a German spy, he is presented with proof that his family is alive. And to keep them so he must become a spy for the Nazis and betray the country that has given him asylum and purpose. OMEGA CANYON is America's greatest war fear realized: The Los Alamos project was compromised and someone was sneaking valuable information to Nazi Germany. The race for the nuclear bomb is heating up, and Paul has to decide between the family he loves and the country who has saved his life. Things just got hot in the dark and then she found out who he is: a player on the hockey team her ex owns. They can't ... but they can't stop. Addison Williams isn't looking for romance, but when she encounters an eavesdropping stranger on an adjoining hotel balcony, she figures she's due a little fun. She just hadn't reckoned on the "fun" escalating so quickly to "out of control." One minute she's flirting with a whiskey-graveled voice in the dark, the next that same voice is telling her to do things. Hot, wicked things. Cup-winning hockey player Ford "Killer" Callaghan can't believe he let the anonymous woman who blew his mind slip away into the night. He'll track her down because once could never be enough--even if discovering her identity places her strictly out of bounds. Stolen kisses. Secret hook-ups. Deliciously forbidden in every way. Can a passion that started in the dark find a lifetime of love in the light? A USA Today bestseller, IN SKATES TROUBLE, kicks off the Chicago Rebels hockey series about three sisters running a hockey team and the ice warriors skating right into their hearts. One hundred of the most evocative modern poems on joy, selected by an award-winning contemporary poet "Bursting with energy and surprising locutions. . . . Even the most familiar poets seem somehow new within the context of Joy."--David Skeel, Wall Street Journal "Wiman takes readers through the ostensible ordinariness of life and reveals the extraordinary."--Adrianna Smith, The Atlantic Christian Wiman, a poet known for his meditations on mortality, has long been fascinated by joy and by its relative absence in modern literature. Why is joy so resistant to language? How has it become so suspect in our times? Manipulated by advertisers, religious leaders, and politicians, joy can seem disquieting, even offensive. How does one speak of joy amid such ubiquitous injustice and suffering in the world? In this revelatory anthology, Wiman takes readers on a profound and surprising journey through some of the most underexplored terrain in contemporary life. Rather than define joy for readers, he wants them to experience it. Ranging from Emily Dickinson to Mahmoud Darwish and from Sylvia Plath to Wendell Berry, he brings together diverse and provocative works as a kind of counter to the old, modernist maxim "light writes white"--no agony, no art. His rich selections awaken us to the essential role joy plays in human life.
