In her study of key radio dramas broadcast from 1930 to 1943, Lauren Rea analyses the work of leading exponents of the genre against the wider backdrop of nation-building, intellectual movements and popular culture in Argentina. During the period that has come to be known as the infamous decade, radio serials drew on the Argentine literary canon, with writers such as Héctor Pedro Blomberg and José Andrés González Pulido contributing to the nation-building project as they reinterpreted nineteenth-century Argentina and repackaged it for a 1930s mass audience. Thus, a historical romance set in the tumultuous dictatorship of Juan Manuel de Rosas reveals the conflict between the message transmitted to a mass audience through popular radio drama and the work of historical revisionist intellectuals writing in the 1930s. Transmitted at the same time, González Pulido's gauchesque series evokes powerful notions of Argentine national identity as it explores the relationship of the gaucho with Argentina's immigrant population and advocates for the ideal contribution of women and the immigrant population to Argentine nationhood. Rea grounds her study in archival work undertaken at the library of Argentores in Buenos Aires, which

holds the only surviving collection of scripts of radio serials from the period. Rea's book recovers the contribution that these products of popular culture made to the nation-building project as they helped to shape and promote the understanding of Argentine history and cultural identity that is widely held today. The sinister "jungle"--that ill-defined and amorphous place where civilization has no foothold and survival is always in doubt--is the terrifying setting for countless works of the imagination. Films like *Apocalypse Now*, television shows like *Lost*, and of course stories like *Heart of Darkness* all pursue the essential question of why the unknown world terrifies adventurer and spectator alike. In *Jungle Fever*, Charlotte Rogers goes deep into five books that first defined the jungle as a violent and maddening place. The reader finds urban explorers venturing into the wilderness, encountering and living among the "native" inhabitants, and eventually losing their minds. The canonical works of authors such as Joseph Conrad, Andre Malraux, Jose Eustasio Rivera, and others present jungles and wildernesses as fundamentally corrupting and dangerous. Rogers explores how the methods these authors use to communicate the physical and psychological maladies that afflict their characters evolved symbiotically with modern medicine. While the wilderness challenges Conrad's and Malraux's European travelers to question their civility and

mental stability, Latin American authors such as Alejo Carpentier deftly turn pseudoscientific theories into their greatest asset, as their characters transform madness into an essential creative spark. Ultimately, *Jungle Fever* suggests that the greatest horror of the jungle is the unknown regions of the character's own mind.

During the 18th century, visitors would come and attend the British Parliament sessions in order to understand how a representative assembly could technically function, because politics is not only about ideas, but also a lot about practices and techniques. A great deal has been written on the circulation of political ideas during the 19th century,

and on the part played by exiles, refugees and military volunteers in this intellectual mobility. However, less is known of what constitutes, in the end, politics: not only ideas, but practices, the material implementation of politics. How does one debate, vote, or demonstrate? What is political representation? How does one “start” a political party, and run it? All the political engineering, of the 19th century, the period of the birth of modern politics, has been the result of an intense circulation of exiles, which, along with bringing in new ideas, borrowed new ways of “making politics”. This is what this book contemplates through a wide range of examples showing how exile turned out to be, during the century of the revolutions, the laboratory of a new political grammar and of political practices resulting in the cross-fertilization between host countries and exiled communities.

Domingo Faustino Sarmiento, president of Argentina from 1868 to 1874, is best known as an educator and as the author of *Civilization and Barbarism: The Life of Juan Facundo Quiroga*, generally referred to as *El Facundo*. The contributors to this volume call attention to other facets of Sarmiento's life and to the results of the programs he encouraged. Each contributor has his or her own image of Sarmiento, but whether re-assessing him as a writer, a thinker, or as an advocate of democracy and economic development, all are aware of how the underlying

theme of El Facundo - the clash between urban and rural worlds, between civilization and barbarism - influenced his outlook. Their essays add to our knowledge not only of Sarmiento, but also of a key transitional period in Argentina's development.

First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

Sarmiento utilizó la figura de Juan Facundo Quiroga (1788-1835) para realizar un estudio de la barbarie: en Facundo Quiroga no sólo se ve a un caudillo, sino también una manifestación de la vida argentina, consecuencia de la colonización y de las peculiaridades del terreno. A través de la biografía del militar, Sarmiento intentó entender los mecanismos del poder tiránico en la Argentina de la época.

This book examines the study of natural history in the Spanish empire in the years 1750-1850. During this period, Spain made strenuous efforts to survey, inventory and exploit the natural productions of her overseas possessions, orchestrating a series of scientific expeditions and cultivating and displaying American fauna and flora in metropolitan gardens and museums. This book assesses the cultural significance of natural history, emphasising the figurative and utilitarian value with which eighteenth-century Spaniards invested natural objects, from

"The Oxford Handbook of Comparative Political Theory provides an entry point into this burgeoning field by both synthesizing and challenging the terms that motivate it. The handbook demonstrates how mainstream political theory can and must be enriched through attention to genuinely global, rather than parochially Euro-American, contributions to political thinking. Entries emphasize exploration of substantive questions about political life-ranging from domination to political economy to the politics of knowledge-in a range of global contexts, with attention to whether and how those questions may be shared, contested, or reformulated across differences of time, space, and experience. They connect comparative political theory to cognate disciplines including postcolonial theory, area studies, and comparative politics. Creative organizational tools such as tags and keywords aid in navigation of the handbook to help readers trace disruptions, thematic connections, contrasts, and geographic affinities across entries"--

All three books in the American Book Award–winning Memory of Fire Trilogy available in a single volume for the first time.

Eduardo Galeano's Memory of Fire Trilogy defies categorization—or perhaps creates its own. It is a passionate, razor-sharp, lyrical history of North and South America, from the birth of the continent's indigenous peoples through the end of the twentieth century. The three volumes form a haunting and dizzying whole that resurrects the lives of Indians, conquistadors, slaves, revolutionaries, poets, and more. The first book, Genesis, pays homage to the many origin stories of the tribes of the Americas, and paints a verdant portrait of life in the New World through the age of the conquistadors. The second book, Faces and Masks, spans the two centuries between the years 1700 and 1900, in which colonial powers plundered their newfound territories, ultimately giving way to a rising tide of dictators. And in the final installment, Century of the Wind, Galeano brings his story into the twentieth century, in which a fractured continent enters the modern age as popular revolts blaze from North to South. This celebrated series is a landmark of contemporary Latin American writing, and a brilliant document of culture.

The nations of Latin America came into being without a strong sense of national purpose and identity. In *The Invention of Argentina*, Nicholas Shumway offers a cultural history of one nation's efforts to determine its nature, its destiny, and its place among the nations of the world. His analysis is crucial to understanding not only Argentina's development but also current events in the Argentine Republic.

In *The Senses of Democracy*, Francine R. Masiello traces a history of perceptions expressed in literature, the visual arts, politics, and history from the start of the nineteenth century to the present day. A wide transnational landscape frames the

book along with an original and provocative thesis: when the discourse on democracy is altered—when nations fall into crisis or the increased weight of modernity tests minds and nerves—the representation of our sensing bodies plays a crucial role in explaining order and rebellion, cultural innovation, and social change. Taking a wide arc of materials—periodicals, memoirs, political proclamations, and travel logs, along with art installations and fiction—and focusing on the technologies that supplement and enhance human perception, Masiello looks at the evolution of what she calls “sense work” in cultural texts, mainly from Latin America, that wend from the heights of romantic thought to the startling innovations of modernism in the early twentieth century and then to times of posthuman experience when cyber bodies hurtle through globalized space and human senses are reproduced by machines. Tracing the shifting debates on perceptions, *The Senses of Democracy* offers a new paradigm with which to speak of Latin American cultural history and launches a field for the comparative study of bodies, experience, pleasure, and pain over the continental divide. In the end, sense work helps us to understand how culture finds its location.

"A brilliant and sensitive portrayal not only of Canudos, but of the sertão more generally. By making the defenders of Canudos less spectacular and exceptional, [Levine] has rescued them from the museum of curiosities and restored them to the mainstream of backland life. It is about time we had such nuanced understanding about this tragic misunderstanding."—Steven C. Topik, *Luso-Brazilian Review*

and the first half of the nineteenth. They stand in contrast to better-known romantic fiction in that they endeavor to address the world of daily, empirical experience rather than that of more explicitly self-referential, fanciful creation. Among them are genres that have since the nineteenth century come to characterize many aspects of modern life like the periodical or the psychological case study; others flourished and enjoyed wide-spread popularity during the nineteenth century but are much less well-known today like the almanac and the diary. Travel narratives, pamphlets, religious and theological texts, familiar essays, autobiographies, literary-critical and philosophical studies, and discussions of the visual arts and music all had deep historical roots when appropriated by romantic writers but prospered in their hands and assumed distinctive contours indicative of the breadth of romantic thought. The Romanticism series in the Comparative History of Literatures in European Languages is the result of a remarkable international collaboration. The editorial team coordinated the efforts of over 100 experts from more than two dozen countries to produce five independently conceived, yet interrelated volumes that show not only how Romanticism developed and spread in its principal European homelands and throughout the New World, but also the ways in which the affected literatures in reaction to Romanticism have redefined themselves on into Modernism. A glance at the index of each volume quickly reveals the extraordinary richness of the series' total contents. Romantic Irony sets the broader experimental

parameters of comparison by concentrating on the myriad expressions of “irony” as one of the major impulses in the Romantic philosophical and artistic revolution, and by combining cross-cultural and interdisciplinary studies with special attention also to literatures in less widely diffused language streams. Romantic Drama traces creative innovations that deeply altered the understanding of genre at large, fed popular imagination through vehicles like the opera, and laid the foundations for a modernist theater of the absurd. Romantic Poetry demonstrates deep patterns and a sharing of crucial themes of the revolutionary age which underlie the lyrical expression that flourished in so many languages and environments. Nonfictional Romantic Prose assists us in coping with the vast array of writings from the personal and intimate sphere to modes of public discourse, including Romanticism's own self-commentary in theoretical statements on the arts, society, life, the sciences, and more. Nor are the discursive dimensions of imaginative literature neglected in the closing volume, Romantic Prose Fiction, where the basic Romantic themes and story types (the romance, novel, novella, short story, and other narrative forms) are considered throughout Europe and the New World. This enormous realm is seen not just in terms of Romantic theorizing, but in the light of the impact of Romantic ideas and narration on later generations. As an aid to readers, the introduction to Romantic Prose Fiction explains the relationships among the volumes in the series and carries a listing of their tables of contents in an appendix. volumes which treat the entirety of Romanticism as a cultural happening across the whole breadth of the “Old” and “New” Worlds and thus render a complex picture of European spiritual strivings in the late eighteenth and the nineteenth centuries, a heritage still very close to our age.

This book traces the impact of exile in the formation of independent republics in Chile and the Río de la Plata in the decades after independence. Exile was central to state and nation formation, playing a role in the emergence of territorial borders and Romantic notions of national difference, while creating a transnational political culture that spanned the new independent nations. Analyzing the mobility of a large cohort of largely elite political émigrés from Chile and the Río de la Plata across much of South America before 1862, Edward Blumenthal reinterprets the political thought of well-known figures in a transnational context of exile. As Blumenthal shows, exile was part of a reflexive process in which elites imagined the nation from abroad while gaining experience building the same state and civil society institutions they considered integral to their republican nation-building projects.

In 1845 two thinkers from the American hemisphere - the Argentinean statesman Domingo Faustino Sarmiento, and the fugitive ex-slave, abolitionist leader, and orator from the United States, Frederick Douglass - both published their first works. Each would become the most famous and enduring texts in what were both prolific careers, and they ensured Sarmiento and Douglass' position as leading figures in the canon of Latin American and U.S. African-American political thought, respectively. But despite the fact that both deal directly with key political and philosophical questions in the Americas, Douglass and Sarmiento, like African-American and Latin American thought more generally, are never read alongside each other. This may be

because their ideas about race differed dramatically. Sarmiento advocated the Europeanization of Latin America and espoused a virulent form of anti-indigenous racism, while Douglass opposed slavery and defended the full humanity of black persons. Still, as Juliet Hooker contends, looking at the two together allows one to chart a hemispheric intellectual geography of race that challenges political theory's preoccupation with and assumptions about East / West comparisons, and questions the use of comparison as a tool in the production of theory and philosophy. By juxtaposing four prominent nineteenth and twentieth-century thinkers - Frederick Douglass, Domingo F. Sarmiento, W. E. B. Du Bois, and Jose Vasconcelos - her book will be the first to bring African-American and Latin American political thought into conversation. Hooker stresses that Latin American and U.S. ideas about race were not developed in isolation, but grew out of transnational intellectual exchanges across the Americas. In so doing, she shows that nineteenth and twentieth-century U.S. and Latin American thinkers each looked to political models in the 'other' America to advance racial projects in their own countries. Reading these four intellectuals as hemispheric thinkers, Hooker foregrounds elements of their work that have been dismissed by dominant readings, and provides a crucial platform to bridge the canons of Latin American and African-American political thought.

“A book as fascinating as the history it relates . . . Galeano is a satirist, realist, and historian.” —Los Angeles Times For centuries, Europe’s imperial powers brutally exploited the peoples and resources of the New World. While soldiers of fortune marched across continents in search of El Dorado, white settlers established plantations and trading posts along the coasts, altering the land and bringing disease and slavery with them. In the midst of a bloody collision of civilizations, the West has birthed new societies out of the old. In the second book of his Memory of Fire trilogy, Eduardo Galeano forges a new understanding of the Americas, history retold from a diverse collection of viewpoints. Spanning the end of empire and the age of revolutions, Faces and Masks brilliantly collects the strands of the past into an iridescent work of literature.

While contemporary scholars have taken a great interest in diversity or heterogeneity, this model is relatively new and literature of the past is still crying out for its place in the diversity model. This book

models five different decolonizing methods to examine both indigenous writing and representations of indigenous peoples by learned elites.

This book, designed and written on a grand scale, is about the quest over three centuries of Spaniards born in the New World to define their 'American' identity.

Domingo Faustino Sarmiento (1811-1888) was Argentina's leading writer, educator, and politician of the nineteenth century, and served as President from 1868 to 1874. Of his several autobiographies, the best-known *Recollections of a Provincial Past* is one of the indisputable classics of Spanish American literature, as well as one of the earliest autobiographies written in the Americas in Spanish. Written in exile in 1850, the memoirs describe his childhood and adolescence in an Andean province whose customs were still those of a colony.

Sarmiento presents his life as the triumph of civilization over barbarism; looking back on his youth, he measures his wealth and strength by the accumulation of enriching personal and political experiences. He compares himself to the newly independent Argentina, claiming to be a historically representative individual whose trajectory serves to illuminate contemporary South America.
