A little extra practice can make all the difference Once you reach a certain point in your prep journey—and if you're reading this then you might have reached it—you end up spending most of your prep time working on questions you could do in your sleep. This isn't a bad thing: you don't get to be a top scorer without being able to cruise through easy questions without error, and you don't get to that level of consistency without practice. But if you find yourself wishing there were more than just a few challenging questions per practice test, then you've come to the right place. The finishing touches This no-frills collection of practice questions is intended for you to use when you think you're basically done with your math prep, but just need a few more workouts to be sure. There are solutions in case you get stuck, of course, but no comprehensive lessons. Just 125 problems, sorted roughly by difficulty.
