The Black Book is a must-have for anyone who wants to maximize their performance on the Math Level 2 Subject Test in the most efficient way possible. The Black Book works best when used with the authentic test questions in the College Board publication "The Official SAT Subject Tests in Mathematics Levels 1 & 2." The Black Book shows you how to beat the test, while the College Board's book gives you real Subject Test questions to practice with. (The SAT Math Level 2 Black Book has no affiliation with the College Board.) The Black Book and the College Board's Book are all you need to get your best possible test score. Why is the Black Book the ideal book when it comes to preparing for the Math Level 2 SAT Subject Test? It actually works, for one thing. You'll learn to use the test's own design flaws against it, instead of just drilling advanced math concepts that may not even be relevant to the test. The Black Book is a clear, concise roadmap to the test. (See the partial table of contents below). It explains exactly how every real Math Level 2 Test practice question works, and how to beat those questions in the least time possible. The Black Book contains 100 original solutions for real Math Level 2 questions from the College Board's book, so you know that what you're learning actually works on authentic test questions. (You'll need the College Board book "The Official SAT Subject Tests in Mathematics Levels 1 & 2" to use these solutions. But you shouldn't always trust the College Board's own explanations of its questions, believe it or not! As Mike demonstrates repeatedly, the College Board's explanations are often unnecessarily complicated. Mike shows you what's really going on with the test in a way that the College Board does not.)
