“My book ... details the living hell that was my experience with concussions. The majority of this story was kept from even my closest relationships. It wasn't easy, but it's time to tell it.” – Dale Jr. It was a seemingly minor crash at Michigan International Speedway in June 2016 that ended the day early for Dale Earnhardt Jr. What he didn't know was that it would also end his driving for the year. He'd dealt with concussions before, but concussions are like snowflakes—no two are the same. And recovery can be brutal—and lengthy. As a third-generation driver in a family forever connected to the sport of stock-car racing, how could Dale Earnhardt Jr. sit on the sidelines and watch everyone else take their laps? It was one of the toughest seasons of his life—one that changed him forever. In this gripping narrative from one of professional sports' most beloved figures, Dale Jr. shares stories from his journey: how his career and his injury have transformed him, how he made the decision to retire at the end of the 2017 season after eighteen years behind the wheel, and what lies ahead for him in the next chapter of his life. There's no second-guessing and no regrets from Driver #88. He simply wants to go out on his own terms and make the rest of his life off the racetrack count. Junior says, “I don't want these last races to be just about me but rather the people who made my success possible: my fans, the folks who pack the grandstands rain or shine, my teammates and crew members through the years, industry colleagues, track volunteers, friends, family, sponsors. They've all played a role. I couldn't have done it without them.”

The theme of this work is race and racism in Othello. The critical question raised is whether Othello is a racist play, written by a racist playwright, for a racist audience, or whether it is a play about racism, with Iago as the embodiment of racist attitudes. The perspectives, approaches, and conclusions of the essays are diverse.

Understanding human hearing is not only a scientific challenge but also a problem of growing social and political importance, given the steadily increasing numbers of people with hearing deficits or even deafness. This book is about the highest level of hearing in humans and other mammals. It brings together studies of both humans and animals thereby giving a more profound understanding of the concepts, approaches, techniques, and knowledge of the auditory cortex. All of the most up-to-date procedures of non-invasive imaging are employed in the research that is described.

The history of Vignale, the coachbuilder that bodied the first unforgettable Ferraris of the 1950s – responsible for cars such as the 166 and 212 Inter, the 250 and the 340 MM – narrated through rare archive photos, many of which previously unpublished. The Masterpieces of Style series dedicated to the greats of Italian coachbuilding – including Zagato, Pininfarina Touring and Giugiaro – could hardly not have a title devoted to the Turinese atelier founded in 1946 by Alfredo Vignale. This book covers, model by model, the entire output of an illustrious marque that was at its peak in the Fifties and Sixties when, thanks above all to the extraordinary talent of Giovanni Michelotti, it produced numerous bodies for Ferrari chassis, along with diverse Fiats with special versions of the 500 and 600. Not to forget the various Lancias such as the Appia and the Flavia Convertible and the prolific collaboration with Triumph.

The Gay Liberation Front dragged homosexuality out of the closet, onto the streets and into the public eye. Its London supporters held the first gay demonstrations, organized the first Pride

march and ran the first public gay dances in Britain. The Front contained an alliance of lesbians, gay men, bisexuals and transsexuals long before 'queer' was fashionable, and challenged homophobia before we had a word for it. Their direct action and street theatre were the envy of the rest of the revolutionary counterculture, their politics the most diverse, their communes the wildest and their arguments the loudest. In two short years, the Gay Liberation Front created the conditions for a lesbian and gay movement for generations to come and then imploded into fragments that became our newspapers, helplines and activist groups. Lisa Power has gathered the accounts of people who were there, the papers they wrote and the comments of bemused bystanders. She tells the previously unheard stories of the London Gay Liberation Front; of the sisters and brothers who created a brave and resourceful movement out of little but their own will and imagination and who gave us pride and anger and ideals.

Emile Durkheim is often referred to as the father of sociology. Along with Karl Marx and Max Weber he was a principal architect of modern social science and whose contribution helped established it as an academic discipline. "The Division of Labor in Society", published in 1893, was his first major contribution to the field and arguably one his most important. In this work Durkheim discusses the construction of social order in modern societies, which he argues arises out of two essential forms of solidarity, mechanical and organic. Durkheim further examines how this social order has changed over time from more primitive societies to advanced industrial ones. Unlike Marx, Durkheim does not argue that class conflict is inherent to the modern capitalistic society. The division of labor is an essential component to the practice of the modern capitalistic system due to the increased economic efficiency that can arise out of specialization; however Durkheim acknowledges that increased specialization does not serve all interests equally well. This important and foundational work is a must read for all students of sociology and economic philosophy. Presented here is the translation of George Simpson. This edition is printed on premium acid-free paper.
