Women in Saudi Arabia are often described as either victims of patriarchal religion and society or successful survivors of discrimination imposed on them by others. Madawi Al-Rasheed's new book goes beyond these conventional tropes to probe the historical, political and religious forces that have, across the years, delayed and thwarted their emancipation. The book demonstrates how, under the patronage of the state and its religious nationalism, women have become hostage to contradictory political projects that on the one hand demand female piety, and on the other hand encourage modernity. Drawing on state documents, media sources and interviews with women from across Saudi society, the book examines the intersection between gender, religion and politics to explain these contradictions and to show that, despite these restraints, vibrant debates on the question of women are opening up as the struggle for recognition and equality finally gets under way.

An index of grammatical structures, a glossary, an index and appendices of specialized vocabulary, social expressions, gestures, and Saudi names are included.

Finding Nouf's Katya Hijazi and Nayir Sharqi return for another thrilling, fast-paced mystery that provides a rare and intimate look into women's lives in the Middle East. Women in Saudi Arabia are expected to lead quiet lives circumscribed by Islamic law and tradition. But Katya, one of the few women in the medical examiner's office, is determined to make her work mean something. When the body of a brutally beaten woman is found on the beach in Jeddah, the city's detectives are ready to dismiss the case as another unsolvable murder-chillingly common in a city where the veils of conservative Islam keep women as anonymous in life as this victim is in death. If this is another housemaid killed by her employer, finding the culprit will be all but impossible. Only Katya is convinced that the victim can be identified and her killer found. She calls upon her friend Nayir for help, and soon discovers that the dead girl was a young filmmaker named Leila, whose controversial documentaries earned her many enemies. With only the woman's clandestine footage as a guide, Katya and Nayir must confront the dark side of Jeddah that Leila struggled to expose: an underworld of prostitution, violence, exploitation, and jealously guarded secrets. Along the way, they form an unlikely alliance with an American woman whose husband has disappeared. Their growing search takes them from the city's car-clogged streets to the deadly vastness of the desert beyond.!--EndFragment--

Courses are language courses developed by the Foreign Service Institute and were primarily intended for US government employees. These courses are very intense to let a learner achieve proficiency as fast and as efficient as possible. Keep in mind that most of the courses were developed during the cold war area between 1960 and 1990 and the type set in this book is therefore not as accurate as you might expect.

This book is the first comprehensive account of the phonology and morphology of Arabic. It is a pioneering work of scholarship, based on the author's research in the region. Arabic is a Semitic language spoken by some 250 million people in an area stretching from Morocco in the West to parts of Iran in the East. Apart from its great intrinsic interest, the importance of the language for phonological and morphological theory lies, as the author shows, in its rich root-and-pattern morphology and its large set of guttural consonants. Dr Watson focuses on two eastern dialects, Cairene and San'ani. Cairene is typical of an advanced urban Mediterranean dialect and has a cultural importance throughout the Arab world; it is also the variety learned by most foreign speakers of Arabic. San'ani, spoken in Yemen, is representative of a conservative peninsula dialect. In addition the book makes extensive reference to other dialects as well as to classical and Modern Standard Arabic. The volume opens with an overview of the history and varieties of Arabic, and of the study of phonology within the Arab linguistic tradition. Successive chapters then cover dialectal differences and similarities, and the position of Arabic within Semitic; the phoneme system and the

representation of phonological features; the syllable and syllabification; word stress; derivational morphology; inflectional morphology; lexical phonology; and post-lexical phonology. The Phonology and Morphology of Arabic will be of great interest to Arabists and comparative Semiticists, as well as to phonologists, morphologists, and linguists more generally.

The nineteen chapters introduce variegated regions and subcultures and their rich and dynamic musical arts, many of which heretofore have been unknown beyond local communities. The book contains insightful descriptions of genres, instruments, poetry, and performance practices of the desert heartland (Najd), the Arabian/Persian Gulf shores, the great western cities including Makkah and Medinah, the southwestern mountains, and the hot Red Sea coast. Musical customs of distinctive groups such as Bedouin, seafarers, and regional women are explored. The book is packaged with an audio CD and almost 200 images including a full color photo essay, numerous music transcriptions, a glossary with over 400 specialized terms, and original Arabic script alongside key words to assist with further research. This book provides a much-needed introduction and organizational structure for the diverse and complex musical arts of the region.

THIS BOOK DOESN'T CONTAIN ANY ARABIC LETTERS! ALL ARABIC WORDS IN THIS BOOK WERE WRITTEN IN ENGLISH-TRANSLITERATION! Have you always wanted to learn how to speak the Saudi Najdi Arabic dialect but simply didn't have the time? Well if so, then, look no further. You can hold in your hands one of the most advanced and revolutionary method that was ever designed for quickly becoming conversational in a language. In creating this time-saving program, master linguist Yatir Nitzany spent years examining the twenty-seven most common languages in the world and distilling from them the three hundred and fifty words that are most likely to be used in real conversations. These three hundred and fifty words were chosen in such a way that they were structurally interrelated and, when combined, form sentences. Through various other discoveries about how real conversations work--discoveries that are detailed further in this book--Nitzany created the necessary tools for linking these words together in a specific way so that you may become rapidly and almost effortlessly conversant--now. If your desire is to learn complicated grammatical rules or to speak perfectly proper and precise Arabic, this book is not for you. However, if you need to actually hold a conversation while on a trip to Riyadh or other provinces in central of Saudi Arabia, to impress that certain someone, or to be able to speak with your grandfather or grandmother as soon as possible, then the Nitzany Method is what you have been looking for. This book is recommended for those who already have some prior knowledge of the pronunciation of Arabic accents (such as the Arabic accents: ayin, ghayn, ha, and khaf). For those of you who do not, this book does indeed provide some great, in-depth techniques on the pronunciation and recognition of these accents, that you will encounter throughout the program. These techniques have proven extremely beneficial for beginner students who were previously

unfamiliar with these accent pronunciations. But keep in mind this isn't a pronunciation book! This method is designed for fluency in a foreign language, while communicating in the first person present tense. Nitzany believes that what's most important is actually being able to understand and be understood by another human being right away. Therefore, unlike other courses, all words in this program are taught in English transliteration, without having to learn the complex alphabet. More formalized training in grammar rules, etc., can come later. This is one of the several, in a series of instructional language guides, the Nitzany Method's revolutionary approach is the only one in the world that uses its unique language technology to actually enable you to speak and understand native speakers in the shortest amount of time possible. No more depending on volumes of books of fundamental, beginner, intermediate, and advanced levels, all with hundreds of pages in order to learn a language. With Conversational Arabic Quick and Easy, all you need are forty-six pages. Learn Najdi Arabic today!

A Linguistic History of Arabic presents a reconstruction of proto-Arabic by the methods of historical-comparative linguistics. It challenges the traditional conceptualization of an old, Classical language evolving into the contemporary Neo-Arabic dialects. Professor Owens combines established comparative linguistic methodology with a careful reading of the classical Arabic sources, such as the grammatical and exegetical traditions. He arrives at a richer and more complex picture of early Arabic language history than is current today and in doing so establishes the basis for a comprehensive, linguistically-based understanding of the history of Arabic. The arguments are set out in a concise, case by case basis, making it accessible to students and scholars of Arabic and Islamic culture, as well as to those studying Arabic and historical linguists.

Arabic is one of the world's largest languages, spoken natively by nearly 300 million people. By strength of numbers alone Arabic is one of our most important languages, studied by scholars across many different academic fields and cultural settings. It is, however, a complex language rooted in its own tradition of scholarship, constituted of varieties each imbued with unique cultural values and characteristic linguistic properties. Understanding its linguistics holistically is therefore a challenge. The Oxford Handbook of Arabic Linguistics is a comprehensive, one-volume guide that deals with all major research domains which have been developed within Arabic linguistics. Chapters are written by leading experts in the field, who both present state-of-the-art overviews and develop their own critical perspectives. The Handbook begins with Arabic in its Semitic setting and ends with the modern dialects; it ranges across the traditional - the classical Arabic grammatical and lexicographical traditions--to the contemporary--Arabic

sociolinguistics, Creole varieties and codeswitching, psycholinguistics, and Arabic as a second language - while situating Arabic within current phonetic, phonological, morphological, syntactic and lexicological theory. An essential reference work for anyone working within Arabic linguistics, the book brings together different approaches and scholarly traditions, and provides analysis of current trends and directions for future research.

The region of Najd in Central Arabia has always been regarded as inaccessible, ringed by a belt of sand deserts, the Naf?d, Dahana and the Rub' al-Kh?li and often with its population at odds with the rulers of the outer settled lands. It is however the centre of a purely Arabian culture based on a partnership between bedouin camel husbandry and settled palm cultivation. Possibly as a result of overpopulation the bedouin have periodically spread over into the lands of the Fertile Crescent. Because of their isolated position the Najdi dialect is of a very interesting and archaic type showing very little non-Arabic influence, which has led to the reputation of the Arabian bedouin as preservers of the original Classical form and considerable

prestige being attached to the Najdi type. Consequently the region is a powerhouse of dialect influence so that Najdi based dialects are spoken all along the Gulf Coast and throughout most of the Syrian Desert. Interest in these dialects has led to a number of recent studies of their oral literature and of the morphology and phonology. Ingham's work concentrates on the grammatical system, syntax and usage and is based on a number of trips to the region over the last fifteen years. The data base includes bedouin oral narrative, ordinary conversation and radio plays.

Arab populations have their "own" genetic disorders, both universal and particular. Genetic diversity within these source populations, along with the fact that the rates of inbreeding are often high and family sizes are often large, constitute conditions that facilitate the emergence and detection of phenotypes explained notably by autosomal recessive inheritance; in which case, the use of homozygosity gene mapping can facilitate the discovery of the corresponding genes. The present book includes 5 parts dealing with various aspects that relate to the genetic structure of Arabs and minorities within the Arab world as well as genetic disorders prevalent in this part of the world. It includes updated reviews of the genetic disorders in various Arab countries and geographic regions. The focus is primarily, but not exclusively, on the group of single-gene disorders with particular emphasis on autosomal recessive conditions. It further includes epidemiological and clinical data as well as inheritance patterns, mutation and polymorphism data, and available haplotype analysis data. The ethnic and genetic diversity of the Arab populations is discussed as well as aspects of genetic counseling practice

in this region together with a proposal for an ethical framework for genetic research and prevention of genetic disorders. The target audience of this book includes human and medical geneticists, genetic counselors, researchers, medical specialists dealing with Arab patients or practicing in Arab countries, medical and genetic counseling students, and nurses.

including Greece, Italy and Spain. The author achieved his ambitious goal of finding pertinent rules and codes that were followed in previous societies for the processes that formed the built environment of their towns and cities, including building activities at the neighborhood level and the decision-making process that took place between proximate neighbors. The original languages of the texts that were translated into English are Greek, Latin, Italian, Arabic and Spanish. The sources for the chapter on Greece date from the 2nd century B.C.E. to the 19th century C.E. Those for the chapter on Italy date from the 10th to the 14th centuries C.E. and for the chapter on Spain from the 5th to the 18th centuries C.E. Numerous appendices are included to enhance and elaborate on the material that make up the chapters. This book provides lessons and insights into how compact and sustainable towns and cities that are greatly admired today were achieved in the past and how we and future generations can learn from this rich heritage, including the valuable insight provided by the nature of the rules and codes and their application through centuries of continuous use.

This book constitutes revised selected papers from the 7th International Conference on Arabic Language Processing, ICALP 2019, held in Nancy, France, in October 2019. The 21 full papers presented in this volume were carefully reviewed and selected from 38 submissions. They were organized in topical sections named: Arabic dialects and sentiment analysis; neural techniques for text and speech; modeling modern standard Arabic; resources: analysis, disambiguation and evaluation.

Much of the insight in the field of Arabic linguistics has for a long time remained unknown to linguists outside the field. Regrettably, Arabic data rarely feature in the formulation of theories and analytical tools in modern linguistics. This situation is unfavourable to both sides. The

Arabist, once an outrider, has almost become a non-member of the mainstream linguistics community. Consequently, linguistics itself has been deprived of a wealth of data from one of the world's major languages. However, it is reassuring to witness advances being made to integrate into mainstream linguistics the visions and debates of specialists in Arabic. Building on this fruitful endeavour, this book presents thought-provoking, new articles, especially written for this collection by leading scholars from both sides. The authors discuss topics in historical, social and spatial dialectology focusing on Arabic data investigated within modern analytical frameworks.

An important U.S. ally in the Middle East

This book makes an original contribution to the fields of sociolinguistics, language planning policy and Chinese language studies. It examines the effectiveness of the Singapore's Speak Mandarin Campaign in changing the language use of dialect speakers towards Mandarin. Singapore may be only "a small red dot" and barely visible on the world's map. However, its complex and dynamic linguistic diversity and its quadrilingual educational system make it a unique and fascinating research site for examining deliberate language planning on the part of governmental authorities. 2017 marks the 38th anniversary of the Speak Mandarin Campaign, a focused language-planning policy aimed at changing the deeply entrenched sociolinguistic habits of Chinese Singaporeans who are used to speaking Chinese dialects. This book provides a revealing update on dialect speakers' attitudes towards the campaign by including discussions and other related issues such as the recent call for the revitalisation of Chinese dialects by younger dialect speakers, Chinese students' attitude towards learning Mandarin in schools, the encroachment of English in the home environment, the spread and dominance of English in the local linguistic landscape, and the

challenges of maintaining Mandarin as a language of use and preference.
