A personal and empowering blueprint—from one of America's rising Democratic stars—for outsiders who seek to become the ones in charge. Leadership is hard. Convincing others—and often yourself—that you possess the answers and are capable of world-affecting change requires confidence, insight, and sheer bravado. *Minority Leader* is the handbook for outsiders, written with the awareness of the experiences and challenges that hinder anyone who exists beyond the structure of traditional white male power—women, people of color, members of the LGBTQ community, and millennials ready to make a difference. In *Minority Leader*, Stacey Abrams argues that knowing your own passion is the key to success, regardless of the scale or target. From launching a company, to starting a day care center for homeless teen moms, to running a successful political campaign, finding what you want to fight for is as critical as knowing how to turn thought into action. Stacey uses her experience and hard-won insights to break down how ambition, fear, money, and failure function in leadership, while offering personal stories that illuminate practical strategies. Stacey includes exercises to help you hone your skills and realize your aspirations. She discusses candidly what she has learned over the course of her impressive career: that differences in race, gender, and class are surmountable. With direction and dedication, being in the minority actually provides unique and vital strength, which we can employ to rise to the top and make real change.

Beyond Bylines: Media Workers and Women's Rights in Canada explores the ways in which several of Canada's women journalists, broadcasters, and other media workers reached well beyond the glory of their personal bylines to advocate for the most controversial women's rights of their eras. To do so, some of them adopted conventional feminine identities, while others refused to conform altogether, openly and defiantly challenging the gender expectations of their day. The book consists of a series of case studies of the women in question as they grappled with the concerns close to their hearts: higher education for women, healthy dress reforms, the vote, equal opportunities at work, abortion, lesbianism, and Aboriginal women's rights. Their media reflected their respective eras: intellectual magazines, daily and weekly newspapers, radio, feminist public relations, alternative women's periodicals, and documentary film made for television. Barbara Freeman takes an interdisciplinary approach, combining biography, history, and communication studies to demonstrate how their use of different media both enabled and limited these women in their ability to be daring advocates for gender equality. She shows how a number of these women were linked through the generations by their memberships in activist women's organizations.

'If Ray Mears isn't a Great Living Englishman, then goodness me, who is? Ray is a persuader, pragmatist and populariser in the Durrell-Attenborough-Bellamy tradition.' - Robert Crampton, The Times Ray Mears is a household name through his television series Tracks, World of Survival, Bushcraft Survival, The Real Heroes of Telemark and many more. He is a private individual who shuns publicity whenever possible and would prefer to let his many skills tell their own tale - until now. In My Outdoor Life, Ray tells of his childhood and the formative years when he first developed a passion for

both bushcraft and the martial arts skills that are central to his life. Having travelled the world several times over, he is no stranger to risk and has had more than his fair share of dangerous and life-threatening encounters to share with his readers. But his life is so much more than a tale of derring-do. Shortly after he returned to England having narrowly survived a serious helicopter crash, his father died. Just a year later, he had to face the death of his first wife Rachel. The book conveys the many sides of Ray Mears, taking us up to the present day - including the previously untold story of his involvement in the man-hunt for murderer Raoul Moat. My Outdoor Life gives us all a chance to share a life-story as rich and as inspirational as a walk in woods with the man himself, Ray Mears.

"The revolution will be Twittered!" declared journalist Andrew Sullivan after protests erupted in Iran in June 2009. Yet for all the talk about the democratizing power of the Internet, regimes in Iran and China are as stable and repressive as ever. In fact, authoritarian governments are effectively using the Internet to suppress free speech, hone their surveillance techniques, disseminate cutting-edge propaganda, and pacify their populations with digital entertainment. Could the recent Western obsession with promoting democracy by digital means backfire? In this spirited book, journalist and social commentator Evgeny Morozov shows that by falling for the supposedly democratizing nature of the Internet, Western do-gooders may have missed how it also entrenches dictators, threatens dissidents, and makes it harder -- not easier -- to promote democracy. Buzzwords like "21st-century statecraft" sound good in PowerPoint presentations, but the reality is that "digital diplomacy" requires just as much oversight and consideration as any other kind of diplomacy. Marshaling compelling evidence, Morozov shows why we must stop thinking of the Internet and social media as inherently liberating and why ambitious and seemingly noble initiatives like the promotion of "Internet freedom" might have disastrous implications for the future of democracy as a whole.

became enforceable. This volume brings together papers that offer conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy and data protection. It is one of the results of the eleventh annual International Conference on Computers, Privacy, and Data Protection, CPDP 2018, held in Brussels in January 2018. The book explores the following topics: biometrics and data protection in criminal justice processing, privacy, discrimination and platforms for men who have sex with men, mitigation through data protection instruments of unfair inequalities as a result of machine learning, privacy and human-robot interaction in robotized healthcare, privacy-by-design, personal data protection of deceased data subjects, large-scale face databases and the GDPR, the new Europol regulation, rethinking trust in the Internet of Things, fines under the GDPR, data analytics and the GDPR, and the essence of the right to the protection of personal data. This interdisciplinary book was written while the reality of the General Data Protection Regulation 2016/679 was becoming clear. It discusses open issues and daring and prospective approaches. It will serve as an insightful resource for readers with an interest in computers, privacy and data protection.

Whether members of the family are headed to school or work, smartphones accompany family members throughout the day. The growing sophistication of mobile communication has unleashed a proliferation of apps, channels, and platforms that link parents to their children and the key institutions in their lives. While parents may feel empowered by their ability to provide their children assistance with a click on their smartphone, they may also feel pressured and overwhelmed by this need to always be on call for their children. This book focuses on the phenomenon of transcendent parenting, where parents actively use technology to go beyond traditional, physical practices of parenting. In drawing on the experiences of intensely digitally-connected families in Singapore to tell a global story, Sun Sun Lim argues how transcendent parenting can embody and convey, intentionally or not, the parenting priorities in these households. Chapters outline how parents exploit mobile connectivity to transcend the physical distance between themselves and their children, the online and offline social interaction environments, and the timelessness of seemingly ceaseless parenting. Transcendent Parenting further explores how mobile communication allows parents to be more involved than ever in their children's lives, leaving readers to question whether or not parents have become too involved as a result. With its clear discussions of the effects of transcendent parenting on parents' wellbeing and children's personal development,

The #1 international best seller *In Lean In*, Sheryl Sandberg reignited the conversation around women in the workplace. Sandberg is chief operating officer of Facebook and coauthor of *Option B* with Adam Grant. In 2010, she gave an electrifying TED talk in which she described how women unintentionally hold themselves back in their careers. Her talk, which has been viewed more than six million times, encouraged women to “sit at the table,” seek challenges, take risks, and pursue their goals with gusto. *Lean In* continues that conversation, combining personal anecdotes, hard data, and compelling research to change the conversation from what women can't do to what they can. Sandberg provides practical advice on negotiation techniques, mentorship, and building a satisfying career. She describes specific steps women can take to combine professional achievement with personal fulfillment, and demonstrates how men can benefit by supporting women both in the workplace and at home. Written with humor and wisdom, *Lean In* is a revelatory, inspiring call to action and a blueprint for individual growth that will

A straight white girl can kiss a girl, like it, and still call herself straight—her boyfriend may even encourage her. But can straight white guys experience the same easy sexual fluidity, or would kissing a guy just mean that they are really gay? Not Gay thrusts deep into a world where straight guy-on-guy action is not a myth but a reality: there's fraternity and military hazing rituals, where new recruits are made to grab each other's penises and stick fingers up their fellow members' anuses; online personal ads, where straight men seek other straight men to masturbate with; and, last but not least, the long and clandestine history of straight men frequenting public restrooms for sexual encounters with other men. For Jane Ward, these sexual practices reveal a unique social space where straight white men can—and do—have sex with other straight white men; in fact, she argues, to do so reaffirms rather than challenges their gender and racial identity. Ward illustrates that sex between straight white men allows them to leverage whiteness and masculinity to authenticate their heterosexuality in the context of sex with men. By understanding their same-sex sexual practice as meaningless, accidental, or even necessary, straight white men can perform homosexual contact in heterosexual ways. These sex acts are not slippages into a queer way of being or expressions of a desired but unarticulated gay identity. Instead, Ward argues, they reveal the fluidity and complexity that characterizes all human sexual desire. In the end,

Ward's analysis offers a new way to think about heterosexuality—not as the opposite or absence of homosexuality, but as its own unique mode of engaging in homosexual sex, a mode characterized by pretense, dis-identification and racial and heterosexual privilege. Daring, insightful, and brimming with wit, *Not Gay* is a fascinating new take on the complexities of heterosexuality in the modern era.

Alphanomics: The Informational Underpinnings of Market Efficiency is intended to be a compact introduction to academic research on market efficiency, behavioral finance, and fundamental analysis and is dedicated to the kind of decision-driven and prospectively-focused research that is much needed in a market constantly seeking to become more efficient. The authors refer to this type of research as Alphanomics, the informational economics behind market efficiency. Alpha refers to the abnormal returns, which provide the incentive for some subpopulation of investors to engage in information acquisition and costly arbitrage activities. Nomics refers to the economics of alpha extraction, which encompasses the costs and incentives of informational arbitrage as a sustainable business proposition. Some of the questions that are addressed include: why do we believe markets are efficient?; what problems have this belief engendered?; what factors can impede and/or facilitate market efficiency?; what roles do investor sentiment and costly arbitrage play in determining an equilibrium level of informational efficiency?; what is the essence of value investing?; how is it related to fundamental analysis (the study of historical financial

data)?; and how might we distinguish between risk and mispricing based explanations for predictability patterns in returns? The first two sections review the evolution of academic thinking on market efficiency and introduce the noise trader model as a rational alternative. Section 3 surveys the literature on investor sentiment and its role as a source of both risks and returns. Section 4 discusses the role of fundamental analysis in value investing. Section 5 reviews the literature on limits to arbitrage, and section 6 discusses research methodology issues associated with the need to distinguish mispricing from risk.

With stunning regularity, the search for our cosmic roots has been yielding remarkable new discoveries about the universe and our place in it. In his compelling book, *Origins: The Quest for Our Cosmic Roots*, veteran science journalist Tom Yulsman chronicles the latest discoveries and describes in clear and engaging terms what they mean. From the interior of protons to the outer reaches of the universe, and from the control room of one of the world's most powerful particle accelerators to an observatory atop the tallest mountain in the Pacific basin, Yulsman takes readers on a fantastic voyage at the cutting edge of science. How could the universe have sprouted from absolute nothingness? What is the origin of galaxies? How do stars and planets form? And despite what now seem to be incredible odds, how did Earth come to be a rich oasis of biodiversity—one that has given rise to a species intelligent enough to ask these questions? In laying out the answers, *Origins* addresses some of the most profound issues humans have ever confronted.

Renaissance humanists believed that if you want to build a just society you must begin with the facts of human nature. This book argues that the idea of a universal human nature was as important to Shakespeare as it was to every other Renaissance writer. In doing so it questions the central principle of post-modern Shakespeare criticism.

Postmodernists insist that the notion of defining a human essence was alien to Shakespeare and his contemporaries; as radical anti-essentialists, the Elizabethans were, in effect, postmodernists before their time. In challenging this claim Shakespeare's Humanism shows that for Shakespeare, as for every other humanist writer in this period, the key to all wise action was 'the knowledge of our selves and our human condition'.

Former rival and associate of James "Whitey" Bulger tells all. After returning from Vietnam where he served as a combat Marine, Pat Nee fought a gang war against Whitey Bulger. Joseph Russo. The two gangs joined forces, with Winter as overall boss. When Winter was convicted of fixing horse races in 1979, Bulger became leader, and Nee responded by concentrating his energy on raising money and smuggling guns to the Provisional IRA. Disgusted by Bulger's brutality, and increasingly focused on the Irish cause, Nee distanced himself from his former ally. Ultimately it was revealed that, for years, Bulger had served as an FBI informant. A Criminal and an Irishman is the story of Pat Nee's life as an Irish immigrant and Southie son, a Marine, a convicted IRA gun smuggler, and a former violent rival and then associate of James "Whitey" Bulger. His narrative transports the reader into the criminal underworld, inside planning and preparation for an armored car heist, inside gang wars and revenge killings. Nee details his evolution from tough street kid to armed robber to dangerous potential killer, and discloses for the first time how he used his underworld connections and know-how as a secret, Boston-based operative for the Irish Republican Army. For years Pat smuggled weapons and money from the United States to Ireland – in the bottoms of coffins, behind false panels of vans – leading up to a transatlantic shipment of seven and a half tons of munitions aboard the fishing trawler Valhalla. No other Southie underworld figure can match Pat's reputation for resolve and authenticity. From the Trade Paperback edition.
