Book Excerpt: ...tion with posterity to refuse to accept her fame as a true exponent of her power. And yet they occupy two-fifths of Peloponnese and lead the whole, not to speak of their numerous allies without. Still, as the city is neither built in a compact form nor adorned with magnificent temples and public edifices, but composed of villages after the old fashion of Hellas, there would be an impression of inadequacy. Whereas, if Athens were to suffer the same misfortune, I suppose that any inference from the appearance presented to the eye would make her power to have been twice as great as it is. We have therefore no right to be sceptical, nor to content ourselves with an inspection of a town to the exclusion of a consideration of its power; but we may safely conclude that the armament in question surpassed all before it, as it fell short of modern efforts; if we can here also accept the testimony of Homer's poems, in which, without allowing for the

By Muslim scholars of the 10 th century the sciences were divided into "Arab Sciences" and "Old"- or "Non-Arab Sciences". To the former belonged Grammar, Ethics and Dogmatics, History and Knowledge of Literature; to the latter Philosophy, Natural Science and Medicine. In the main the division is a proper one. The last-named branches are not only those which were determined the most by foreign influences, but those too which never became really popular. And yet the so called "Arab Sciences" are not altogether pure native products. They too arose or were developed in places in the Muslim empire where Arabs and Non-Arabs met

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. This book represents a 'position statement' from the intellectually vibrant and challenging debate that emanated from the inaugural conference project launch entitled 'The Idea of Education' held at Mansfield College, Oxford in July 2002. The book conveys a wide spectrum of views about 'the idea of education' in recognition of the fact that 'the idea' is not as straightforward as it may appear on the surface. It seems the universities are not alone in this apparent uncertainty of definition. Further Education seems equally nonplussed as regard its purpose or *raison d'être*.

Furthermore, even for those within the sector, it appears to be a point of much contention as to where Further Education ends and Higher Education begins. The book is divided into three main sections: The Current Structures of Education, Issues within Contemporary Education and The Ambitions of Education. The chapters wrestle, sometimes at variance with each other, with the paradoxes and concerns felt by each writer grappling with the idea of education.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective,

to clarifying the principle meanings attributed to the constitution. The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology of politics and comparative public law.

Can secularism offer us moral, aesthetic, and spiritual satisfaction? Or does the secular view simply affirm a dog-eat-dog universe? At a time when the issues of religion, evolution, atheism, fundamentalism, Darwin, and science fill headlines and invoke controversy, *The Joy of Secularism* provides a balanced and thoughtful approach for understanding an enlightened, sympathetic, and relevant secularism for our lives today. Bringing together distinguished historians, philosophers, scientists, and writers, this book shows that secularism is not a mere denial of religion. Rather, this positive and necessary condition presents a vision of a natural and difficult world--without miracles or supernatural interventions--that is far richer and more satisfying than the religious one beyond. From various perspectives--philosophy, evolutionary biology, primate study, Darwinian thinking, poetry, and even bird-watching--the essays in this collection

examine the wealth of possibilities that secularism offers for achieving a condition of fullness. Factoring in historical contexts, and ethical and emotional challenges, the contributors make an honest and heartfelt yet rigorous case for the secular view by focusing attention on aspects of ordinary life normally associated with religion, such as the desire for meaning, justice, spirituality, and wonder. Demonstrating that a world of secular enchantment is a place worth living in, *The Joy of Secularism* takes a new and liberating look at a valuable and complex subject. The contributors are William Connolly, Paolo Costa, Frans de Waal, Philip Kitcher, George Levine, Adam Phillips, Robert Richards, Bruce Robbins, Rebecca Stott, Charles Taylor, and David Sloan Wilson.

For more than 120 years (1714–1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This

volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated. This powerful drama examines the fears of parents driven to do "the right thing" when the safety of their daughter is in doubt. A mother and father who learn that the next door neighbor is a convicted child molester consider both vigilance and vigilantism before being forced into action by a pair of child advocacy crusaders. The shocking climax hits a raw nerve, leaving the audience to consider where the line between right and wrong lies.
