Arduino: A Technical Reference J. M. Hughes,2016-05-16 Rather than yet another project-based workbook, Arduino: A Technical Reference is a reference and handbook that thoroughly describes the electrical and performance aspects of an Arduino board and its software. This book brings together in one place all the information you need to get something done with Arduino. It will save you from endless web searches and digging through translations of datasheets or notes in project-based texts to find the information that corresponds to your own particular setup and question. Reference features include pinout diagrams, a discussion of the AVR microcontrollers used with Arduino boards, a look under the hood at the firmware and run-time libraries that make the Arduino unique, and extensive coverage of the various shields and add-on sensors that can be used with an Arduino. One chapter is devoted to creating a new shield from scratch. The book wraps up with detailed descriptions of three different projects: a programmable signal generator, a smart thermostat, and a programmable launch sequencer for model rockets. Each project highlights one or more topics that can be applied to other applications.

The Field Guide to Hacking Michelle Poon,2018-06-25 In The Field Guide to Hacking, the practises and protocols of hacking is defined by notions of peer production, self-organised communities, and the intellectual exercise of exploring anything beyond its intended purpose. Demonstrated by way of Dim Sum Labs hackerspace and its surrounding community, this collection of snapshots is the work generated from an organic nebula, culled from an overarching theme of exploration, curiosity, and output. This book reveals a range of techniques of both physical and digital, documented as project case studies. It also features contributions by researchers, artists, and scientists from prominent institutions to offer their perspectives on what it means to hack. Altogether, a manual to overcome the limitations of traditional methods of production.
