

## Scott 2013 Standard Postage Stamp Catalogue Vol 4

Shows stamps from around the world and lists their current values

The ideal catalogue for all collectors needing comprehensive information on stamps issued by these Mediterranean Islands. Now with more complete and in-depth coverage than ever.

"Includes new stamp listings through the February 2012 Linn's stamp news special edition catalogue update."

Winner of the University of Michigan Press / Humanities, Arts, Science, and Technology Alliance and Collaboratory (HASTAC) Prize for Notable Work in the Digital Humanities In the age of digital communications, it can be difficult to imagine a time when the meaning and imagery of stamps was politically volatile. While millions of Americans collected stamps from the 1880s to the 1940s, *Stamping American Memory* is the first scholarly examination of stamp collecting culture and how stamps enabled citizens to engage their federal government in conversations about national life in early-twentieth-century America. By examining the civic conversations that emerged around stamp subjects and imagery, this work brings to light the role that these under-examined historical artifacts have played in carrying political messages. Sheila A. Brennan crafts a fresh synthesis that explores how the US postal service shaped Americans' concepts of national belonging, citizenship, and race through its commemorative stamp program. Designed to be saved as souvenirs, commemoratives circulated widely and stood as miniature memorials to carefully selected snapshots from the American past that also served the political needs of small interest groups. *Stamping American Memory* brings together the histories of the US postal service and the federal government, collecting, and philately through the lenses of material culture and memory to make a significant contribution to our understanding of this period in American history.

Histories of Egyptology are increasingly of interest: to Egyptologists, archaeologists, historians, and others. Yet, particularly as Egypt undergoes a contested process of political redefinition, how do we write these histories, and what (or who) are they for? This volume addresses a variety of important themes, the historical involvement of Egyptology with the political sphere, the manner in which the discipline stakes out its professional territory, the ways in which practitioners represent Egyptological knowledge, and the relationship of this knowledge to the public sphere. *Histories of Egyptology* provides the basis to understand how Egyptologists constructed their discipline. Yet the volume also demonstrates how they construct ancient Egypt, and how that construction interacts with much wider concerns: of society, and of the making of the modern world.

"Includes new stamp listings through the March 2012 Linn's stamp news special edition catalogue update."

"Confederate States, Canal Zone, Danish West Indies, Guam, Hawaii, United Nations; United States administration: Cuba, Puerto Rico, Philippines, Ryukyu Islands."

Postage stamps do more than just facilitate the transport of mail. They tell a story. This book tells the unique story of the indelible imprint Italians, Italian-Americans, and lovers of Italian culture have imparted on the formation and development of the United States. While each encapsulated image traces a single thread of the journey, together they form a rich trove of experiences and contributions from the very beginning to the present. But the story does not end here! As successes and contributions from this large ethnic and highly assimilated group continue to mount, the pictorial story of America will continue to grow. The ever-

blossoming tale of those with a root in the boot will grace the American landscape for years to come.

"Includes new stamp listings through the July 2012 Linn's stamp news special edition catalogue update."

It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social, cultural, and historical circumstances - archaeology is always carried out in the present. More recently, however, many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself: how we might undertake archaeologies of, as well as in the present. This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub-field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past. In addition to detailed archaeological case studies, it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world, including anthropology, psychology, philosophy, historical geography, science and technology studies, communications and media, ethnoarchaeology, forensic archaeology, sociology, film, performance, and contemporary art. This volume seeks to explore the boundaries of an emerging sub-discipline, to develop a tool-kit of concepts and methods which are applicable to this new field, and to suggest important future trajectories for research. It makes a significant intervention by drawing together scholars working on a broad range of themes, approaches, methods, and case studies from diverse contexts in different parts of the world, which have not previously been considered collectively.

A guide for stamp collectors from the beginner to the professional including collectibles, pricing, articles on the hobby and more.

Branding is a profoundly geographical type of commodification process. Many things become commodities that are compared and valued on markets around the globe. Places such as cities or regions, countries and nations attempt to acquire visibility through branding.

Geographical imaginations are evoked to brand goods and places as commodities in order to show or create connections and add value. Yet, not all that is branded was originally intended and created for markets. This volume aims to broaden current understanding of branding through a series of contributions from geography, history, political studies, cultural, and media studies, offering insight into how ordinary places, objects and practices become commodities through branding. In so doing, the contributions also show how nation, place and product as targets of branding can be seen as intertwined. To discuss these forms of branding, book chapters refer to states, cities, holiday destinations, food malls, movies, dances, post stamps and other items that serve as brands and/or are branded. The book will be of interest to students and scholars in geography, sociology, history, cultural studies and business studies who would like to gain an understanding of the intricate and surprising ways in which things, places, and cultural practices become brands.

"For approaching two centuries, the images on postage stamps have been used to convey messages from the government of the day to the general public. Science has been used to enhance those messages for the past nine decades. In this book, I explore the ways in which science and scientists have been portrayed on stamps and look at the ideas and, in some cases, the propaganda that underpins them."--Page 1.

This is the most comprehensive stamp catalog in print. Volume 1 deals with stamps from the English-speaking world; the other 3 volumes cover alphabetically the other countries of the world.

"Released ... 2017; includes new stamp listings through ... 2017 Linn's Stamp News Monthly Catalogue Update."

"Includes new stamp listings through the April 2012 Linn's stamp news special edition catalogue update."

"Includes new stamp listings through the May 2012 Linn's stamp news special edition catalogue update."

Scott 2013 Standard Postage Stamp Catalogue Scott Standard Postage Stamp Catalogue 2013 United States and Affiliated Territories, United Nations, Countries of the World A-B Scott Publishing Company

"Includes new stamp listings through the February 2018 Linn's stamp news monthly catalogue update."

A narrative poem about a celebrated baseball player who strikes out at the crucial moment of a game.

The Scott Catalogue of postage stamps, published by Scott Publishing Co, is updated annually with hundreds of thousands of changes and lists all the stamps of the entire world . From its humble beginning as a 24-page bound pamphlet, the multi-volume set now list more than 700,000 stamps from 600 different postal entities. Because of the size of each Volume, the 2021 edition has each volume split into a part A and B. So when purchasing you are obtaining the volume set of part A and B. Scott Publishing publishes a total of eight large volumes that include six volumes containing all the countries of the world, the United States Specialized Catalog, and the 1840-1940 Classic Specialized Catalogue (covering the world for the first 100 years that stamps were issued). The numbering system used by Scott to identify stamps is dominant among stamp collectors in the United States, Mexico, Canada and through out the world. It is a must for any researcher or stamp collector
