inadequacy. The big questions bothered me: Who am I? How can I find the inner peace I so desperately crave? What is the purpose of my life? After nearly a half decade search for answers, hundreds of hours spent in meditation, and even more time spent reading philosophy, spiritual and Buddhist books, a meeting with an enlightened teacher transformed me: the seeker became an ordinary dude. In this guide you'll find no gurus. No monks. No mystics. But instead a dude just like you...perhaps someone you'd meet in a bar and chat about life's big questions till the early hours of the morning. While you'll learn that enlightenment is much more ordinary than you think, you'll discover a not-so-ordinary understanding of life and the world we live in. If you want to put the spiritual quest behind you, escape the pressures of the modern world and endless search for completeness, and find contentment in everyday life, then I invite you to pull up a bar stool, crack a beer, and stay up with me till the wee hours.

The premise of Darkened Enlightenment is to highlight the fact that there currently exist a number of socio-political forces that have the design, or ultimate consequence, of trying to extinguish the light of reason and rationality. The book presents a critique of modernity and provides a socio-political and cultural analysis of world society in the early twenty-first century. Specifically, this analysis examines the deterioration of democracy, human rights, and rational thought. Key features include a combination of academic analysis that draws on numerous and specific examples of the growing darkness that surrounds us along with a balanced practical, everyday-life approach to the study of the socio-political world we live in through the use of popular culture references and featured boxes. The general audience will also be intrigued by these same topics that concern academics including: a discussion on the meaning of "fake news"; attacks on the media and a declaration of the news media as the "enemy of the people"; the rise of populism and nationalism around the world; the deterioration of freedom and human rights globally; the growing economic disparity between the rich and the poor; attempts to devalue education; a growing disbelief in science; attacks on the environment; pseudoscience as a by-product of unreasoned and irrational

This book will make a great contribution to such fields as sociology, philosophy, political science, environmental science, public administration, economics, psychology, and cultural studies.

This is the second volume of essays and articles on enlightenment and the Enlightenment Intensive from the archive of Charles Berner. It spans the years from 1969 through 2005. I heard Berner say many times that his understanding of Truth evolved as his meditation experiences unfolded. He would advise "If you want to understand what I understands now, then you should look to my latest writings." These essays are placed in a chronological order so you can appreciate the evolution of his understanding. The book begins with a Forward written by Edrid who began his studies with Berner in the early 1960's. Edrid's first-hand recollections of Berner's universe and the beginning formulation of the Enlightenment Intensive is insightful and revealing. Chapter 1 is an article that first appeared in 1969. It is one of Berner's earliest writings on the subject of self enlightenment and the Enlightenment Intensive. Chapter 2, What Is and Is Not Enlightenment, was the first chapter of The Transmission of Truth, published in 1977. Chapter 3 is a first-person account of the experiences of a fictitious individual, Alan B. Dow, who attends an Enlightenment Intensive for the first time. Chapter 4, entitled, Charles in Enlightenment Land was originally a lecture given at an Enlightenment Intensive in the 1970's. Chapter 5, Levels of Enlightenment and Advice On How To Do The Enlightenment Technique, was also a lecture that Berner gave during a long Enlightenment Intensive in the early 1970's. Enlightenment is the title of Chapter 6. It is excerpted from the 2005 book, Consciousness of Truth. Bill Savoie wrote the final chapter entitled, About Charles Berner. In his essay Bill shares his experience and insights about Charles Berner and those early days from which the Enlightenment Intensive was formed.

inform our understanding of the crisis of modernity? Social theory has been formed through elaboration and critique of the classical tradition, and this introductory volume illuminates current theoretical terrain by examining major classical theories - of Saint-Simon, Comte, Marx, Durkheim, Dilthey, Tonnies, Simmel and Weber - highlighting recurring themes and debates. It explains how classical sociology emerged through a debate with the Enlightenment, in which the concept of the 'social' took shape. This was constructed around various themes emphasizing contrasting components of social life - including material, cultural, rational and moral factors. These divergent theorizations set the scene for the play of theoretical oppositions that characterize much subsequent theoretical dispute. Along with these debates there were questions about the very identity of sociology, which in turn relate to a core issue in the discipline - grasping the crisis of modernity. This authoritative text introduces the key issues of classical sociology to undergraduates, making use of student-friendly features such as clear summaries, further reading and a glossary. It lays the foundations for an understanding of contemporary discussion, and will also be recognized at the postgraduate level as a key reference in the field.

Blamed for the bloody disasters of the 20th century: Auschwitz, the Gulags, globalisation, Islamic terrorism; heralded as the harbinger of reason, equality, and the end of arbitrary rule, the Enlightenment has been nothing if not divisive. To this day historians disagree over when it was, where it was, and what it was (and sometimes, still is). Kieron O'Hara deftly traverses these conflicts, presenting the history, politics, science, religion, arts, and social life of the Enlightenment not as a simple set of easily enumerated ideas, but an evolving conglomerate that spawned a very diverse set of thinkers, from the radical Rousseau to the

OFFER! \* \* \* Buddhism is general not considered a religion by its Abrahamic counterparts because of its spiritual and individual nature, rather than following a strict deity. Even the name Buddhism doesn't mean that they really pray to Buddha, but rather try to emulate the ways of Buddha - the man that reached enlightenment. In fact, the world Budhi means to have awaken which in Buddhism means to reach enlightenment. The religion was started by a man named Siddhartha Gautama, the founder of this spiritual religion or philosophy, if you will, and the first man to reach enlightenment; hence, he is colloquially referred to as Buddha. Siddhartha was born into a wealthy and influential family in the 4th century B.C., in Eastern India. Due to a prophetic telling, his father decided to keep him away from the outside world so that he would instead concentrate on being a great prince. Despite his father's attempts he was able to get outside of his father's walls to see the outside world in which he saw an old man, a sick man, a dead man, and an abstinent holy man. The holy man was the only one at peace so he decided to follow him. Why Should You Purchase And Read This Book? = > 1. Its Short And Informative No Fluff!! = > 2. spectrum), which is how he discovered the middle way. Another turning point for his wondrous life was when he meditated under the famous fig tree until he reached enlightenment. Once he did achieve this state of nirvana, he decided to go out and instruct others on how to reach it. His numerous followers went off to begin schools of their own and Buddha's final act was to predict his own death saying he was leaving his Earthly body behind. That evening he grew violently ill from eating a pork dish and died. His religion or spiritual philosophy went on to be one of the largest in the world and is still gaining popularity. Buddhism spread far and wide including the Indian subcontinent, East Asia and South East Asia, where many prominent schools developed. Chinese Buddhist schools sprung up, namely the Tibetan schools, and temples grew all over Thailand, Cambodia and even the water-locked islands of Indonesia.

the Scottish Enlightenment was a cultural revolution not just a philosophy.

This dissertation examines the preaching ministry of George Whitefield as a precursor to presuppositional apologetics in relation to the cultural shift of the Enlightenment. The presupposition of the authority of the Word of God is the concept that bridges Whitefield's preaching and presuppositional apologetics. Chapter 1 presents the research questions narrowing the topic. This section also presents background information as well as methodology of this work. Chapter 2 describes the biographical information of Whitefield. The cultural influences marked his life from an early age, but it was the influence of John and Charles Wesley that guided his faith. Chapter 3 outlines the thought of the Enlightenment period. Specifically, rationalism as a means to discerning and living by truth.

Philosophical influences such as Locke, Newton, Hume, Descartes, and Kant are overviewed. The First Great Awakening was the result of many cultural and theological ideas boiling over simultaneously. People were craving truth, direction, and a sense of authority. The Awakening highlighted the movement of the Holy Spirit theologically and a resurgence of biblical truth culturally. The work of John Wesley and Jonathan Edwards is also detailed in regards to their efforts to combat rationalism as sole priority in worldview thinking. Chapter 4

highlights the apologetic within the polemic of Whitefield. His Calvinistic theology is identified and connected to the Articles of faith for the Church of England. This leads to the idea of presuppositional apologetics found within his preaching. Cornelius Van Til, the father of presuppositional apologetics, is also overviewed to show the distinct connection between Whitefield's thoughts in holding a high view of Scripture and what becomes presuppositional apologetics. Chapter 5 examines the sermons of Whitefield for specific content related to evangelical pushback against Enlightenment thought. Key propositions of the Enlightenment regarding authority, morality, and ultimate truth are answered within the preaching of Whitefield. Each are examined thoroughly. Chapter 6 presents a conclusion regarding the apologetic of Whitefield in his preaching towards the Enlightenment. It reveals connections between the presupposition of the authority of the revelation of God and his polemic. Other connections between the reformer John Calvin and the father of presuppositional apologetics, Cornelius Van Til, are also noted.

The author shares the secret of his own self-realization and the philosophy for living in the present he has developed.

In the fourteenth century, the Tibetan Buddhist master Gyalse Tokmé Zangpo answered these questions in a now classic teaching called the Thirty-Seven Practices of a Bodhisattva. This text, consisting of inspiring verses distilling the entire Mahayana path of compassion, continues to inspire modern-day Buddhist masters, including His Holiness the Dalai Lama.
