Arthur Clifford Howard was a great Australian inventor and manufacturer of farming equipment. In 1912 he built a prototype rotavator powered by a motorcycle engine. Owners of large wheat farms expressed interest but only if he could create a machine that could match or better the work of horse teams. By 1922 his first tractor was demonstrated. He got orders for 6 machines. Working initially from Moss Vale, the Austral Auto Cultivators was registered. He also produced rotary hoe attachments for Fordson tractors. In 1927 the business moved to Northmead. 1926 saw the production of the A16 tractor. In 1927 the revolutionary walk-behind rotary hoe joined the production line. The company grew, DH16 tractor, DH22, and in 1937 the FWDH22 models were produced. 1953 saw the Kelpie tractor, with a variety of implements including the dozer blade, tipping trailer, disc harrows, tool bar, mouldboard plough and spray pack. Later models introduced the underbelly slasher, spring tyne cultivator, rear grader blade and field roller. -...low cost garden tractor that will find a place with every market gardener, poultry farmer and small orchardist- as the advertising blurb read. When the factory was closed in 1985 anything that was left was written off and dumped, including valuable literature and information on the machines. Shane Djuric is an expert on Howard Tractors and rotavators. His interest began as a child clambering over his grandfather's retired Kelpie garden tractor on their property in the Hawkesbury. He restored his first Howard tractor he realised there was a dearth of information about the brand. Robert Moore, another enthusiast, had started a Register of Howard Machinery, so that others could share knowledge and learn more. Shane began taking his growing collection to vintage machinery shows with Robert and other Register members, gathering information about machinery and the history of the company. Shane writes -This book has been done to cover the most frequently asked questions in regards to what model tractor had which particular features, and as this information has helped me, I now hope that it may help you.- Photographs illustrate the various tractors and details are given to help identify each model. Throughout there are contemporary advertisements for the various tractors. Howard Tractors are a part of Australia's manufacturing and agricultural history. Enthusiasts such as Shane Djuric are ensuring their name lives on.

For the kings and queens of England, a trumpet fanfare or crash of cymbals could be as vital a weapon as a cannon. Showcasing a monarch's power, prestige and taste, music has been the lifeblood of many a royal dynasty. From sacred choral works to soaring symphonies, Music and Monarchy looks at how England's character was shaped by its music. To David Starkey and Katie Greening, works like Handel's Water Music and Tallis's Mass for Four Voices were more than entertainment – they were pieces signalling political intent, wealth and ambition. Starkey and Greening examine England's most iconic musical works to demonstrate how political power has been a part of musical composition for centuries. Many of our current musical motifs of nationhood, whether it's the Last Night of the Proms or football terraces erupting in song, have their origins in the way the crown has shaped the national soundtrack. Published to coincide with a major BBC series, Music and Monarchy is not a book about music. It is a history of England written in music, from our leading royal historian.
