Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case

and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events. America has a long and complicated fascination with serial killers. When we think about the most infamous of these killers, we generally think of men like Ted Bundy, Jeffrey Dahmer, or John Wayne Gacy. Those names make headlines while there's the often-repeated myth that suggests there are no female serial killers. After all, most of us couldn't name a woman on the same scale of infamy as BTK or the elusive Zodiac Killer, can we? As it so often is, the truth is far more complicated. Women kill. While they are less sensationalized than their male counterparts, they are no less deadly. At time of publication, current research shows that one in six serial killers are female, bringing their number to fifteen percent of confirmed serial killers. This reference book includes background information on the killers, their victims, methods, and - where relevant - their arrests, trials, and convictions. Short biographies of female multiple-murderers from around the world.

Covering figures ranging from Catherine Monvoisin to Vlad the Impaler, and describing murders committed in ancient aristocracies to those attributed to vampires, witches, and werewolves, this book documents the historic reality of serial murder.

On November 8, 1985, 18-year-old Tom Odle brutally murdered his parents and three siblings in the small southern Illinois town of Mount Vernon, sending shockwaves throughout the nation. The murder of the Odle family remains one of the most horrific family mass murders in U.S. history. Odle was sentenced to death and, after seventeen years on death row, expected a lethal injection to end his life. However, Illinois governor George Ryan's moratorium on the death penalty in 2000, and later commutation of all death sentences in 2003, changed Odle's sentence to natural life. The commutation of his death sentence was an epiphany for Odle. Prior to the commutation of his death sentence, Odle lived in denial, repressing any feelings about his family and his horrible crime. Following the commutation and the removal of the weight of eventual execution associated with his death sentence, he was confronted with an unfamiliar reality. A future. As a result, he realized that he needed to understand why he murdered his family. He reached out to Dr. Robert Hanlon, a neuropsychologist who had examined him in the past. Dr. Hanlon engaged Odle in a therapeutic process of introspection and self-reflection, which became the basis of their collaboration on this book. Hanlon tells a gripping story of Odle's life as an abused child, the life experiences that formed his personality, and his tragic homicidal escalation to mass murder, seamlessly weaving into the narrative Odle's unadorned reflections of his childhood, finding a new family on death row, and his belief in the powers of redemption. As our nation attempts to understand the continual mass murders occurring in the U.S., *Survived by One* sheds some light on the psychological aspects of why and how such acts of extreme carnage may occur. However, *Survived by One* offers a never-been-told perspective from the mass murderer himself, as he searches for the answers concurrently being asked by the nation and the world.

A comprehensive reference to serial killings offers case studies of notorious murderers and articles discussing the psychology of serial murder, law enforcement techniques used to catch serial killers, and famous unsolved cases.

The Encyclopaedia of Serial Killers, Second Edition provides accurate information on hundreds of serial murder cases - from early history to the present. Completely updated entries and appendixes pair with more than 30 new photographs and many new entries to make this new edition more fascinating than ever. New and updated entries include: Axe Man of New Orleans; BTK Strangler; Jack the Ripper; Ciudad Juarez, Mexico; John Allen Muhammad and Lee Boyd Malvo, the Sniper Killers; Gary Leon Ridgway, the Green River Killer; and Harold Frederick Shipman.

The Encyclopedia of Mass Murder is a remarkable, revelatory exploration of the world's worst cases of mass murder. This comprehensive guide has been recently revised and updated for its U.S. debut from two true-crime experts. From this chilling collection, a significantly consistent pattern emerges of the person who commits mass murder: almost always male, a loner lacking in social skills, unable to form stable relationships. Bearing a grudge against society in general or blaming certain individuals in particular, he seeks revenge in the most extreme way. Among the 200 notorious cases profiled are Timothy McVeigh, responsible for the deaths of 168 people in the Oklahoma City bombing, Eric Harris and Dylan Klebold, two heavily armed students who opened fire at Columbine High School, killing 13 students, and Brenda Spencer, a rare instance of a female mass murderer, who shot dead eleven junior high classmates "because," she said, "I don't like Mondays." Eight pages of black-and-white photographs are included.

In 1974, Dennis Lynn Rader stalked and murdered a family of four in Wichita, Kansas. Since adolescence, he had read about serial killers and imagined becoming one. Soon after killing the family, he murdered a young woman and then another, until he had ten victims. He named himself "B.T.K." (bind, torture, kill) and wrote notes that terrorized the city. He remained on the loose for thirty years. No one who knew him guessed his dark secret. He nearly got away with his crimes, but in 2004, he began to play risky games with the police. He made a mistake. When he was arrested, Rader's family, friends, and coworkers were shocked to discover that B.T.K. had been among them, going to work, raising his children, and acting normal. This case stands out both for the brutal treatment of victims and for the ordinary public face that Rader, a church council president, had shown to the outside world. Through jailhouse visits, telephone calls, and written correspondence, Katherine Ramsland worked with Rader himself to analyze the layers of his psyche. Using his drawings, letters, interviews, and Rader's unique codes, she presents in meticulous detail the childhood roots and development of one man's motivation to stalk, torture, and kill. She reveals aspects of the dark motivations of this most famous of living serial killers that have never before been revealed. In this book Katherine Ramsland presents an intelligent, original, and rare glimpse into the making of a serial killer and the potential darkness that lives next door. Written and compiled by Susan Hall, the four-volume set has more than 1600 entries of male and female serial killers from around the world. Defined by the FBI as a person who murders 3 or more people over a period of time with a hiatus of weeks or months between murders, serial killers have walked among us from the dawn of time as these books will demonstrate. While the entries to these volumes will continue to grow—the FBI estimates that there are at least fifty serial killers operating in the United States at any given time—The World Encyclopedia of Serial Killers is as complete as possible through the end of 2017. The series continues with Volume Two, E–L. The entries include El Loco Luis Alfredo Garavito, Happy Face Killer Keith Hunter Jespersen, Interstate Killer Larry Eyler, Godfather of Matamoros Adolfo de Jesus Constanzo, and Golden State Killer Joseph James DeAngelo. You will find these killers and approximately 350 others in this second book in the series of The World Encyclopedia of Serial Killers.

Introduction includes the characteristics and behaviour patterns of serial killers.
