This book tells you why and how. This book brings together a collection of popular articles previously published by the author in assorted car magazines. Based on in-depth research carried out at Manchester University, the articles investigate how classic engines respond to modern petrol/gasoline, and the results are presented in a way that any enthusiast can understand. One chapter ranks some brands and grades of modern petrol/gasoline, helping you choose the best type for your vehicle, while other chapters present the findings that debunk some of the myths about petrol/gasoline and engines. Real data is provided to help you tune your classic vehicle, ensuring that it runs as it should, allowing you to experience the pleasure of driving your classic car instead of worrying about it breaking down. The appendix gives a down-to-earth description of how to rebuild and tune SU and similar carburetors. Paul Ireland's years of experience and no-nonsense scientific approach will help you get the best from your classic car.

Organised in a step-by-step format, this book thoroughly reviews the fundamentals of research methods, developing the skills needed to carry out a small-scale research investigation. Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Honda CBR1000RR (Fireblade), model years 2008 through 2013. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. An index makes the manual easy to navigate.

As the costs associated with buying and owning collectible American and European motorcycles continue to rise, enthusiasts are turning in greater numbers to motorcycles produced by Japanese manufacturers from the 1960s to the early 1980s. The prolific production of Japanese motorcycles during this period today translates to consumer-friendly market values for collectors. This buyer's guide divides the world of classic Japanese motorcycles by the four major manufacturers -- Honda, Kawasaki, Yamaha, and Suzuki -- while emphasizing such landmark models as the Kawasaki Z-1 and Honda CB750, and featuring a chapter of less common models from secondary marques like Bridgestone. Photographs of the motorcycles are accompanied by complete descriptions of specification, components, paint codes, and serial numbers. A five-star rating system grades the bikes on collectibility, parts availability, two-up touring, reliability, and power, while the author highlights common repair and restoration needs, and suggests sources for collectible models.

For more than 25 years, the Pratt & Kulsrud Taxation series has provided educators, students and professionals an engaging and clear presentation of tax law. In 1984, the series began with Federal Taxation, a first-of-its-kind textbook exploring issues related to the taxation of individuals and businesses. The success of that text and the demand for additional topics led to the creation of two separate texts: CORPORATE, PARTNERSHIP, ESTATE AND GIFT TAXATION AND INDIVIDUAL TAXATION. Through each edition, the series has consistently held to the principle that the key to learning taxation is to understand the underlying purpose behind every rule. For this reason, the authors and editors have made a concerted effort to provide the conceptual background and the historical foundation they believe are essential for comprehension. This edition continues the tradition of excellence with timely updates reflecting the latest in tax laws, the integration of H&R BLOCK At Home software, and rich online resources for instructors. Traction control? Engine management? Acres of run-off? You've got to be joking: motorcycle racing's age of superheroes, 1988-93, was the zenith of two-stroke Grand Prix racing, when macho colonials slugged it out on evil two-strokes capable of 200mph. Even Valentino Rossi acknowledges this period as a special moment in motorcycle racing history, for he grew up watching Kevin Schwantz, Wayne Rainey, Eddie Lawson, John Kocinski, Mick Doohan and Wayne Gardner on TV as they bumped fairings and burned rubber around ultra-fast, lethal racetracks.
