Master a complete roadmap for emerging market business success and profitability! Emerging markets are generating unprecedented opportunities, but they are far more complex and risky than they may seem. Profiting in these markets entails retooling business models, products, and strategies to exploit these differences, instead of falling victim to them. Too many American, European and Japanese companies continue to operate with a "developed world" mentality that

seeks to merely adapt existing products and strategies, while underestimating the unique challenges of managing a business in radically different contexts. Operating in Emerging Markets draws from real-life examples and today's most valuable research to offer a step-by-step blueprint for improving profitability in emerging markets. Pioneering researchers Dr. Luciano Ciravegna and Dr. Robert Fitzgerald walk you through understanding the true risks and challenges; identifying and investing the right resources; developing the right strategies, products, and processes; and learning from both the successes and failures that have come before you. An indispensable resource for all decision-makers in companies that are (or plan to) operating in emerging markets; and for all graduate business students who may do so in the future. "Publications devoted to rapidly transforming economies are on the rise, but the contribution is often marginal. This new book, Operating in Emerging Markets , authored by Luciano Ciravegna, Robert Fitzgerald, and Sumit Kundu, is an exception. It provides valuable insights into what makes these economies grow and prosper. Most importantly, it responds to the need for practical approaches to tapping emerging markets. Thus it should assist current and future managers in navigating these high-potential but high-risk countries." --S. Tamer Cavusgil, Callaway Professorial Chair and Executive Director, CIBER, J. While South Asia's economic reform initiatives of the last two decades were often born in crisis, this alone does not account for their occurrence. This book looks at the processes and institutional arrangements behind these reforms, and analyses what lessons can be learnt about how South Asia can improve its policy efficiency. The book develops ideas about how to overcome the political restraints to reform by drawing on recent theories of political economy and policy learning. It tests these ideas against authoritative case studies of actual reform initiatives in South Asia, which illustrate processes and institutional arrangements that have helped South Asian governments to sustain reform efforts, even in the absence of a strong political base. This offers valuable lessons for the global economy as it moves into a

phase of rebalancing, with the structural adjustments that this will require. The book goes on to identify weaknesses that could be addressed by South Asian national governments and regional forums. It is an important contribution to studies on South Asian Politics and International Political Economy

Growing up near the Sabine, journalist Wes Ferguson, like most East Texans, steered clear of its murky, debris-filled waters, where alligators lived in the backwater sloughs and an occasional body was pulled from some out-of-the-way crossing. The Sabine held a reputation as a haunt for a handful of hunters and loggers, more than a few water moccasins, swarms of mosquitoes, and the occasional black bear lumbering through swamp oak and cypress knees. But when Ferguson set out to do a series of newspaper stories on the upper portion of the river, he and photographer Jacob Croft Botter were entranced by the river's subtle beauty and the solitude they found there. They came to admire the self-described "river rats" who hunted, fished, and swapped stories along the muddy water—plain folk who love the Sabine as much as Hill Country vacationers love the clear waters of the Guadalupe. Determined to travel the rest of the river, Ferguson and Botter loaded their gear and launched into the stretch of river that charts the line between the states and ends at the Gulf of Mexico.
