This book explores South Korean responses to the architecture of the Japanese colonial occupation of Korea and the ways that architecture illustrates the relationship between difficult heritage and the formation of national identity. Detailing the specific case of Seoul, Hyun Kyung Lee investigates how buildings are selectively destroyed, preserved, or reconstructed in order to either establish or challenge the cultural identity of places as new political orders are developed. In addition, she illuminates the Korean traditional concept of feng shui as a core indigenous framework for understanding the relationship between space and power, as it is associated with nation-building processes and heritagization. By providing a detailed study of a case little known outside of East Asia, 'Difficult Heritage' in Nation Building will expand the framework of Western-centered heritage research by introducing novel Asian perspectives.

ion batteries. Throughout this book, especially in the first chapters, alternative vehicles with different power trains are compared in terms of lifetime cost, fuel consumption, and environmental impact. The emissions of greenhouse gases are particularly dealt with. The improvement of the battery, or fuel cell, performance and governmental incentives will play a fundamental role in determining how far and how substantial alternative vehicles will penetrate into the market. An adequate recharging infrastructure is of paramount importance for the diffusion of vehicles powered by batteries and fuel cells, as it may contribute to overcome the so-called range anxiety." Renowned biblical sleuth and scholar Richard Elliot Friedman reveals the first work of prose literature in the world—a 3000-year-old epic hidden within the books of the Hebrew Bible. Written by a single, masterful author but obscured by ancient editors and lost for millennia, this brilliant epic of love, deception, war, and redemption is a compelling account of humankind's complex relationship with God. Friedman boldly restores this prose masterpiece—the very heart of the Bible—to the extraordinary form in which it was originally written.

JCB Scrapbook Celebrating 75 Years of Engineering Innovation Price List No. 25 The Lonely City Adventures in the Art of Being Alone Macmillan "You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi.
