All the world's most advanced economies are dominated by service. The service sector also employs the largest number of people and it is the fastest growing sector, both in number of companies and employees. The questions posed in the book are: (1) How is it growing; (2) what are these new service innovations; (3) what are the drivers; and (4) how can organizations work with service innovations in a structured way? The book views service as the value-creating activity that customers perform in their own context. The role of a company is to provide the resources and knowledge to enable value creation. Based on this view, we develop a model of service innovation and develop guidelines for what is required from the organizational perspective; how should an organization view its customers in order to be successful, what does a service development process look like, and how to transform an organization that has a product focus to a service or solution provider.

Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. Given that the products themselves may be highly complex, this often requires a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted within a global context. However all textbooks are region-specific despite this growing move towards global business relationships – except this one. This textbook takes a global viewpoint, with the help of an international author team and cases from across the globe. Other unique features of this insightful study include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics and CSR early in the text; and detailed review of global B2B services marketing, trade shows, and market research. This new edition has been fully revised and updated with a full set of brand new case studies and features expanded sections on digital issues, CRM, and social media as well as personal selling. More selective, shorter, and easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. Yet, it is comprehensive enough to cover all the aspects of B2B marketing any marketer needs, be they students or practitioners looking to
