A spellbinding adventure and a captivating tale of first love. Alex and Jenny are sixteen. He lives in Milan; she, in Melbourne. For the past four years, they have glimpsed each other at random moments, while they are both unconscious — a telepathic communication that occurs without warning. During one of these episodes, they manage to arrange a meeting. But on the day, though they are standing in the same place at the same time, each of them cannot see the other. This leads them to a startling discovery: they live in different dimensions. In Jenny's world, Alex is someone else. And in Alex's world, Jenny died at the age of six. As they try to find each other, the Multiverse threatens to implode and disappear, but Jenny and Alex must meet — the future of the Earth depends on it. A jagged series of events written with gritty realism. The Elephant Tree transcends stereotypes and challenges the reader's sense of morality, with shocking plot twists and vivid characters. Rumination (recyclic negative thinking), is now recognised as important in the development, maintenance and relapse of recurrence of depression. For instance, rumination has been found to elevate, perpetuate and exacerbate depressed mood, predict future episodes of depression, and delay recovery during cognitive therapy. Cognitive therapy is one of the most effective treatments for depression. However, depressive relapse and recurrence following cognitive therapy continue to be a significant problem. An understanding of the psychological processes which contribute to relapse and recurrence may guide the development of more effective interventions. This is a major contribution to the study and treatment of depression which reviews a large body of research on rumination and cognitive processes, in depression and related disorders, with a focus on the implications of this knowledge for treatment and clinical management of these disorders. \* First book on rumination in depressive and emotional disorders \* Contributors are the leaders in the field \* First editor is a rising researcher and clinician with specialist interest in depression, and second editor is world renowned for his work on cognitive therapy of emotional disorders

This book explores the spatial dimensions of risk, examining the importance and role of 'space' within theories of risk and risk governance. The Spatial Dimensions of Risk discusses a broad range of risks, including natural hazards, climate change, political violence, and state failure. Case studies come from diverse settings globally, from Congo to Central Asia, from tsunami and civil war affected areas in Sri Lanka to avalanche hazards in Austria. The contributors explore the role of space in the causes and differentiations of risk, how we can conceptualize risk from a spatial perspective and the relevance of space and locality for risk governance. Through its exploration of the relationship between the production of risks and the construction of space, the book offers new approaches to theorizing risk and insights in to how better to manage, tolerate and take risks.

A darkly transgressive tale of criminality and sex-trafficking, but overall a coming together of characters from different worlds, uniting against a common enemy, and fighting for survival and what they believe to be right.

They've succeeded in escaping. And are going back home. But they aren't alone. Now that the adventure on Mars is over, what will become of Earth? The final book in the science fiction series "Red Desert". Earth. It's their home, they were born and raised there, but at the same time they've never set foot there. And so the deep feelings that Anna and Hassan have as they return to their own planet, after almost five years, are mixed with the marvel of the foreign entity they bring with them, as it lands on a new world. The two survivors of the Isis mission are welcomed as heroes, but they can't enjoy the adulation. The intent they are pursuing has priority over everything else. Besides the internal battle between the new Anna and the old, two more conflicts consume her: the one against the hidden dangers brought by Earth itself, not to mention its inhabitants, and a more complex one involving her own feelings, which will force her to make an important choice affecting her future. In the meantime, on the Red Planet,

"This book is fast, furious, compelling, and angry as hell." -- Seanan McGuire, New York Times bestselling author *The Boys* meets *My Year of Rest and Relaxation* in this smart, imaginative, and evocative novel of love, betrayal, revenge, and redemption, told with razor-sharp wit and affection, in which a young woman discovers the greatest superpower—for good or ill—is a properly executed spreadsheet. Anna does boring things for terrible people because even criminals need office help and she needs a job. Working for a monster lurking beneath the surface of the world isn't glamorous. But is it really worse than working for an oil conglomerate or an insurance company? In this economy? As a temp, she's just a cog in the machine. But when she finally gets a promising assignment, everything goes very wrong, and an encounter with the so-called "hero" leaves her badly injured. And, to her horror, compared to the other bodies strewn about, she's the lucky one. So, of course, then she gets laid off. With no money and no mobility, with only her anger and internet research acumen, she discovers her suffering at the hands of a hero is far from unique. When people start listening to the story that her data tells, she realizes she might not be as powerless as she thinks. Because the key to everything is data: knowing how to collate it, how to manipulate it, and how to

weaponize it. By tallying up the human cost these caped forces of nature wreak upon the world, she discovers that the line between good and evil is mostly marketing. And with social media and viral videos, she can control that appearance. It's not too long before she's employed once more, this time by one of the worst villains on earth. As she becomes an increasingly valuable lieutenant, she might just save the world. A sharp, witty, modern debut, Hench explores the individual cost of justice through a fascinating mix of Millennial office politics, heroism measured through data science, body horror, and a profound misunderstanding of quantum mechanics.

Thirty years after the Mars exploration mission 'Hera', whose crew died in mysterious circumstances, the ensuing political issues that slowed NASA's race to conquer space have finally ended. This time the five members of the new 'Isis' mission will not travel the 400 million kilometres for a short visit. This time they are destined to become the first colonisers of the Red Planet. The science fiction series "Red Desert", set in the near future, includes four books. The first one, "Point of No Return", is a novella. In what looks like a suicide attempt, Swedish exobiologist Anna Persson, crew member of the Isis, secretly leaves Station Alpha at the crack of dawn to travel deep into the Martian desert in a pressurised rover. As she journeys to the limit of her two day oxygen supply, she shows us memories of events from her past leading up to the mission. Little by little, as time and oxygen run out, she reveals the real Anna. Whatever her goal, wherever it is, will Anna reach her destination? The second book, "Red Desert - People of Mars" (a novel), will be published on 1 September 2014. Follow Anna Persson (AnnaPerssonDR) on Twitter! --- This is the first book in a series of four and it ends with a cliffhanger. ---

Tessa's life begins to come unglued. Nothing is what she thought it was. Not her friends. Not her family. The one person she should be able to rely on, Hardin, is furious when he discovers the massive secret she's been keeping. And rather than being understanding, he turns to sabotage. Tessa knows Hardin loves her and will do anything to protect her, but there's a difference between loving someone and being able to have them in your life. This cycle of jealousy, unpredictable anger, and forgiveness is exhausting. She's never felt so intensely for anyone, so exhilarated by someone's kiss—but is the irrepressible heat between her and Hardin worth all the drama? Love used to be enough to hold them together. When a mysterious young woman named Katie appears in the small North Carolina town of Southport, her sudden arrival raises questions about her past.

In these personal reflections on his thirty years of clinical work with victims of genocide, torture, and abuse in the United States, Cambodia, Bosnia, and other parts of the world, Richard Mollica describes the surprising capacity of traumatized people to heal themselves. Here is how Neil Boothby, Director of the Program on Forced Migration and Health at the Mailman School of Public Health, Columbia University, describes the book: "Mollica provides a wealth of ethnographic and clinical evidence that suggests the human capacity to heal is innate--that the 'survival instinct' extends beyond the physical to include the psychological as well. He enables us to see how recovery from 'traumatic life events' needs to be viewed primarily as a 'mystery' to be listened to and explored, rather than solely as a 'problem' to be identified and solved. Healing involves a quest for meaning--with all of its emotional, cultural, religious, spiritual and existential attendants--even when bio-chemical reactions are also operative." Healing Invisible Wounds reveals how trauma survivors, through the telling of their stories, teach all of us how to deal with the tragic events of everyday life. Mollica's important discovery that humiliation--an instrument of violence that also leads to anger and despair--can be transformed through his therapeutic project into solace and redemption is a remarkable new contribution to survivors and clinicians. This book reveals how in every society we have to move away from viewing trauma survivors as "broken people" and "outcasts" to seeing them as courageous people actively contributing to larger social goals. When

violence occurs, there is damage not only to individuals but to entire societies, and to the world. Through the journey of self-healing that survivors make, they enable the rest of us not only as individuals but as entire communities to recover from injury in a violent world.
