

Shang Han Lun On Cold Damage Translation And Commentaries

Xiaolong Qi

Shang Han Lun Zhang Ji, 2022-07-26 The Shang Han Lun has been a primary treatment theory and practice source for nearly two millenia. Its author, Zhang Zhong Jing, has been named the “Chinese Hippocrates” to highlight the depth and breadth of his contribution to traditional Chinese drug therapy. This edition features the Chinese text, Pinyin transliteration, and an English translation of the entire Song Dynasty text, the content and textual order most used in Asia. Just as in Chinese language editions, it is fully supplemented with notes and commentaries. The notes describe the clinical symptoms Zhang Zhong Jing associated with the Chinese terms. For example, modern interpretations of a “moderate” pulse often refer to the speed of its beats. The same term, when used in the Shang Han Lun, refers to a pulse that is loose, soft, and harmonious. Such notes provide practitioners with the clinical observations necessary to properly apply the information. The commentaries further enhance the text’s clinical utility by explaining the theoretical and practical foundations behind the lines of text. Because entire bodies of theory and practice can be associated with the terms and expressions used in canonical works like the Shang Han Lun, commentaries have become a standard means of knowledge acquisition for Asian students. The commentaries in this edition serve exactly the same purpose, greatly enhancing its utility. The introductory matter explains the background of the text, the conceptual structure of its contents, and the problems of exegesis. The appendices are designed to assist those studying Chinese and the glossary and the full Pinyin-English index make this an easily accessed reference.

On Cold Damage Zhongjing Zhang, Craig Mitchell, Ye Feng, Nigel Wiseman, 1999 The 'Shang Han Lun - On Cold Damage' is among the oldest surviving, the most copiously annotated and the most revered of China's traditional medical texts. Of all of China's early medical classics, the 'Shang Han Lun' is undoubtedly the one with the greatest relevance to the modern practice of Chinese medicine, and the one most deserving of Western attention. It was the first book to attempt to incorporate medicinal therapy into the medicine of systematic correspondences and channels and network vessels. Far ahead of its time in both theory and practice, it is not surprising that the prescriptions it contains comprise an important part of today's medicinal formulary.

Discussion of Cold Damage (Shang Han Lun) Guohui Liu, 2015-11-21 A major new translation of the Chinese classic Shang Han Lun by scholar and medical doctor Guohui Liu makes this foundational text fully accessible to English speaking clinicians for the first time. Extensive study and research underpins the translation; the author's understanding of both classical and modern Chinese enables him to interpret fully the ancient work within the theory of Chinese medicine. An extensive commentary explains the translation, the difficulties with the text, how it has been subsequently translated and expands on the theory laid out in the original text to reach an understanding that can be applied in the clinic for diagnosis and treatment. The value of this classic text lies primarily in its establishment of a basic framework for differentiation and treatment, but it also presents 112 formulas and 88 medicinal substances, which are commonly applied in clinical work for various conditions. In this edition, the 112 formulas are fully explained in the context of the clinical experiences of well-known ancient and modern doctors, and they are also laid out in two appendices, cross referenced to the text.

Commentary on the Discussion of Cold Damage with Annotations, 2018-07-21 Written by Cheng Wuji and published in 1144 this is a complete commentary on the entire text of On Cold Damage (the Shang Han Lun) in the Song dynasty order. The entire text means that Cheng's commentary includes the four chapters on the pulse, as well as the chapters on the prohibitions in the back of the Shang Han Lun. All told this adds another 250 lines of text to the Shang Han Lun. In addition to Cheng Wuji's commentary, Jonathan Schell has annotated and translated Cheng's lines with over 1600 lines from the Su Wen, 500 lines from the Ling Shu, 22 Difficulties from the Nan Jing, numerous passages from the Classic of the Pulse (Mai Jing), and commentary from Zhang Jingyue's Lei Jing, Zhang Zhicong's commentaries on the Su Wen and Ling Shu, Wang Bing's commentary on the Su Wen, and as well as numerous other Shang Han Lun commentators. This book has been produced in full color, where the color has been used to show the attributed and unattributed quotes which the commentators use to illustrate their points. This book also includes 52 illustrations, 35 of which were composed by Cheng Wuji and 17 which have been composed by Jonathan Schell. This book illustrates the pinnacle of classical thought, where the reader through the annotations can trace Cheng's thought process, and apply the canonical texts of Chinese medicine, as cited by Cheng, to the understanding of the Shang Han Lun.

Classical Chinese Medicine Liu Lihong, 2019-04-19 The English edition of Liu Lihong's milestone work is a sublime beacon for the profession of Chinese medicine in the 21st century. Classical Chinese Medicine delivers a straightforward critique of the politically motivated "integration" of traditional Chinese wisdom with Western science during the last sixty years, and represents an ardent appeal for the recognition of Chinese medicine as a science in its own right. Professor Liu's candid presentation has made this book a bestseller in China, treasured not only by medical students and doctors, but by vast numbers of non-professionals who long for a state of health and well-being that is founded in a deeper sense of cultural identity. Oriental medicine education has made great strides in the West since the 1970s, but clear guidelines regarding the

“traditional” nature of Traditional Chinese Medicine (TCM) remain undefined. Classical Chinese Medicine not only delineates the educational and clinical problems faced by the profession in both East and West, but transmits concrete and inspiring guidance on how to effectively engage with ancient texts and designs in the postmodern age. Using the example of the *Shanghanlun* (Treatise on Cold Damage), one of the most important Chinese medicine classics, Liu Lihong develops a compelling roadmap for holistic medical thinking that links the human body to nature and the universe at large.

The Evolution of Chinese Medicine Asaf Goldschmidt, 2008-10-08 This book offers a comprehensive overview of the crucial second stage in the evolution of Chinese medicine by examining the changes during the pivotal era of the Song dynasty.

Master Hua's Classic of the Central Viscera Tuo Hua, Shou-zhong Yang, 1993 Publication of the first English language translation of this Chinese medical text bearing the name of the most famous Chinese doctor of antiquity, Hua Tuo, gives Western practitioners access to what is, perhaps, the premier proto-Daoist medical classic. In particular, this book is a great source of information on pulse diagnosis and is the locus classicus of the theory of warm supplementation, containing numerous fascinating herbal and alchemical formulas for both internal and external usage.

Foundations of Theory for Ancient Chinese Medicine Guohui Liu, 2015-06-21 Discussion of Cold Damage (*Shang Han Lun*) and contemporary texts of ancient China form the bedrock of modern Chinese medicine practice, yet these classic texts contain many concepts that are either hard to understand or confusing. Based on over thirty years' medical practice, and study of the texts, this book explains the concepts involved so that the clinical applications of the ancient texts can be better understood and put into practice. The author looks at the larger context of ancient Chinese culture and philosophy in terms of theoretical knowledge, scholarly approach, and mindset in order to explain the basis for the medical texts. He also discusses the work of later Chinese medical scholars in elucidating the texts. He then goes on to look at more specific issues, such as the six conformations, zang-fu organ theory, the theory of qi and blood, the theory of qi transformation, and how these are understood in the ancient texts. He also discusses shao yang and tai yang theory; the element of time, and its place in understanding six conformations diseases. This remarkable work of scholarship will clarify many questions about the interpretation of the ancient texts for modern use, and will find a place on the bookshelf of every practitioner of Chinese medicine, as well as on those of scholars of Chinese medicine.

The Divine Farmer's Materia Medica Shou-zhong Yang, 1998

Warm Pathogen Diseases Guohui Liu, 2005 The understanding and treatment of infectious and other externally-contracted diseases has been a central concern of Chinese medicine for millennia. Especially during the past few centuries,

the concepts and treatment approaches of the warm pathogen disease school have percolated throughout Chinese medical thought. Modern practitioners apply them in the diagnosis and treatment of a wide variety of serious illnesses, including many which are common in the West, such as auto-immune disorders. *Warm Pathogen Diseases: A Clinical Guide (Revised Edition)* provides an in-depth, clinically oriented approach to this important subject. The introductory chapters tell the compelling story of how traditional Chinese physicians, primarily from the seventeenth through the nineteenth centuries, developed the theories and concepts of warm pathogen disease in response to the health crises of their time, which included a number of epidemics. The evolution of their approach to etiology, pathogenesis, diagnosis, and treatment, discussed in this volume, demonstrates how traditional medicine has evolved to meet contemporary needs. The second part of the book describes the various types of warm pathogen disease from a clinical perspective. Here the author discusses the manifestations, pathogenesis, treatment principles, and formulas for each type. Case histories show how theory is actually applied in the clinic. A variety of approaches is presented, which avoids the tendency to portray traditional Chinese medicine as an unchanging, monolithic entity. Over time, these differences have led to much creative foment and improvement in the efficacy of treatment. The author also addresses aspects of dosage and preparation that are generally omitted from standard textbooks. This part of the book will be particularly welcome to practitioners, who will find it useful in the clinic. Rounding out the volume is an extensive bibliography of original source materials, supp

The Classic of Difficulties Bianque,1999

Treatise on Cold Injury Zhang Zhongjing, *The Shang Han Lun* (simplified Chinese: 伤寒论; traditional Chinese: 傷寒論; pinyin: Shānghán lùn) known in English as the *Treatise on Cold Damage Disorders* or the *Treatise on Cold Injury*, is a Chinese medical treatise that was compiled by Zhang Zhongjing sometime before the year 220, at the end of the Han dynasty. It is amongst the oldest complete clinical textbooks in the world, and one of the four canonical works that students must study in traditional Chinese medical education today. The current edition is in ten volumes including the first to chapters on pulse diagnosis. The *Shang Han Lun* has 398 sections with 113 herbal prescriptions, organised into the Six Divisions corresponding to six stages of disease.

The Pulse Classic Shuhe Wang,1997 *The Mai Jing* or *Pulse Classic* was written in the late Han dynasty by Wang Shu-he. It is the first book in the Chinese medical literature entirely devoted to pulse diagnosis. As such, it is the undeniable and necessary foundation text for anyone seriously interested in understanding the rationale for and method of reading the pulse in Chinese medicine. Although not an easy read, this book is a mine of valuable information for those wishing to go more deeply into a study of the pulse.

Qin Bo-Wei's 56 Treatment Methods Bowei Qin,Boping Wu,2011 In the spring of 2007, Jason Blalack asked his mentor, Wu Bo-Ping, what was the most important Chinese medical text to translate into English. After a few moments of thought, Dr. Wu presented Jason with a tattered paperback copy of the original edition of Qin Bo- Wei's New Guidelines for Treatment (c. 1953), a manuscript that for all intents and purposes had been lost during the Cultural Revolution. That is the text that forms the framework of this exciting new book. Qin Bo-Wei (1901-1970) was among the most important physicians of the modern era. As a prominent clinician, educator, and scholar, he worked to integrate classical schools of thought and created one of the most coherent systems for understanding Chinese medicine during a critical time of intense turbulence in China's history. Wu Bo- Ping was one of Dr. Qin's students and is among the few who are still living today. Translated and presented to a Western audience for the first time, Qin's original work is enriched by Dr. Wu's extensive commentary, which transforms it into a hands-on guide on how to effectively practice herbal medicine. An excellent clinical manual, this book primarily teaches a method of thinking that serves as a foundation for a lifelong approach to herbal medicine. An understanding of how to use the core concepts presented here allows one to effectively treat the majority of diseases seen in the contemporary clinic. The text itself is unique in its presentation and differs from other clinical manuals in a number of ways: Organized by treatment method. Teaches a way of emulating the thought underlying a prescription without being tied to its specified ingredients or original indications, thereby reflecting the thinking of Chinese medicine's greatest clinicians. Ultimately, this approach opens up treatment possibilities that are often ignored in conventional textbooks. Small number of ingredients. Dr. Qin's prescriptions contain a small number of preci

Healing with Poisons Yan Liu,2021-06-22 Open access edition: DOI 10.6069/9780295749013 At first glance, medicine and poison might seem to be opposites. But in China's formative era of pharmacy (200-800 CE), poisons were strategically employed as healing agents to cure everything from abdominal pain to epidemic disease. *Healing with Poisons* explores the ways physicians, religious figures, court officials, and laypersons used toxic substances to both relieve acute illnesses and enhance life. It illustrates how the Chinese concept of du—a word carrying a core meaning of “potency”—led practitioners to devise a variety of methods to transform dangerous poisons into effective medicines. Recounting scandals and controversies involving poisons from the Era of Division to the Tang, historian Yan Liu considers how the concept of du was central to how

the people of medieval China perceived both their bodies and the body politic. He also examines the wide range of toxic minerals, plants, and animal products used in classical Chinese pharmacy, including everything from the herb aconite to the popular recreational drug Five-Stone Powder. By recovering alternative modes of understanding wellness and the body's interaction with foreign substances, this study cautions against arbitrary classifications and exemplifies the importance of paying attention to the technical, political, and cultural conditions in which substances become truly meaningful. Healing with Poisons is freely available in an open access edition thanks to TOME (Toward an Open Monograph Ecosystem) and the generous support of the University of Buffalo.
